Historical Introduction 1

The Era Before James Marion Sims 1

James Marion Sims (1813–1883) and the First Fistula Hospital 22

The Post-Sims Era 65

Fistula Surgeons in the Modern Era 102

The Hamlins of Ethiopia and the Second Fistula Hospital 110

The Incidence, Etiology and Pathology of Obstetric Fistula 120

Incidence 120

Etiology 121

i) Spontaneous Development 121

ii) Fistulae Due to Trauma 127

iii) Social Factors 129

iv) Traditional Genital Tract Injury and Mutilation 131

v) The Influence of Bilharzia 135

vi) Social Consequences of Genital Fistula 136

Pathology of Obstetric Fistula 138

i) Pressure Necrosis 138

ii) Healing Phase 140

iii) Associated Diseases and Conditions 143

Management of Urinary Fistulae 145

Clinical Features 145

i) Classification 145

ii) Symptoms 148

iii) Diagnosis and Investigation 149
Fistulae Involving the Urinary System—Clinical Groups 153
Surgical Correction 153
i) Prophylaxis 153
ii) Difficulties Associated with Urinary Fistulae 155
iii) Methods Available for Surgical Correction 156
Cauterization 156
Vaginal Surgery 156
Abdominal Surgery—the Transvesical Extraperioneal Approach 157
Transvesical Intraperitoneal Approach 161
Combined Abdomino-Vaginal Approach 165
Colpocleisis 168
Transplantation of Ureters 169
Unorthodox Approaches 170
iv) Choice of Surgical Approach 172
Principles of Vaginal Closure 173
1. Immediate Preoperative Requirements 173
2. Adequate Exposure 174
3. Assessment Under Anesthesia 177
4. Mobilization 177
5. Excision of Scar Tissue 181
6. Care of the Ureters 182
7. Bladder Wall Closure 183
8. Grafting 192
9. Closing the Vaginal Skin 199
10. Vaginal Pack 202
11. Postoperative Management 202
Complications 224

Recto-Vaginal Fistula 229
Introduction 229
Etiology 229
Clinical Features 231
Surgical Correction 232
