LIST OF SIGNS AND SYMBOLS	5
I DEVELOPMENT OF ELECTRIC CURRENT SYSTEMS FOR ELECTRIC TRACTIONS	6
1.1 Development of the AC 15 kV, 16 $\frac{2}{3}$ Hz system.....	7
1.2 Development of the DC 1500 V system	7
1.3 Development of the DC 3000 V system	9
1.4 Development of the AC 25 kV, 50 Hz system.....	10
1.5 Characteristics of Electric current systems for Electric traction	10
1.6 Development of the AC 2 x 25 kV, 50 Hz system.....	11
1.7 Power supply systems in the Czech Republic	12
1.8 Power supply systems in the World.....	12
2 CZECH RAILWAYS POWER SUPPLY BY THE DC 3 KV SYSTEM 15	
2.1 The DC 3 kV system diagram	15
2.2 Power supply by the DC 3 kV system characteristics.....	15
2.3 Principles of power supply at railway station	17
3 TRACTION RECTIFIER SCHEME	23
3.1 Rectifier at the DC 3 kV system.....	23
3.2 Rectifier of the DC 650 V system	27
4 TRACTION RECTIFIER TRANSFORMER.....	30
4.1 Oil traction transformer	30
4.2 Dry-type traction transformer.....	31
5 SWITCHBOARD OF THE 3 KV TRACTION SUBSTATION.....	37
5.1 Power switch.....	37
5.2 Disconnecter	38
6 HIGH SPEED SWITCHES.....	41
6.1 High speed switches of the DC 3 kV system	41
6.2 Parts of high speed switch.....	43
6.3 Arcing chamber of the high speed switch	46
7 ALTERNATING CURRENT SWITCHES.....	58
7.1 Types of switches	58
7.2 Low oil switch	58
7.3 Air blast circuit breaker	59
7.4 Switch SF ₆	61
8 STATE OF FAILURUE AT THE SUBSTATION.....	64
8.1 Short-circuit at TL.....	64
8.2 BREAKDOWN ON the substation's ground	64
8.3 Protection against overvoltage.....	65
9 OVERHEAD SYSTEMS.....	71

9.1	Traction lines.....	71
9.2	Overhead lines types	71
9.1	Types of system	79
9.2	Material of particular parts of CL.....	83
9.3	Calculation of contact line conductors' warming.....	84
9.4	Test circuit.....	89
10	PROTECTIONS OF CONTACT LINE	95
10.1	Short-circuit current flow at the DC systems.....	95
10.2	Course of short-current circuit at AC system.....	97
11	TRACTION TRANSFORMER OF THE AC SYSTEM	105
11.1	Ac system scheme.....	105
11.2	Traction transformer.....	105
11.3	Derivation according to Le Blanca	112
12	VACUUM FEEDER SWITCH 25KV, 50 HZ	116
12.1	Construction of vacuum extinguisher	116
12.2	Basic requirements.....	117
13	POWER SUPPLY OF SIP, BSS AND OTHER NON-TRACTION CONSUMPTION	122
13.1	block signalling system.....	122
13.2	Station interlocking plant.....	122
13.3	switch heating.....	122
13.4	Basic quality criteria of electric energy consumption.....	124
14	CHARACTERISTICS OF FEEDING TNS NETWORKS.....	125
14.1	Calculation of two-phase short-circuit power and primary impedance of the 110 kV network	125
	SOURCE OF FIGURES AND IMAGES	129
	LIST OF ABBREVIATIONS.....	131
