CONTENT

GENERAL SAFETY PRINCIPLES 7

1. Welding license 7

1.1 Professional welding qualifications 7

1.2 Validity of welding license: 7

2. Conditions for starting to weld 8

3. Basic risks in welding 8

3.1 Electric shock 8

3.2 Ignition or spread of fire 9

3.3 Injury caused by the moving parts of equipment 10

3.4 Burns 10

3.5 Injury caused by metallic splashes and slag fragments 10

3.6 Welding aerosol 10

3.7 Harmful effects of radiation 11

3.8 Noise 11

3.9 Microclimatic conditions 11

4. Working with increased hazards (specific hazard) 12

4.1 Ordered to work with increased hazards 13

4.2 Welding with increased hazards in closed and tight spaces 13

4.3 Electric arc welding in wet, damp or hot conditions reducing the electrical resistance of protective equipment and human skin 14

4.4 Welding with increased hazards in or on contaminated vessels, pipes and equipment 17

4.5 Precautions for working in areas with the specific risk of fire or explosion 17

4.6 Welding on vessels, pipes and equipment that are pressurized or which contained flammable or combustible-inducing substances *(gas, diesel*, etc.) 18

4.7 Underwater welding 19

4.8 Welding in an environment with poor air 19

4.9 Welding with increased radiation hazard 19
4.10 Welding with increased noise hazard 19
5. Welding workplaces 19
5.1 Permanent welding workplaces 20
5.2 Temporary welding workplaces 20
5.3 Ventilating welding workplaces 21
5.4 Protection zones during welding 21
6. Pressure vessels 22
6.1 Transporting gas containers (cylinders) 22
6.2 Location of gas containers, cylinders 23
6.3 Handling gas containers, cylinders 24
6.4 Container storage 25
6.5 Gas distribution 26
Annex 1: Personal protective equipment for welding 27
SAFETY IN THE OXY-FUEL WELDING OF METALS 28
1. Gas vessels, cylinders 28
2. Acetylene generators 31
3. Flashback arrestor for acetylene systems 31
4. Cylinder valves 32
5. Pressure regulators 32
5.1 Connecting the pressure regulator to the cylinder 33
6. Gas hoses 34
6.1 connecting new hoses to the system 35
7. Welding (cutting) torch 35
7.1 Lighting the torch 36
7.2 Extinguishing the flame 36
7.3 Incorrect torch operation 36
8. Flame welder workplace 37
SAFETY IN METAL ARC WELDING 38
1. Welding equipment operation 38

1.1 Connecting welding equipment to electrical power supply 38
1.2 ***Visual inspection before welding (see ČSN EN 60974-4, 3rd ed.)*** **38**
2. *Welding current sources (see ČSN EN IEC 60974-1 6th ed.)* **. 39**
2.1 Overview of permitted values of rated no-load voltages.....40
2.2 Battery-powered welding current sources are powered either by 40
3. Welding conductors.....41
3.1 Requirements for welding conductors.....42
3.2 Welding circuit 42
3.3 Metal objects within reach of the welder 43
4. Torches / electrode holders 44
5. Workplaces with multiple welding sources 44
5.1 Using multiple welding sources for one weld.....45
6. Areas with increased risk of electric shock 46
7. Threat to the health of the welder from pollutants 48
8. Plasma welding.....48
SAFETY IN RESISTANCE WELDING OF METAL.....49
1. Risk analysis 49
2. Hazards during resistance welding.....49
2.1 Electrical shock 49
2.2 Accidents involving moving parts 50
2.3 Harmful health hazards.....51
3. Gas distribution, gas cylinders, accessories 51
Safety in manual laser welding.....52
1. Laws, standards and regulations 52
2. Laser Safety Officer (LSO).....54
2.1 Range of knowledge of the officer 54
2.2 Welder (operator).....55
2.3 Training requirements 55
3. Class 3B and Class 4 laser radiation hazards.....55
3.1 Class 3B.....55

3.2 Class 4 55
4. Hazards arising from laser operation 56
4.1 Fumes 56
4.2 Mechanical damage 56
4.3 Possibility of fire, explosion and heat damage 56
4.4 Damage to eyes or skin 56
5. Reducing the dangers arising from laser operation 56
5.1 Restricting access 56
5.2 General safety measures 57
5.3 Mirror reflection 58
5.4 Personal protection 58
5.5 Eye and face protection 58
5.6 Protective clothing 59
6. Nominal area of danger to the eye 60
PROVIDING FIRST AID 61
Procedure for placing patient in recovery position 63
FIRST AID FOR ELECTRIC SHOCK 64
1. Helping the victim 64
2. Providing first aid 65
3. Resuscitation 66
FIRST AID FOR BURNS 66
First aid 67
FIRST AID FOR EYE INJURIES 68
First aid 68
MEDICAL EXAMINATIONS FOR WELDERS 69
