About the Authors xix
Introduction xxi
Scope xxii

Chapter 1 Beyond Visual Line of Sight Uncrewed Aircraft Systems 1

1.1 UAS Airworthiness and Certification 1
1.2 Small UAS and BVLOS Operations 5
1.3 sUAS Capabilities 7
1.3.1 Air and Ground Risks 8
1.3.2 Detect and Avoid 10
1.3.3 Aircraft Collision Avoidance System (ACAS) sXu 16
1.3.4 C2 Link 18
1.3.5 Process for Qualification of sUA and AEs 19
1.3.6 Third-Party Services 20
1.4 sUAS Operations 20
1.4.1 Overview of FAA, EASA, TCCA, and CAAC Regulations for VLOS Operations 21
1.4.2 BVLOS Operations and Part 107 Waivers 24
1.5 Environmental Considerations and Community Integration 36
1.6 UTM Operations 37
1.6.1 Overview of EASA, TC, and CAAC Regulations for U-Space/UTM 49
References 51

Chapter 2 Type-Certificated Uncrewed Aircraft Systems 53

2.1 UAS Capabilities 59
2.1.1 Detect and Avoid 59
2.1.2 Latency Budget 66
2.1.3 DAA Display 69
2.1.4 Autopilot/Flight Control System Integration 71
2.1.5 DAA Control Panel 71
2.1.6 Class 1 DAA System Flight Testing 72
2.1.7 Class 2 DAA System Flight Testing 74
2.1.8 Aircraft Collision Avoidance System (ACAS) Xu 74

2.1.9 Command and Control Link 77
2.1.10 C2 Link System Failure Monitoring 82
2.1.11 C2 Link System Security Protection 83
2.1.12 Ground Test of the C2 Link System 84
2.1.13 Flight Test and Evaluation 85
2.2 UA Flight Testing and Evaluation 86
2.3 Process for Certification of UA and AEs 87
2.3.1 Certification of UA 87
2.3.2 Approval of Associated Elements 89
2.3.3 UA and AE Software Certification 90
2.3.4 UA and AE Environmental Qualification 90
2.3.5 Cybersecurity Considerations 91
2.4 Maintenance, Repair, and Alteration 91
2.5 Environmental Considerations and Community Integration 92
2.5.1 Noise Certification 92
2.5.2 Community Integration 92
Note 92
References 92

Chapter 3 Uncrewed Aircraft Systems Business Development and Marketing 94
3.1 UAS Business Development 94
3.1.1 Essentials of a Vision Statement 94
3.1.2 The What, Why, When, Where, and Who 95
3.1.3 Technology Readiness Assessment (TRA) | Evaluation of Technology Maturity 96
3.1.4 Valuation 98
3.1.5 Circumstances beyond Control 98
3.1.6 Protection Mode 98
3.1.7 Stages of Innovation 98
3.1.8 UAS Revenue Potential 99
3.1.9 Technology Transfer 99
3.1.10 Business Development 100
3.1.11 Checklist Summary 100
3.1.12 Partnerships, Funding, Agreements, and Reviews 101
3.1.13 The Roadmap 102
3.2 Marketing 103
3.2.1 Marketing is Not Deceptive 103
3.3 Ethical, Privacy, and Equity Considerations 104
References 105

Chapter 4 Advanced Air Mobility 107
4.1 AAM 107

4.2 AAM Aircraft Capabilities 107
4.2.1 Detect and Avoid (DAA) 108
4.2.2 Aircraft Collision Avoidance System (ACAS) Xr 108
4.2.3 Command and Control (C2) Link 111
4.3 UAM Operations 111
4.3.1 Urban Air Mobility: Providers of Service to UAM (PSUs) 114
4.3.2 Third-Party Service Providers 119
4.3.3 Vertiport Management System 120
4.3.4 Flight Testing and Infrastructure 120
4.4 AAM Rulemaking and Policy 120
4.4.1 AAM Rulemaking 120
4.4.2 Integration of Powered Lift: Pilot Certification and Operations; Miscellaneous Amendment Related to Rotorcraft and Airplanes 121
4.4.3 Update to Air Carrier Definitions 121
4.4.4 Airman Certification Standards and Practical Test Standards for Airmen; Incorporation by Reference 121
4.4.5 AAM Guidance and Policy 122
4.5 Overview of European Union Aviation Safety Agency (EASA), Transport Canada Civil Aviation (TCCA), and Civil Aviation Administration of China (CAAC) Regulations for AAM and eVTOL Aircraft 122
4.6 Aircraft Rechargeable Lithium Battery Safety and Battery-Electric Propulsion Systems 124
4.6.1 Lithium-Ion Battery Limitations and eVTOLs 125
4.6.2 Impact on eVTOL Range 126
4.6.3 Future Outlook 126
4.7 Aircraft Electrification and Infrastructure 127
4.8 Vertiport 128
4.8.1 Vertiport Automation 130
4.8.2 Integrated Vertiport Automation System Considerations 134
4.8.3 UML Risk-Based Integrated Vertiport Automation System Considerations 135
4.9 Environmental Considerations and Community Integration 136
4.10 Environmental Sustainability 137
4.11 FCC NPRM on Spectrum for AAM 137
Notes 138
References 138

Chapter 5 Security for UAS and AAM 140
References 141

Chapter 6 Advanced Air Mobility Business Development and Marketing 142

6.1 The Birth of Advanced Air Mobility 142
6.2 Defense 142
6.3 Airports 142
6.4 The White House 143
6.5 FAA Unmanned Aircraft System (UAS) Test (UASTS) Program 143
6.6 Advanced Air Mobility Plan | Business Development | Markets 144
6.7 Focus Areas to Consider 145
6.8 AAM Operations' Key Considerations Include the Following: 145
6.9 Advisory Circulars 145
6.10 Infrastructure 146
6.11 Building AAM Operations and Aircraft Performance Profiles 146
6.12 Implementation and Scale 146
6.13 Marketing AAM | Social Acceptance, Operational Feasibility, and Financial Viability 147
References 147

Chapter 7 Counter-UAS 149

7.1 C-UAS Systems and Operations 150
References 151

Chapter 8 Aircraft Automation, Artificial Intelligence, and Digital Flight 153

8.1 Aircraft Automation and Artificial Intelligence 153
8.2 Digital Flight 153
8.2.1 AAM eVTOL Digital Flight Use Case 155
8.2.2 BVLOS sUAS Digital Flight Use Case 157
References 157

Chapter 9 Conclusion 159

Appendix A: Acronyms and Definitions 161

Appendix B: BVLOS sUAS Package Delivery with 4G-/5G-Enabled DAA, CA, C2, UTM Service, and Smart City Use Cases 164

Appendix C: UAS Pre-Flight, Landing/Post Flight, Incident Response, and Cybersecurity Checklists 179

Appendix D: BVLOS Operations and VLOS and BVLOS Operations over People and over Moving Vehicle Part 107 Waiver Checklists 183

Appendix E: Operational Safety Risk Assessment of a BVLOS Use Case 187

Appendix F: Example of Safety Case and Operational Safety Risk Assessment of an Integrated Surveillance System 214

Appendix G: UTM NTAP CONUSE and CONOPS Templates..... 220

Appendix H: Key Type Certification Requirements for Medium and Large UASs..... 225

Appendix I: UAM UAS Cargo Operation Use Case..... 227

Appendix J: UAM eVTOL Use Case..... 230

Appendix K: Example of Security Assessment of an Integrated Surveillance and Automated Operating System Network 233

Appendix L: C-UAS Scenarios for Airport Security Demonstration.....238

Index..... 241
