Preface ix
Editors xi
Contributors xiii

PART I OVERVIEW OF FLUORESCENCE MEASUREMENTS AND CONCEPTS 1

1. Overview of fluorescence lifetime imaging and metrology 3
Daniel S. Elson, Laura Marcu, and Paul M. W. French

2. Photophysics of fluorescence 23
Klaus Suhling

3. Tissue fluorophores and their spectroscopic characteristics 47
Alzbeta Chorvatova and Dusan Chorvat

PART II PRINCIPLES OF FLUORESCENCE LIFETIME INSTRUMENTATION 85

4. Pulse sampling technique 87
Diego R. Yankelevich, Daniel S. Elson, and Laura Marcu

5. Single-point probes for lifetime spectroscopy: Time-correlated single-photon counting technique 103
Christopher Dunsby and Paul M. W. French

6. Optical instrumentation design for fluorescence lifetime spectroscopy and imaging 117
Peter T. C. So, Heejin Choi, Christopher J. Rowlands, and Vijay R. Singh

7. Fluorescence lifetime imaging techniques: Frequency-domain FLIM 165
John Paul Eichorst, Kai wen Teng, and Robert M. Clegg

8. Fluorescence lifetime imaging techniques: Time-gated fluorescence lifetime imaging 187
James McGinty, Christopher Dunsby, and Paul M. W. French

9. Fluorescence lifetime imaging techniques: Time-correlated single-photon counting 203
Wolfgang Becker

PART III ANALYSIS OF FLUORESCENCE LIFETIME DATA 233

10. The phasor approach to fluorescence lifetime imaging: Exploiting phasor linear properties 235
Michelle A. Digman and Enrico Gratton

11. Analysis of time-domain fluorescence measurements using least-squares deconvolution 249
Jing Liu, Daniel S. Elson, and Laura Marcu

12. Global analysis of FLIM-FRET data 269
Hernán E. Grecco and Peter J. Verveer

13. Fluorescence lifetime imaging in turbid media 283
Vadim Y. Soloviev, Teresa M. Correia, and Simon R. Arridge

PART IV TISSUE AUTOFLUORESCENCE LIFETIME SPECTROSCOPY AND IMAGING: APPLICATIONS 323

14. Oncology applications: Optical diagnostics of cancer 325
Alzbeta Chorvatova and Dusan Chorvat

15. Oncology applications: Brain 345
Pramod V. Butte, Adam N. Mamelak, and Laura Marcu

16. Oncology applications: Skin cancer 363
Rakesh Patalay, Paul M. W. French, and Christopher Dunsby

17. Oncology applications: Gastrointestinal cancer 379
Sergio Coda, Paul M. W. French, and Christopher Dunsby

18. Oncology applications: Intraoperative diagnosis of head and neck carcinoma 387
D. Gregory Farwell and Laura Marcu

19. Fluorescence lifetime techniques in cardiovascular disease diagnostics 399
Jennifer E. Phipps, Yang Sun, and Laura Marcu

20. Ophthalmic applications of FLIM 423
Dietrich Schweitzer

21. Fluorescence lifetime imaging applications in tissue engineering 449
Bernard Y. Binder, J. Kent Leach, and Laura Marcu

PART V FLUORESCENCE LIFETIME IMAGING BASED ON EXOGENOUS PROBES 459

22. Tomographic fluorescence lifetime imaging 461
Anand T. N. Kumar

23. Photosensitizers and PDT 477
Rinaldo Cubeddu, Paola Taroni, and Gianluca Valentini

24. Fluorescence lifetime imaging of ions in biological tissues 497
Christoph Biskup and Thomas Gensch

Index 535
