## **Part I Optimization of Environmental Protection Costs**

<b>1. The concept of environment, its protection and basic economic context .....</b>	<b>1</b>
1.1 Environment and its factors .....	1
1.2 Protection of the environment and nature as a problem of economic analysis .....	4
1.3 General concept of costs and expenditures on protection of the environment .....	7
1.4 Concept of gross and net control costs .....	10
1.5 Basic concepts of optimum and the effectiveness of environmental protection costs .....	12
1.6 Natural goods and property rights .....	15
<b>2. Costs and expenditures on environmental protection at the level of the national economy .....</b>	<b>18</b>
2.1 The concept of costs and expenditures on environmental protection at the level of the national economy .....	19
2.2 Theoretical optimization concepts on the macro level in relation to the environment .....	23
2.3 Practical optimization concepts at the macro level in relation to the environment .....	30
<b>3. Costs and expenditures on environmental protection in the area of public administration .....</b>	<b>37</b>
3.1 Allocation of public financial resources of environmental protection .....	37
3.2 Other roles of public administration institutions in the environmental protection costs optimization .....	46
3.3 Ecologicalization of purchasing and investment behavior of state institutions .....	57
<b>4. Costs of environmental protection and their optimum at the firm's level .....</b>	<b>66</b>
4.1 The costs of environmental protection from the microeconomic point of view .....	66
4.2 Investment decision making of a company .....	84

4.3 Further aspects of the introduction of environmental technologies in companies .....	94
4.4 Inclusion of environmental aspects of the widened evaluation of effectiveness of projects in a company .....	105
<b>5. Costs of environmental protection and consumers, households and non-governmental non-profit organizations .....</b>	<b>115</b>
5.1 The influence of customers and households on the environment .....	115
5.2 Understanding the costs of environmental protection at the customer or household level .....	116
5.3 Consumer reasons to spend sources on environmental protection ....	118
5.4 The role of non-governmental non-profit organizations in decision-making about costs of environmental protection .....	122
<b>6. The solution diagram for the new problems in environmental protection .....</b>	<b>126</b>
6.1 General diagram of circumstances involving public interventions ...	127
6.2 Specification of the steps under circumstances involving interventions by public institutions .....	129
6.3 Private solutions to the problem .....	135
6.4 Specification of the steps under circumstances of a private solution to the problem .....	138
 <b>Part II Optimization of the Nature Protection Costs: Case Studies</b>	
<b>7. Třeboňsko – Protected Landscape Area and Natura 2000 Case Study .....</b>	<b>145</b>
7.1 Natural social characteristics of the observed landscape .....	145
7.2 Analysis of institutional factors and coherence in the region .....	150
7.3 Proposals and recommendations .....	169
<b>8. Jizerské Hory Mountains Case Study .....</b>	<b>183</b>
8.1 Naturally social characteristics of the researched area .....	184
8.2 Analysis of institutional factors and coherence in the region .....	200
8.3 Suggestions and recommendations .....	216
<b>Conclusion .....</b>	<b>232</b>
<b>Literature .....</b>	<b>235</b>
<b>About the Authors .....</b>	<b>248</b>
