Contents

1 Overview 1
References 5

2 Five Considerations for Studying Active Aging and Functioning 7
2.1 Inclusiveness 7
2.2 Participant Involvement 10
2.3 Open Data 10
2.4 Positive vs. Negative Indicators of Activity, Aging, and Health 12
2.5 Practical Issues 13
References 14

3 Aging and Health Research Designs and Central Concepts 17
3.1 Observational Studies 17
3.2 Randomized Controlled Trials (RCTs) 19
3.3 Basic Concepts in Active Aging and Health 20
References 26

4 Theoretical Approaches to Aging Research 27
4.1 Early Theories of Aging 28
4.2 Positive Gerontology 31
4.3 Positive Aging Models 31
4.4 Resilience 33
4.5 Adaptation in Old Age as the Foundation of Resilience 35
References 37

5 Active Aging 39
5.1 Development and Operationalization of the Concept of Active Aging 39
5.2 What Is Activity? 42
5.3 The Active Aging Index 43

5.4 Active Aging as Lived Experience 44
5.5 Developing The University of Jyväskylä Active Aging Scale (UJACAS) 45
References 48

6 Functional Capacity, Activities, and Participation 51
6.1 Basic and Instrumental Activities of Daily Living 53
6.2 Social Roles and Activities 54
6.3 Mobility 55
6.4 Models of Disability Development and Participation 58
6.5 Preclinical Functional Decline or Adaptive Behavioral Change? 65
6.6 Exhausting or Easy? 67
6.7 Autonomy in Mobility 68
6.8 Person-Environment Interaction Underlying Mobility 69
References 71

7 Promoting Engagement in Meaningful Activities 73
7.1 An Empirical Model of Active Aging 73
7.2 Personal Goals 75
7.3 Opportunity 77
7.4 Ability 78
7.5 Activity 79
7.6 Advancing Active Aging 80
7.7 COVID-19 Pandemic and Active Aging 82
References 84

8 Fostering Functional Capacity 85
8.1 Assessment of Physical Functioning 85
8.2 Changes in Physical Functioning 88
8.3 Using Disability Models to Understand Disablement 91
8.4 Co-impairments, Different Training Modalities, and Multicomponent Training 93
8.5 Promoting Functional Capacity 98
8.6 Promotional Actions for Physical Functioning 99
8.7 Prevention of Functional Decline 100
8.8 Rehabilitation 104
8.9 Compensation 105
References 108

9 Life Course Influences on Growing Old and Healthy Aging 111
9.1 Life Course Epidemiology of Healthy Aging 113
9.2 Methodological Considerations and Research Examples of Life Course Studies. 118
9.2.1 The Main Purpose of the Study Evolves 118
9.2.2 Attrition, Selective Mortality and Competing Risks in Longitudinal Studies About Growing Old 120
9.2.3 The Response Rates in Complex Health Studies Among Older People 122
9.3 Period and Cohort Effects on Healthy Aging. 124
9.3.1 Has the Functional Capacity and Health of Older Adults Improved or Declined?. 124
References. 126

10 Work as Active Aging 129
10.1 Participation in Work Force in Older Ages 130
10.2 Retirement 131
10.3 Work and Well-Being After Retirement. 133
10.4 Health Behaviors and Activities Around Retirement. 136
10.5 Work Exposures and Old Age Disability and Activity. 137
References. 141
