

# CONTENTS

|   |     |
|---|-----|
| <b>Preface</b>  | 3   |
| <b>Introduction</b>   | 4   |
| <b>1. Characteristics and Requirements of Small Arms</b>        | 6   |
| 1.1 Principles and Classification of Small Arms                 | 6   |
| 1.2 Requirements and Assessment of Weapon Combat Qualities      | 11  |
| <b>2. Recoil, Operation Cycle and Weapon Main Parts</b>         | 23  |
| 2.1 Forces in Firing Interval and its Impulse                   | 23  |
| 2.2 Operation Cycle   | 31  |
| 2.3 Weapon Main Parts and Mechanisms                            | 37  |
| 2.4 Analyses of Functional Mechanisms                           | 40  |
| <b>3. Types, Properties and Development Tendencies</b>          | 49  |
| 3.1 Revolvers and Pistols                                       | 49  |
| 3.2 Submachine Guns   | 51  |
| 3.3 Bolt action and Self-Loading Rifles                         | 52  |
| 3.4 Automatic Rifles, Infantry and General Purpose Machine Guns | 53  |
| 3.5 Heavy Machine Guns  | 59  |
| 3.6 Small Caliber Cannons                                       | 60  |
| 3.7 Military and Police Grenade Launchers                       | 62  |
| 3.8 Military and Police Shot Guns                               | 64  |
| 3.9 Shoulder Launched Antitank and Antiaircraft Weapons         | 65  |
| 3.10 Development Tendencies of Small Arms                       | 69  |
| <b>4. Barrels</b>   | 76  |
| 4.1 Scope, Purpose and Types of Barrels                         | 76  |
| 4.2 Load on the Barrel During Firing                            | 78  |
| 4.3 Projectile Effect   | 81  |
| 4.4 Chamber Requirements, Groove Profile and Rifling            | 83  |
| 4.5 Determination of Barrel Wall Thickness                      | 86  |
| 4.6 Heat Transfer and Thermal Stresses in the Barrel            | 90  |
| 4.7 Barrel Attachments  | 93  |
| <b>5. Breech Systems</b>  | 97  |
| 5.1 Single Shot and Bolt-Action Breeches                        | 97  |
| 5.2 Breeches of Automatic Weapons                               | 101 |
| 5.3 Breech Closures   | 109 |
| 5.4 Breech Control Mechanisms                                   | 119 |
| 5.5 Accelerators of Breeches                                    | 120 |
| 5.6 Rebound Hindrances of Breeches                              | 124 |

|   |     |
|---|-----|
| <b>6. Drive of Weapon Mechanism</b>                         | 128 |
| 6.1 Blow-back Weapons                                       | 131 |
| 6.2 Recoil-operated Weapons                                 | 132 |
| 6.3 Gas-operated Weapons                                    | 135 |
| 6.4 Combined Internal Drive                                 | 140 |
| 6.5 External Drive  | 141 |
| <b>7. High Rate of Fire Principles of Automatic Weapons</b> | 143 |
| 7.1 Revolver Principle                                      | 144 |
| 7.2 Gatling Principle                                       | 146 |
| 7.3 Principle with Together Bound Barrels and Breeches      | 148 |
| 7.4 Open Cartridge Chamber Principle (Dardick System)       | 150 |
| <b>8. Cartridge Feed</b>                                    | 152 |
| 8.1 Magazine Feed   | 152 |
| 8.2 Belt Feed   | 157 |
| 8.3 Conveyer Feed   | 165 |
| <b>9. Firing, Trigger and Safety Mechanisms</b>             | 166 |
| 9.1 Firing Mechanisms of the Weapons                        | 166 |
| 9.2 Trigger Mechanisms of the Weapons                       | 170 |
| 9.3 Safety Mechanisms and Additional Arrangement            | 175 |
| <b>10. Auxiliary Mechanisms and Devices</b>                 | 178 |
| 10.1 Extractors   | 178 |
| 10.2 Ejectors   | 180 |
| 10.3 Ramming Devices  | 183 |
| 10.4 Weapon Springs   | 184 |
| 10.5 Bolt Holding Devices                                   | 189 |
| 10.6 Cocking of the Weapon                                  | 191 |
| <b>Appendices</b>   |     |
| Appendix 1. Selected Small Arms and their Characteristics   | 195 |
| Appendix 2. Glossary  | 201 |
| <b>References</b>   | 203 |
