
Contents

Preface.....	vii
Editors	ix
Contributors	xi

Chapter 1	Distributed Programming for the Cloud: Models, Challenges, and Analytics Engines.....	1
------------------	---	---

Mohammad Hammoud and Majd F. Sakr

Chapter 2	MapReduce Family of Large-Scale Data-Processing Systems.....	39
------------------	--	----

Sherif Sakr, Anna Liu, and Ayman G. Fayoumi

Chapter 3	iMapReduce: Extending MapReduce for Iterative Processing	107
------------------	--	-----

Yanfeng Zhang, Qixin Gao, Lixin Gao, and Cuirong Wang

Chapter 4	Incremental MapReduce Computations	127
------------------	--	-----

Pramod Bhatotia, Alexander Wieder, Umut A. Acar, and Rodrigo Rodrigues

Chapter 5	Large-Scale RDF Processing with MapReduce.....	151
------------------	--	-----

Alexander Schätzle, Martin Przyjaciół-Zablocki, Thomas Hornung, and Georg Lausen

Chapter 6	Algebraic Optimization of RDF Graph Pattern Queries on MapReduce.....	183
------------------	---	-----

Kemafor Anyanwu, Padmashree Ravindra, and HyeongSik Kim

Chapter 7	Network Performance Aware Graph Partitioning for Large Graph Processing Systems in the Cloud	229
------------------	--	-----

Rishan Chen, Xuétian Weng, Bingsheng He, Byron Choi, and Mao Yang

Chapter 8	PEGASUS: A System for Large-Scale Graph Processing	255
------------------	--	-----

Charalampos E. Tsourakakis

Chapter 9	An Overview of the NoSQL World.....	287
------------------	-------------------------------------	-----

Liang Zhao, Sherif Sakr, and Anna Liu

Chapter 10	Consistency Management in Cloud Storage Systems	325
	<i>Houssein-Eddine Chihoub, Shadi Ibrahim, Gabriel Antoniu, and Maria S. Perez</i>	
Chapter 11	CloudDB AutoAdmin: A Consumer-Centric Framework for SLA Management of Virtualized Database Servers	357
	<i>Sherif Sakr, Liang Zhao, and Anna Liu</i>	
Chapter 12	An Overview of Large-Scale Stream Processing Engines.....	389
	<i>Radwa Elshawy and Sherif Sakr</i>	
Chapter 13	Advanced Algorithms for Efficient Approximate Duplicate Detection in Data Streams Using Bloom Filters	409
	<i>Sourav Dutta and Ankur Narang</i>	
Chapter 14	Large-Scale Network Traffic Analysis for Estimating the Size of IP Addresses and Detecting Traffic Anomalies.....	435
	<i>Ahmed Metwally, Fabio Soldo, Matt Paduano, and Meenal Chhabra</i>	
Chapter 15	Recommending Environmental Big Data Using Semantically Guided Machine Learning	463
	<i>Ritaban Dutta, Ahsan Morshed, and Jagannath Aryal</i>	
Chapter 16	Virtualizing Resources for the Cloud	495
	<i>Mohammad Hammoud and Majd F. Sakr</i>	
Chapter 17	Toward Optimal Resource Provisioning for Economical and Green MapReduce Computing in the Cloud	535
	<i>Keke Chen, Shumin Guo, James Powers, and Fengguang Tian</i>	
Chapter 18	Performance Analysis for Large IaaS Clouds	557
	<i>Rahul Ghosh, Francesco Longo, and Kishor S. Trivedi</i>	
Chapter 19	Security in Big Data and Cloud Computing: Challenges, Solutions, and Open Problems	579
	<i>Ragib Hasan</i>	
Index		595
