About the Authors ix
Preface to the Eighth Edition xi
Online Resources xiii
Your Guide to the Research Process xv

1 Finding Your Feet in Management and Business Research 1

Introduction 1
The landscape of management and business research 2
Features of a research project 9
Writing a research proposal 13
Structure of the book 19
Conclusion 21
Further reading 21

2 Reviewing the Literature 23

Introduction 23
What is a literature review and what are its main purposes? 24
Types of literature reviews 27
Choosing a research problem 30
Preparing a literature review: finding and recording relevant literature 32
Finding relevant literature 35
Evaluating literature 53
Writing a literature review 61
Conclusion 64
Further reading 65

3 The Philosophy of Management and Business Research 67

Introduction 67
The tree as a metaphor for the research process 68
The philosophical debates 73
Strengths and weaknesses of the main paradigms 88
Mixing approaches and methods 89
Paradigms and research approaches 92
Mapping philosophies and approaches 94
Conclusion 102
Further reading 103

4 Designing Management and Business Research **105**

Introduction 105
Types of research design 109
Positivist research designs 111
Sampling 124
Constructionist research designs 135
Case study research 146
Mixed methods 152
Data analytics 158
Common design dilemmas 159
Contributing to theory 164
Contrasting views on validity and reliability 166
Research design template 166
Conclusion 170
Further reading 171

5 The Ethical Researcher **173**

Introduction 173
Politics and power in research 174
Access and engagement 180
Ethics 190
Navigating academia 197
Positive mindset 200
Conclusion 202
Further reading 203

6 Crafting Qualitative Data through Language and Text **205**

Introduction 205
Crafting qualitative data 207
Secondary textual data 207
Primary textual data 209
Qualitative interviews 213
Preparing for qualitative interviews 220
Conducting interviews 227
Group interviews and focus groups 234
Interview-based mapping techniques 236
Conclusion 239
Further reading 240

7 Crafting Qualitative Data through Observation and Participatory Research **243**

Introduction 243
Visual methods 244
Observational research 253
Participatory methods 265

Conclusion 273
Further reading 274

8 Framing and Interpreting Qualitative Data 277

Introduction 277
Preparing and managing qualitative data 280
Choosing a method for the analysis of qualitative data 283
Framing and interpreting qualitative data: ten approaches 286
Computer-aided analysis 322
Quality in qualitative research 325
Conclusion 328
Further reading 328

9 Crafting Quantitative Data 331

Introduction 331
Experimental and observational quantitative studies 332
Sources of primary data 338
Using secondary data sources 346
Working with data: data pre-processing and measurements 355
Conclusion 364
Further reading 365

10 Statistical Analysis of Quantitative Data 367

Introduction 367
Describing and visualizing data 368
Going beyond a sample: statistical hypothesis testing 384
Causal modelling: regression analysis 395
Conclusion 408
Further reading 408

11 Application of Machine Learning in Quantitative Research 411

Introduction 411
Machine learning in business and management research 412
Types of machine learning 415
Unsupervised learning 418
Supervised learning 425
Interpretable machine learning: what is inside a black box? 432
Conclusion 438
Further reading 440

12 Disseminating Management and Business Research 441

Introduction 441
Audiences and outputs 442
Learning to write 448

Writing introductions 457
Literature reviews 458
From methods to findings 460
Discussion and conclusion 463
Academic integrity 467
Dissemination strategies 469
Conclusion 475
Further reading 475

Glossary 477
Bibliography 493
Index 523
