CONTENTS

European emission standards to the year 2000 1
J. M. Dunne and P. J. Greening

25 years of emissions control: its costs and benefits 9
H. C. Watson and H. Lu

A new method for conformity of production monitoring of motor vehicle emissions 19
M. St J. Fendick and R. J. Rowlands

The effects of combustion chamber design on exhaust emissions from spark-ignition engines 25
R. L. Evans and J. Blaszczyk

A new generation of Toyota lean burn engine 31
J. Harada, H. Watanabe, K. Nakanishi, and T. Kawai

The reduction of exhaust emissions from two-stroke engines 37
C. E. Carson, R. J. Kee, R. G. Kenny, and G. P. Blair

Application of the HAJI system for near NO_X elimination in the SI engine 49
Z. Kyaw and H. C. Watson

The potential of an alternative load control concept for SI engines 57
P. M. Ziegler and A. Königstein

Advanced gasoline combustion systems for fuel economy and emissions 65
C. D. deBoer, J. Stokes, and T. Lake

Optimization of factors to reduce cold-start emissions using Taguchi methods 73
P. J. Shayler, P. Tinwell, J. Dixon, and D. Eade

Determining fuel transfer characteristics for mixture control during transient operation 81
P. J. Shayler, Y. C. Teo, and A. Scarisbrick

Fuel economy improvement by low friction engine design 89
E. Fahl, R. Stecklina, and A. Haas

A brief survey of the emissions performance of passenger cars in the UK 101
R. J. Brisley, P. Gagneret, E. Lox, and G. Rickert

Catalytic control of diesel particulate emissions 111
M. J. Davies, D. C. W. Blaikley, N. Jorgensen, D. E. Webster, and A. J. J. Wilkins

Exhaust gas aftertreatment systems for diesel engines with respect to future emission legislation 123
P. Zelenka and P. L. Herzog

Chemical non-catalytic deNo_X 137
G. E. Andrews and B. M. Gibbs

Light duty diesels — an update on the emissions challenge 155
R. W. Horrocks

On the road experience of passive diesel particulate filters using copper fuel additive 171
J. A. Saile, G. J. Monnin, and D. T. Daly

Control of the start of combustion in a direct injection diesel engine using an optical sensor 183
N. Ladommatos, R. A. Balian, R. Horrocks, and L. Cooper

Fuel efficient and green — the future heavy-duty diesel 197
J. R. Needham, C. H. Such, and A. J. Nicol

Future diesel fuel quality-balancing requirements 209
K. J. Rivers, C. W. C. van Paassen, M. Booth, and J. M. Marriott

The effect of fuel composition including aromatics content on emissions from a range of heavy-duty diesel engines 225
L. T. Cowley, A. LeJeune, and W. W. Lange

Pressure rise delay characteristics of a high-speed DI diesel engine with high-pressure injection 245
K. K. Rao and D. E. Winterbone

Large stationary diesel engine emissions when operating on diesel fuel — a building perspective 253
P. R. Danyluk
