Contents

Preface vi
A note on the author viii

1 Introduction 1

2 Sources of groundborne noise 9

3 Wave propagation 30

4 Receivers of groundborne noise 58

5 Wave types in structures 74

6 Soil dynamic properties 87

7 Power flow 110

8 Conversion of groundborne vibration into audible sound 117

9 Measurement of groundborne noise 129

10 Prediction of groundborne noise 140

11 Mitigation of excessive groundborne noise 152

12 Uncertainty 182

13 Assessment criteria 190

Glossary 210
Index 216
