Contents

1 Colour: A Historical Perspective 1

1.1 Introduction 1
1.2 The Early History of Dyes and Pigments 3
1.3 The Era of Synthetic Dyes and Pigments 8
1.4 Colour Chemistry in the Mid to Late 20th Century 15
1.5 Colour in the 21st Century 18
References 21

2 The Physical and Chemical Basis of Colour 23

2.1 Introduction 23
2.2 Visible Light 24
2.3 The Eye 27
2.4 The Causes of Colour 29
2.5 The Interaction of Light with Objects 30
2.6 Fluorescence and Phosphorescence 35
2.7 Dyes and Pigments 37
2.8 Classification of Colorants 39
2.9 Colour and Molecular Structure 41
2.10 Colour in Inorganic Compounds 66
References 68

Colour Chemistry: 3rd Edition

3 Azo (Hydrazone) Colorants 71

3.1 Introduction 71
3.2 Isomerism in Azo/Hydrazone Colorants 73
3.3 Synthesis of Azo/Hydrazone Dyes and Pigments 78
3.4 Strategies for Azo/Hydrazone Dye and Pigment Synthesis 87
3.5 Metal Complex Azo Dyes and Pigments 93
3.6 Azo/Hydrazone Dyes as π-Functional Colorants 95
References 96

4 Carbonyl Colorants 98

4.1 Introduction 98
4.2 Anthraquinones 100
4.3 Indigoid Dyes and Pigments 105
4.4 Benzodifuranones 110
4.5 Fluorescent Carbonyl Dyes 111
4.6 Carbonyl Pigments 112
4.7 The Quinone–Hydroquinone Redox System 118
4.8 Synthesis of Carbonyl Colorants 119
References 132

5 Phthalocyanines 134

5.1 Introduction 134
5.2 The Structure and Properties of Phthalocyanines 137
5.3 Synthesis of Phthalocyanines 142
References 147

6 Miscellaneous Chemical Classes of Organic Colorants 148

6.1 Introduction 148
6.2 Polyene and Polymethine Dyes 148
6.3 Arylcarbenium Ion Colorants 156
6.4 Dioxazines 162
6.5 Sulfur Dyes 162

6.6 Nitro Dyes 165
References 167

7 Dyes for Textiles and Related Substrates 169
7.1 Introduction 169
7.2 Dyes for Protein Fibres 173
7.3 Dyes for Cellulosic Fibres 179
7.4 Reactive Dyes for Protein and Cellulosic Fibres 185
7.5 Dyes for Synthetic Fibres 201
7.6 Dyes for Paper 207
7.7 Dyes for Leather 208
References 209

8 Pigments 211
8.1 Introduction and General Principles 211
8.2 Inorganic Pigments 216
8.3 Organic Pigments 229
8.4 Molecular and Crystal Modeling of Pigments 244
8.5 Pigments for Special Effects 250
References 254

9 Colorants in Cosmetics (Including Hair Dyes) 256
9.1 Introduction 256
9.2 Colorants for Decorative Cosmetics 257
9.3 Hair Coloration 260
References 272

10 π-Functional Colorants 274
10.1 Introduction 274
10.2 Chromic Materials 276

10.3 Electronic Applications of Dyes and Pigments 289
10.4 Reprographics Applications of Dyes and Pigments 315
10.5 Biomedical Applications of Dyes 323
References 330

11 Colour and the Environment 333
References 346

Subject Index 348
