Contents

Part I Problems

1 Electronic Structures and Properties of Atoms and Simple Molecules 3

2 Gas-state Molecular Kinetics and State Equations 35

3 Thermodynamics 63

4 Equilibrium in Solutions and Interfaces 107

Part II Useful Information

5 Units 141

6 Important Formulae Frequently Used in Physical Chemistry 145

7 Linear and Non-linear Least Squares Methods 151

8 Useful Mathematical Expressions 161

Part III Worked Solutions

9 Electronic Structures and Properties of Atoms and Simple Molecules 189

10 Gas-state Molecular Kinetics and State Equations 327

11 Thermodynamics 419

12 Equilibriums in Solution and Interface 583

Index 725
