

CONTENTS

Plenary

Advances in quantum cryptography <i>Dušek M., Lütkenhaus N.</i>	1
How optics has changed data communications <i>Glesk I., Prucnal P.R.</i>	2
Surface plasmon resonance biosensors <i>Homola J.</i>	3
Active sol-gel materials <i>Jasiorski M.</i>	4
Applications of digital holography <i>Jozwicki R., Jueptner W.</i>	5
Optics of nanogratings <i>Postava K., Foldyna M., Ossikovski R., Novikova T., De Martino A., Pištora J.</i>	6
Photorefractive effect in LiNbO_3 <i>Turek I., Tarjanyi N., Dubravka M.</i>	7
Cavity ring down and vacuum UV spectroscopy and their applications for radical absolute density measurements in plasma <i>Veis P., Macko P., Jašík J.</i>	9
Quantum information processing with down-conversion sources <i>Wasilewski W., Kolenderski P., Dragan A., Wasylczyk P., Banaszek K., Lvovsky A., Radzewicz C.</i>	11
How to use laser radiative and evanescent interference fields to control movement of the sub-micron objects <i>Zemánek P., Čížmár T., Siler M., Garces-Chavez V., Dholakia K.</i>	12

Oral

Proposal of the 1 m laser interferometer modification in the Slovak Institute of Metrology <i>Bartl J., Fíra R.</i>	13
Experimental realization of the encoding of two qubits to one qutrit <i>Bartůšková L., Černocho A., Soubustal J., Fíurášek M., Filip R., Dušek M.</i>	15
Reconstruction of the wave tilt and orientation of tilt axis using OVI <i>Borwińska M., Popiolek – Masajada A., Dubik B.</i>	16
Orbital angular momentum of composite vortex beams <i>Bouchal Z., Zemánek P., Čížmár T.</i>	17
Increasing the data density of the information transfer using optical vortices <i>Čelechovský R., Bouchal Z.</i>	18
Several experimental implementations of phase covariant quantum cloner <i>Černocho A., Bartůšková L., Soubusta J., Fíurášek J., Dušek M.</i>	19
Precise tracking of spherical particles in spatially periodical illumination fields <i>Čížmár T., Zemánek P.</i>	20
Surface plasmon resonance sensor platform based on an array of diffraction gratings for high-throughput analysis of biomolecular analytes <i>Dostálek J., Homola J., Miler M.</i>	21
Education kits for fiber optics, optoelectronics and optical communications <i>Hájek M., Švrček M.</i>	23
The spatial distribution of the mode generated by the parametric fluorescence <i>Hamar M., Haderka O., Peřina Jr. J.</i>	24
Coherent-state information concentration and purification in atomic memory <i>Herec J., Filip R.</i>	25
Dispersive white-light spectral interferometry used to measure thickness of a thin film on a substrate <i>Hlubina P., Ciprian D., Luňáček J., Lesňák M., Chlebus R.</i>	26
Small area curvature measurement <i>Hošek J.</i>	27

Axial diffraction patterns in the vicinity of the focus of the off-axis holographic diffractive collimator <i>Hradil M., Miler M., Pala J.</i>	28
Dispersion measurements of anisotropic materials and a new fiber-optic sensor configuration <i>Chlebus R., Hlubina P., Ciprian D.</i>	29
Some optical properties of metal in non-local potential theory <i>Chrzanowski J.</i>	30
Manufacturing of extremely narrow polymer fibers by non-diffracting beams <i>Ježek J., Čižmár T., Zemánek P.</i>	31
What is it optical binding and how to study this phenomena? <i>Karásek V., Zemánek P.</i>	32
Investigations of the relations between the dust granularity and pollution concentration <i>Kirkiewicz J.</i>	33
Utilization of astigmatic elliptical laser beams for optical trapping experiments <i>Kollárová V., Bouchal Z., Zemánek P., Čižmár T.</i>	34
In vitro dynamic observations in low-coherence holographic microscope <i>Kolman P., Janečková H., Chmelík R., Veselý P., Lovicar L., Foret Z.</i>	35
Adaptively controlled supercontinuum generation in a microstructure fiber <i>Lorenc D., Velic D., Markevitch A.N., Levis R.J.</i>	37
Some factors which affect the surface measurement accuracy of low-coherence interference microscopy <i>Lovicar L., Chmelík R., Komrska J., Kolman P., Foret Z.</i>	38
The optical vortex interferometry in 2006 AD <i>Masajada J.</i>	40
Influence of image doubling on modulation transfer function of optical systems <i>Melich R., Melich Z.</i>	41
Application of Shack-Hartmann wave-front sensor for testing optical systems <i>Novák J., Mikš A., Novák P.</i>	42

Chamber with controlled atmosphere for fluorescence measurements in the project AIRFLY <i>Nožka L., Vacek V., Doubrava M., Hrabovský M., Řídký J., Schovánek P., Palatka M., Boháčová M., Pech M., Mandát D.</i>	44
Optical gain in planar waveguides <i>Ostatnický T., Valenta J., Pelant I.</i>	46
Aberrations of holographic collimator recorded onto spherical substrate <i>Pala J., Miler M., Hradil M.</i>	48
Spatial coherence profilometry <i>Pavlíček P., Hýbl O.</i>	49
Nonlinear photonic-band-gap structures as a source of entangled two-photon states <i>Peřina, Jr. J., Centini M., Sibilica C., Bertolotti M., Scalora M.</i>	50
Characteristic matrix of anisotropic coupling gap <i>Pištorá J., Vlček J., Antoš R., Yamaguchi T., Postava K.</i>	52
Parallel plate testing by the Optical Vortex Interferometer <i>Popiołek-Masajada A., Dubik B.</i>	54
Two generation modes of a laser diode module <i>Senderáková D., Štrba A., Mesároš V.</i>	55
Characteristics of the image projection of the eye optical system with refractive and hybrid IOL <i>Siedlecki D., Zajac M., Nowak J.</i>	57
Experimental investigations of polarizing photonic crystal fibers for different operation ranges <i>Statkiewicz G., Martynkien T., Urbanczyk W., Wojcik J., Makara M., Mergo P.</i>	58
Compact laser tweezers <i>Šerý M., Jákl P., Zemánek P.</i>	59
Intermodal interference in photonic crystal optical fibres <i>Turek I., Kacik D., Martinec I., Canning J., Issa N.</i>	60

Poster

New three-dimensional configuration of multidirectional phase thomograph <i>Antoš M.</i>	62
Avalanche photodiode as two photon correlation detector <i>Blažej J.</i>	63
Dispersion measurements of a birefringent holey fiber using white-light spectral interferometry <i>Ciprian D., Hlubina P., Trojková J.</i>	64
Management of birefringence dispersion in photonic crystal fibers by combining geometrical and stress effects <i>Golojuch G., Martynkien T., Urbanczyk W.</i>	65
Primary length standard adjustment <i>Guttenová J., Ševčík R.</i>	66
Alumina laser welding optimization <i>Chmelíčková H., Halenka V., Lapšanská H., Havelková M.</i>	68
Moiré deflectometry used for refractive index measurements <i>Keprt J., Bartoněk L.</i>	70
Nephelometry and light diffraction comparative measurements of water turbidity <i>Kirkiewicz J., Bieg B., Mrozek-Lejman J., Pawlak B., Pikula R., Treichel P., Miklaszewicz B.</i>	72
The estimation of suspension concentration in the Odra River waters by LALLS method <i>Kirkiewicz J., Treichel P., Bieg B., Mrozek-Lejman J., Pawlak B., Staroň W.</i>	73
Novell approach to the solution of optical fibre dispersion effects <i>Kyselák M.</i>	74
The optimalization of the high-speed optical networks <i>Kyselák M.</i>	75
Validation of 3D profilometry using total knee arthroplasty samples <i>Mandát D., Rössler T., Hrabovský M., Pochmon M., Gallo J.</i>	77

Workplace for manufacturing devices based on optical fiber tapers <i>Martan T., Novotný K., Kaňka J., Honzátko P.</i>	78
Holograms on plates SLAVICH PFG-03C and PFG-03M and their diffraction efficiency <i>Medřík T., Kvapil J.</i>	80
Influence of small deformation of optical element surfaces on optical system imaging quality <i>Melich Z., Melich R.</i>	81
Distorsion of ultrashort light pulses in optical systems <i>Mikš A., Novák J.</i>	82
Chromatic aberration coefficients <i>Mikš A., Novák J., Novák P.</i>	83
Theory of chromatic sensor for topography measurements <i>Mikš A., Novák J., Novák P.</i>	85
Human factor as an important phenomenon for the optical radar station operation <i>Novotný A., Blažej J.</i>	87
The estimation of suspension concentration in natural waters by means <i>Pawlak B., Kirkiewicz J., Mrozek-Lejman J., Gąsowski R., Staroń W., Miklaszewicz B.</i>	88
Shape measurement method of concave mirrors <i>Pech M., Hrabovský M., Schovánek P., Mandát D., Nožka L.</i>	89
Preparation of bismuth-doped yttrium iron garnets and their characterization <i>Pigošová J., Kiliánová A., Vojtek P., Kopčok M., Cigáň A.</i>	90
Verification of abrasion measurement of juncture implants using Fourier profilometry <i>Pochmon M., Rössler T., Mandát D., Gallo J., Hrabovský M.</i>	91
Calibration of profilometric and topographic methods using the measurement of the prism standard <i>Rössler T., Pochmon M., Mandát D., Hrabovský M.</i>	92
Retinal images in the human eye with implanted intraocular lens <i>Siedlecki D., Zajac M., Nowak J.</i>	93

Optical analysis of suspended particles in the cerebrospinal fluid from the patients diagnosed due to suspicion of normotensive hydrocephalus <i>Staroň W., Herbowski L.</i>	94
Vision screening of school children <i>Zajac M.</i>	95
Imaging Reflectometry - a new approach for areal in situ investigation of the optical parameters of weakly absorbing thin films <i>Spousta J., Urbánek M., Chmelík R., Běhounek T., Plšek R., Navrátil K., Šikola T.</i>	96
