

Abstract

1	GENERATION AND DISTRIBUTION OF ELECTRIC POWER.....	7
1.1	Production of electric power	8
1.2	Management of power system	9
1.3	Distribution networks.....	9
2	CZECH REPUBLIC TRACTION SYSTEM CHARACTERISTICS.....	11
2.1	DC traction power system.....	11
2.2	AC traction power system.....	12
2.2.1	Filter-compensation device	13
3	COMPONENTS OF TRACTION POWER CONSUMPTION.....	15
3.1	Active traction power determination methods	15
3.1.1	Method using averaged values of specific consumptions	16
3.1.2	Method using electricity meters in propelling vehicles.....	17
4	ENERGY INTENSITY CALCULATION.....	24
4.1	Energetic calculation according to specified TTD	24
4.1.1	Rolling resistances	25
4.2	Specific electric power consumption.....	30
4.3	Examples.....	33
4.3.1	Calculation of traction electric power consumption.....	33
4.3.2	Estimation of electric power consumption during shunting on railway siding.....	35
5	WORK AND POWER DURING RECOVERY.....	40
5.1	Numerical analysis.....	41
5.2	Estimation of regenerative energy, regenerative power	43
5.3	Examples.....	45
5.3.1	Calculation of regenerative power and regenerative energy I.....	45
5.3.2	Calculation of regenerative power and regenerative energy II.....	46
5.3.3	Calculation of regenerative power and regenerative energy III.....	46
6	OPERATIONAL IMPACTS ON SPECIFIC ELECTRIC POWER CONSUMPTION.....	48
6.1	Factors affecting specific electric power consumption.....	48
6.2	The influence of weight and driving velocity on specific electric power ... consumption	49
6.3	Influence of traffic management organization on specific electric power .. consumption	50
6.4	Examples.....	52
6.4.1	Calculation of kinetic energy and train braking distance.....	52
7	VOLTAGE RATIOS IN TRACTION POWER SUPPLY SYSTEM.....	55
7.1	Distribution of currents in traction power systems	55
7.2	Voltage in overhead lines.....	56
7.3	Calculation of voltage drops in overhead lines	56

7.3.1	Calculation of 3 kV DC system voltage drops	56
7.3.2	Calculation of 25 kV, 50 Hz AC system voltage drops.....	59
7.4	Examples	60
7.4.1	One propelling vehicle on a supplied section of single-track.....	60
7.4.2	Two propelling vehicles on a supplied section of single-track.....	61
7.4.3	Implementation of optional parameter of traction circuit specific resistance	62
7.4.4	Effect of double-track overhead line cross connection placed halfway	62
	converter stations	62
7.4.5	Short circuit in monorail overhead line with cross connection amidst.....	64
7.4.6	A drive of two propelling vehicles with constant relative position	65
8	SHORT CIRCUIT RATIOS IN SUPPLY SYSTEM	67
8.1	Origin of short-circuits.....	67
8.2	Short-circuits in DC systems.....	68
8.3	Short-circuits in AC system.....	69
9	OVERHEAD LINE HEATING UP.....	72
9.1	Calculation of DC system overhead line conductors warming.....	73
9.2	Examples	76
9.2.1	Calculation of warming time constant.....	76
9.2.2	Calculation of current and heating up ratios in overhead line.....	76
10	POWER LOSSES IN SUPPLY SYSTEM	83
10.1	3 kV DC system losses.....	83
10.2	25 kV, 50 Hz AC system losses	86
11	CALCULATION OF POWER LOSSES	91
11.1	Calculation input assumptions.....	91
11.2	Calculation process derivation.....	92
11.3	Calculation for 3 kV DC system with bilateral supply.....	93
11.4	Example.....	94
11.5	Calculation for 25 kV, 50 Hz AC system with unilateral supply	97
12	PERMEABILITY OF ELECTRIC RAILWAYS.....	100
12.1	Transport efficiency and headway on electrified railways limited by supply	100
	system	100
12.2	3 kV DC system in terms of subsequent interim period.....	101
12.2.1	Voltage drop in traction current distribution.....	101
12.2.2	Maximum and protective short-circuit current in the feeder.....	104
12.2.3	Warming and current load of OHL	105
12.2.4	Supply station efficiency	106
12.3	Example.....	107
12.3.1	Calculation of the shortest headway with respect to their weight and supply method for 3 kV DC system	107
12.4	25 kV, 50 Hz AC system in terms of subsequent interim period	109
12.5	Example.....	110
12.5.1	Calculation of the shortest headway with respect to the weight of trains for traction 25 kV, 50 Hz AC system	110

13	LIST OF ACRONYMS.....	112
14	LIST OF PICTURES	113
15	LIST OF TABLES	114
16	ANNEXES	115
16.1	Map of power sources in the Czech republic	115
16.2	Map of solar power stations in the Czech republic	116
16.3	Map of wind power stations in the Czech republic	117
16.4	Map of hydroelectric power stations in the Czech republic	118
16.5	Electrification network in the Czech republic.....	119
16.6	Traction system in the Czech republic	120
16.7	Selected electric propelling vehicles in the Czech republic	121
16.7.1	Electric locomotive class 110 (E 458.0)	121
16.7.2	Electric locomotive class 121 (E 469.1)	122
16.7.3	Electric locomotive class 150 (E 499.2)	123
16.7.4	Electric locomotive class 210 (S 458.0).....	124
16.7.5	Electric locomotive class 230 (S 489.0).....	125
16.7.6	Electric locomotive class 242 (S 499.02)	126
16.7.7	Electric locomotive class 363 (ES 499.1)	127
16.7.8	Electric locomotive class 350 (ES 499.0)	128
16.7.9	Electric locomotive class 372 (ES 499.2)	129
