Contents

About the Author **xiii**

Preface **xv**

Acknowledgements **xvii**

Introduction **xix**

Identity xix
Background xx
Analogy with history xxi
Structure of the book xxii

1 A History of Information **1**
Origins 1
Written language 3
Ancient information 4
Ancient libraries 6
Medieval information 6
Information flows 7
Information 1800–1950 9
Information since 1950 11
Conclusion 12

2 A History of the Discipline **13**
What defines a discipline? 13
From authority to academic status 14
A first doctoral programme 16
Information access 17
Reliable information 18
The birth of a field 19
Information science gains identity 21
Information science today 23
Conclusion 24

3 Information Science Organisations **25**
What criteria define an information science organisation? 25
iSchools 26
ASIS&T 29
ALISE 31
IFLA 33

	Anglo-American library associations	34
	European and other library associations	36
	Conclusion	37
4	**Language and Information Science**	**39**
	What is the role of language in information science?	39
	Common languages	40
	Writing languages	41
	Technical languages	43
	Dialects within languages	46
	Change over time in languages	48
	The language of pictures	49
	Conclusion	50
5	**Culture and Information Science**	**53**
	What is the role of culture in information science?	53
	Culture over time	54
	Culture across physical space	55
	Culture across virtual space	57
	Culture in education	58
	Culture at work	61
	Culture at home	62
	Conclusion	64
6	**Technology**	**65**
	What role does technology play in information science?	65
	Writing as technology	66
	Printing as technology	67
	Engineering technology	68
	Radio technology	70
	Visual technology	72
	Telegraph and telephone	73
	Images	75
	Conclusion	76
7	**Internet Technology**	**79**
	What is the role of internet technology in information science?	79
	Origins of the internet	80
	E-mail and browsers	81
	Alternative networks	83
	Social media	85
	Security concerns	88
	Political concerns	89
	Conclusion	90
8	**Information Integrity**	**91**
	What is information integrity?	91
	Information integrity in the past	92

Discovering integrity problems 94
Whose job? 96
Measuring information integrity 98
Assuring information integrity 100
Conclusion 102

9 Artificial Intelligence 103
What is artificial intelligence? 103
Artificial intelligence past and present 104
Early computing efforts at AI 106
Large language models 109
AI images and voice 112
Conclusion 114

10 Information Behaviour 115
What is information behaviour? 115
Pre-modern information behaviour 116
Role of language in information behaviour 118
Information reliability 120
Information gaps 122
Fake information 124
Conclusion 126

11 Data Science 127
What is data science? 127
Data before 1800 129
Data 1800–1950 131
Data in context 133
Types of data 134
Public and private data 137
Conclusion 138

12 Non-verbal Information 139
What is non-verbal information? 139
Pre-modern non-verbal information 140
Information in paintings 142
Information in photographs 144
Information in theatre and video 146
Information in taste and smell 149
Conclusion 149

13 Information Retrieval for Technology 151
What is information's role in creating technology? 151
Information retrieval in past technologies 152
Information retrieval for technology today 154
Information retrieval for future technologies 157
Retrieving information about obsolescence 159
Conclusion 161

14 Information Curation **163**
What is information curation? 163
Pre-1800 curation 164
Curation: 1700 to the computer age 167
Digital curation 170
Conclusion 174

15 Information for Education **175**
What is information for education? 175
Education before 1700 176
Education at universities up to 1900 180
Technology research and education up to 1950 182
Technology education after 1950 184
Conclusion 186

16 Information and Politics **187**
What is the role of information in politics? 187
Pre-modern times 188
Information and politics since 1789 190
Fact checking and plagiarism 192
Book banning 193
Censorship 194
Medical information: COVID-19 195
Medical information: HIV 196
Climate information 197
Conclusion 199

Summary and Conclusion **201**
