

TABLE OF CONTENTS

1. Introduction.....	5
2. Epoxy resins and hardeners	5
3. Modification of epoxy resins	7
3.1. Modification with particulate fillers.....	7
3.2. Epoxy modifications with liquid rubbers.....	9
3.3. Modification with thermoplastics.....	13
3.4. Toughening with other polymeric modifiers.....	14
3.5. Epoxy resin nanocomposites.....	16
3.6. Modification of epoxy resins by the formation of organic-inorganic hybrids.....	19
4. Work carried out by the author in the field of epoxy resin modifications.....	20
Paper A1: Toughening of Epoxy Resin Using Hydroxyl-Terminated polyesters.....	20
Paper A2: Toughening of epoxy resin using synthesized polyurethane prepolymer based on hydroxyl-terminated polyesters ...	23
Paper A3: Modification of epoxy resin with kaolin as toughening agent.....	25
Paper A4: Modification of epoxy resin using reactive liquid (ATBN) rubber	27
Paper A5: Effect of kaolin and polyurethane on the fracture and thermal properties of epoxy based compositions.....	30
Paper A6: Effect of reactive diluent on the rheological and mechanical properties of epoxy resin.....	31
Paper A7: Properties of epoxy based hybrid composites.....	33
Paper A8: Mechanical properties of epoxy resin modified with polycarbonate and reactive polybutadiene.....	34
Paper A9: Property enhancement of epoxy resins by using a combination of polyamide and montmorillonite.....	36
5. Concluding remarks.....	37
6. Literature.....	39
7. Curriculum vitae.....	43
8. List of publications.....	45
9. Articles discussed in the present work.....	48
