**1 Introducing Forensic Intelligence** 1

Introduction 1
Semantics: 'Forensics' and 'Intelligence' 1
Forensic Intelligence: Professor Olivier Ribaux's Definition 2
Forensic Intelligence: A Working Definition 2
The Concept of 'Entities' in Police Recording Systems 3
Does Your Forensic Services Staff Have Access or Input to Your Intelligence Systems? 5
Access to Forensic Support Resources 6
Forensic Intelligence in Intelligence-Led Policing 7
The Origins of Forensic Intelligence 9
Estimating the Number of Current Offenders 12
Has Modern Forensics Had an Impact on Crime Reduction? 13
The Beginnings of a Concept of Forensic Intelligence 16
The Introduction of Information Technology: From the 1980s Onward 17
COMPSTAT 19
Police Intelligence Models and the Language of Intelligence-Led Policing 19
'Intelligence Is What It Does': A Definition 20
Police Intelligence Models 20
The Four Levels of Crime Divisions in Crime Intelligence Models 21
New York Police Department: COMPSTAT 22
Intelligence Assets 23
Knowledge Assets 24
System Assets 24
Intelligence Assets 26
The Four Generic Intelligence Products and the Aims of COMPSTAT 26
Intelligence Sources 29

Intelligence Handling Codes 30
The 5 × 5 × 5 System as Used in Grading Intelligence 30
Forensics as Intelligence Sources 31
The Collection of Forensic Intelligence 32
Police Forensic Business Models 32
A Short History of Forensic Intelligence in the Metropolitan Police 33
An Early Forensic Intelligence Tool Mark Case Example from the Late 1990s 35
The Metropolitan Police Modernise for the Twenty-First Century 37
Forensic Intelligence Development in the Metropolitan Police, 2002–2008 38
Where Forensic Intelligence Should Fit within Police Organisations 41
Summary 42

**2 The Value of Forensics in Crime Analysis and Intelligence 43**

Intelligence Features of Forensic Evidence Types 43
Linking Cases and Comparative Case Analysis 44
The Different Forms of Case Linking in Criminal Analysis 44
Varieties of Forms of Case Linking 45
Receiver Operator Characteristics 47
Truth and Probability 48
The Crime Detection and Prosecution Rectangle 49
The Values of Forensics in Case Linking 49
A Footwear Evidence Persistence Case Example 50
A Linked Homicide Case Example 51
Dealing with Forensic Crime Links and Clusters 52
A Footwear Mark Cluster Example 52
Footwear Evidence Frequency Evaluation 53
Forensic Legacy Data 57
Legacy Data and the FSS Sexual Assault Forensic Intelligence Service 59
Improving the Potential of Legacy Data Use 59
The Importance of Regular Meetings 59
The Different Experiences of CSIs and Analysts 60
Summary 61

**3 Research and Analytical Processes 63**

Introduction 63
The Nine Analytical Techniques 63
Crime Pattern Analysis 64

The Radex and Smallest-Space Analysis in Crime Analysis 65
Descriptions of Terms in Figure 3.1 67
The Value of Improving Forensic Support in Problem-Oriented Policing and Crime Pattern Analysis 68
Market Profiles 70
Demographic and Social Trend Analysis 72
Criminal Business Profiles 73
Network Analysis 74
Profile or Target (Subject) Profile Analysis 76
Results Analysis 76
Risk Analysis 77
Operational Intelligence Assessments 77
The Daily Work of the Crime Analyst 78
The Daily Work of an Analyst 79
The Daily Work of a Forensically Aware Forensic Intelligence Analyst 81
The Aims and Objectives of Incorporating Forensics into Crime Analysis 82
A Structure for Dealing with Forensic Intelligence 83
A Forensic Intelligence Process Route Map 85
The Input of Forensic Intelligence into Intelligence-Led Policing 86
Common Policing Problems Inhibiting Forensic Intelligence 89
The CSI's Role in Forensic Intelligence 89
The Forensic Services Team 91
Intelligence Features of Forensic Evidence Types 92
Summary 94

**4 Forensic Evidence Recovery, Processing, and Best Practice 95**

Purposes and Objectives of Crime Scene Examinations 95
Inhibitors to Effective Uses of Crime Scene Examinations, Forensic Recoveries in Linking Crimes, and in Contributing to the Production of Intelligence Products 96
Rights or Not to Obtain or Seize Forensic Material from Offenders 97
An Example of Volume Crime Practices Inhibiting a Serious Investigation 97
The Advantages of Databasing and Managing Collections of Forensic Evidence 98
A Scenes of Crime Field Force Checklist for Effective Management of Forensics 99

Using Intervention Rates and Forensic Recovery Frequencies in Crime Analysis 99
Issues around Positive and Negative Management Techniques of Forensic Support 100
Questions That Police and Forensic Managers Need to Ask Themselves 102
The Issue of Areas Disclosed in Forensic Marks as an Enabler of Forensic Intelligence 103
Best Practice in Using the Main Forensic Evidence Types 104
Automatic Fingerprint Identification Systems and Their Characteristics 104
The Four Factors at Work in Existing Miss Rates with AFIS 105
Forensic Strategies to Make the Best Use of AFIS 107
Fingerprint Laboratory Support 108
Using DNA Matches and Crime Scene Links Effectively 110
An Inhibited DNA Casework Example 111
DNA Databases and eDNA 112
Significance of DNA Forensic Crime Scene Intervention and Recovery Rates 112
Forensic Problem Profiles and the Concept of the Forensic Intelligence Report 114
Summary 116

**5 Best Practice in Recovery of Forensic Evidence from Crime Scenes 121**

Dealing with Crime Scenes 121
Crime Scene Examinations of Serious and Volume Crimes 121
Footwear Evidence Best Practice 123
Dealing with Footwear Marks Found Whilst Powdering for Latent Prints 125
Using Gelatine Lifters 126
Scanning Covered Gelatine Lifts 126
Preservation and Packaging of Gelatine Footwear Mark Lifters 127
Covering Gelatine Volume Crime Lifts 127
Re-covering Technique for Gelatine Lifts 128
Using Transparent Adhesive Lifters 128
Photographing Footwear Marks 129
Electrostatic Dust Mark Lifting (ESL) 130
Dealing with Electrostatic Lifts 132
Dealing with Dental Stone Casts 132
Marks in Snow 133

Dealing with Suspected Offenders' Footwear 133
*Inkless Printing of Offenders' Shoes* 133
Packaging Footwear 134
Footwear Forensic Computer Systems 134
Submitting Footwear Marks to the Laboratory 135
Footwear Comparisons 135
Serious Crime Footwear Cases 136
Instrument (Tool) Marks 136
Basic Principles 136
The Evidential Value of Instrument (Tool) Marks 136
Identification at Crime Scenes 137
Types of Instrument Marks Found at Crime Scenes 137
Retrieval of Instrument Marks 137
Recording of Information from Instrument Marks 138
Packaging of Exhibits 138
Intelligence Value of Instrument Marks 139
Coding Tool Marks for Input to Police Systems 139
Casting Instrument Marks 141
Isomark, Microsil, and Casting Putty Materials 142
Other Evidence Types 143
Ballistics 143
Manufacturing Marks 143
Evidential Value of Manufacturing Marks 144
Physical Fits 144
Contact Trace Evidence 145
Glass 145
General Comments 145
Types of Glass 146
How Glass Breaks 147
Taking Control of Glass Samples 147
Multiple Control Samples 148
From Which Side Was the Window Broken? 148
Packaging Glass Samples 149
Dealing with Suspects 149
Hair Combings 150
Paint Evidence 150
Household Paint 150
Vehicle Paint 151
Sampling Household and Vehicle Paint 151
Miscellaneous Traces 152
Cosmetics 153
Oils and Greases 153
Plastics, Rubbers, and Adhesives 153

Soil, Safe Ballast, and Building Materials 153
Metals 154
Other 154
Noxious Chemicals 154
Other Substances 157

**6 The Implementation of Intelligence-Led Policing 159**

Introduction 159
Common Intelligence Standards and Their Introduction: The London Experience 162
Protocols for the Use of QQCSE CRIMINT Logs 164
The Practicalities of Introducing Intelligence-Led Policing 170
Intelligence Unit Structure 171
Intelligence Unit Roles 171
Intelligence Unit Manager 171
The Gatekeeper 171
Researcher 172
Crime Analyst 172
Intelligence Log Supervisor 172
Field Officers 172
Tasking and Briefing Slide Officer 173
Forensic Intelligence Researcher or Analyst 173
Must a Police Service Work under an Intelligence-Led Model to Benefit from Forensic Intelligence? 175
Forensic Intelligence: A US Academic's View 175
The Innocence Project 176
Is Intelligence-Led Policing Difficult to Implement? 178
More International Perspectives on Forensic Intelligence 179
The UK NPIA Forensics 21 Programme 180
The Forensics 21 Custody Suite Process Work Stream toward a Better Forensic Intelligence Model 181
US National Forensic Science Technology Centre 182
Introducing Intelligence-Led Policing: A Review 184
Summary 185

**7 Forensic Intelligence Applied to Different Crime Types 187**

Forensic Intelligence and Volume Crime: A Checklist 187
The Importance of Service Champions in Delivering Intelligence-Led Procedures including Forensics 188

The Importance of the Effective Use of Digital Technology 189
A Case Study: The Barkingside Jewellery Burglar, 2002–2006 198
Setting Up a Forensic Intelligence Capability 200
Forensic Intelligence in Arson Investigation 202
The Arson Crime Partnership Data Structure Outline 204
Some Arson Casework Examples 205
Exterior and Vehicle Fire Setting by Youths in North London 205
The Islington Traveller—'Fuel Available'—Arsonist 206
The Broadlove Lane Neighbourhood Arsonist 208
The Oxford Street Department Store Arsonist 208
The 10-Point Plan for Arson Investigation 211
Forensic Intelligence Possibilities in Dealing with Illicit Drug Marketing 211
Summary 220

**8 The Need for Investment in Information Technology 221**

Introduction 221
General Information on Foster & Freeman Shoeprint, Image, Capture, and Retrieval System (SICAR) 223
SICAR Reference Databases 223
SoleMate 224
TreadMate 225
Operating Outline of System 225
A SICAR Casework Example: Incident No. 20410—The Coventry Murder 228
Partial Identification of the Footwear Mark 228
The Footwear Mark Is Referred to Foster & Freeman 228
Court Case Results in a Successful Conviction 229
General Information on Treadmark Footwear Evidence Storage, Screening, and Comparison Software 229
Treadmark in the Leicestershire Constabulary: An Outline 232
The Legal Aspects of Using Treadmark in the UK 233
The Police Officer's Role 234
Procedure in Preserving Footwear Evidence 234
The Internal Processes by Footwear Examiners 235
A Typical Leicestershire Volume Crime Linked Case Example 235
Advice from Leicestershire Constabulary Regarding Treadmark 236
Intelligence Software Solutions 236

Memex Law Enforcement: Case Software—A Police Casework Solution 237
Overview: Case Formation 237
Lifetime Case Information 239
Case Linking 239
Protected Records in Memex Case 240
Forensic Intelligence: A Summary 240
