Content .....	3
Foreword .....	7
Summary .....	8
1 Introduction .....	10
2 Knowledge base .....	12
2.1 Basic terms used .....	13
2.2 Disaster management basis .....	15
3 Data used for research .....	33
4 Methods used in research .....	34
4.1 Specific questionnaire .....	34
4.2 Specific expert investigation .....	40
4.3 Method of scenario compilation .....	45
5 Results .....	47
5.1 Recommendation from in-depth investigation .....	47
5.2 Summary of research results .....	50
6 Critical review of results .....	52
7 Identification of open problems .....	55
7.1 Human lives and health .....	55
7.2 Human security .....	56
7.3 Property .....	56
7.4 Public welfare .....	57
7.5 Environment .....	58
7.6 Infrastructures and technologies .....	58
7.6.1 Energy sector .....	58
7.6.2 Water supply sector .....	61
7.6.3 Sewage sector .....	62
7.6.4 Transport sector .....	62
7.6.5 Cyber sector .....	64
7.6.6 Bank and finance sector .....	65
7.6.7 Emergency services sector .....	67
7.6.8 Essential services sector .....	68
7.6.9 Public organisation sector .....	69
7.7 Conclusion .....	70
8 Scenarios of possible EU development .....	71
8.1 Background for sustainability .....	71
8.2 Scenarios of the human system sustainable development .....	71
8.3 Some problems of sustainable development .....	74
9 Scenarios of research .....	76
10 Conclusion .....	78
References .....	81

Annex 1 .....	84
Results of research of natural disasters and natural disasters' management in the EU and detection of priority problems for future research in the EU .....	84
1 Introduction .....	84
2 Data and the method used in research .....	87
3 Results of research .....	88
4 Conclusion .....	98
References .....	99
Annex 2 .....	104
Results of research of processes by which the environment react to human activities and of induced disasters' management in the EU and detection of priority problems for future research in the EU .....	104
1 Introduction .....	104
2 Human system and environment .....	104
3 Data and research method used .....	106
4 Results of the survey .....	107
5 Conclusion .....	113
References .....	113
Annex 3 .....	115
Results of research of technological disasters and management of disasters connected with technologies and infrastructures .....	117
1 Introduction .....	115
2 The role of technologies and infrastructures in the human system and their problems .....	115
3 Analysis of the current status of monitoring of technological disasters in the EU as based on the legislation .....	116
4 Data and research method used .....	118
5 Results of investigation .....	118
6 Conclusion .....	123
References .....	124
Annex 4 .....	125
Results of research of social disasters and management of social disasters .....	125
1 Introduction .....	125
2 Security of the human society and disasters having cause in the human society .....	125
3 Impacts of disasters the causes of which are in social system .....	126
4 Data and methods .....	127
5 Survey results .....	127
6 Specification of the problems associated with the management of adverse effects in human society .....	133
7 Comparing the strategies for internal security in the European Union and the CR .....	135
8 Conclusion .....	135
References .....	136

Annex 5	140
Results of research of selected disasters and management of selected disasters	140
1 Introduction	140
2 Data a methods	141
3 The results of performed investigations	141
4 Conclusion	146
References	147
Annex 6	153
Results of research of open problems at social domain management	153
1 Introduction	153
2 Behaviour of a human and human society	153
3 Data and research method used	154
4 Results of the survey	154
5 Conclusion	161
References	162
Annex 7	164
Results of research of problems of protection of inhabitants of the EU	164
1 Introduction	164
2 Data and method of study	165
3 The results of reflection of experts on the problems of the EU population protection	165
4 Conclusion	166
References	166
Annex 8	167
Results of research of problems in bank sector in the EU in connection with civil protection	167
1 Introduction	167
2 The financial system	167
3 The banking sector	167
4 Impacts of failure of the banking and financial sector to public assets	169
5 Conditions for stability of a complex system	171
6 Results of theory of systems applied to the stability of the financial sector	172
7 Conclusion	172
References	173
Annex 9	174
Results of research of problems of supply chains in the EU in connection with civil protection	174
1 Introduction	174
2 Supply chain	174
3 Supply chain risks	176
4 Supply chain safety	178
5 Activities of the EU in domain of supply chains and their evaluation	179
6 Conclusion	180

References .....	180
Annex 10 .....	182
Results of research of selected disasters and their management with target to reveal gaps that must be removed for ensuring the human survival in the EU .	182
1 Introduction .....	182
2 The concept of tool for identifying, analysing, assessment and management of cross-cutting risks .....	185
3 The method of case study and “What, If” method .....	188
4 Disasters selected for research .....	189
5 Course of the actual data collection and processing .....	193
6 Overall evaluation of data from respondents .....	194
7 Conclusions .....	200
References .....	201
