

CONTENTS

Introduction	1
Barbora Arendacká	3
Classifiers for data with NaNs: application to breath-gas analysis	
Marek Brabec	13
Dynamic model for estimation of radon input	
Ladislav Budík, Marie Budíková	25
Modelling of Annual Maximum Day Precipitation by Three-parametric Lognormal Distribution with Further Transformation	
Petr Bureš	41
Dose response curves data processing	
Eva Fišerová	49
Singularities in measurements in traverse	
Pavel Flák	57
Multivariate Statistical Methods in Genetics of Populations	
Marie Forbelská	77
Extensions of Bi-normal ROC Analysis to Bi-ECD case	
Tomáš Hudík	95
The Recognizing of Leukemic Patients by The Machine Learning Methods	
Jan Kalina	99
Robust Methods for Template Matching	
Zdeněk Karpíšek, Petr Jurák, Jakub Šácha	109
Divergences for Discrete Probability Distribution Estimations	
Jiří Knížek, Zdeněk Půlpán, Martin Hubálek, Ladislav Beránek, Petr Pokorný	121
Stochastic Model of Mass Spectrum Random Disturbances and its Simulation	
Jan Kolářek	141
Boundary effects for densities and distribution functions	

Lucie Komolíková, Adam Svobodník, Ondřej Májek, Jan Daneš, Miroslava Skovajsová, Helena Bartoňková Stochastic models for the evaluation of cancer screening programmes	149
Lubomír Kubáček Growth Curve Models with Different Structures of Covariance Matrices	155
Pavla Kunderová On certain classes of parametric functions in linear models with constraints	171
Jiří létal Modelling of longitudinal studies by SAS	181
Jaroslav Marek, Roman Pawiński Statistical problems of 3D measurement of buildings	189
Ivo Moll, Kateřina Myšková Calibration of identical objects	195
Kateřina Myšková Parameter estimators in a multidimensional calibration model	203
Jiří Neubauer Cointegrated Processes and Change Point Identification	209
Pavel Nový, František Vávra, Jiří Pešta, Patrice Marek Parameter Identification from Phoniatrial Examinations	221
Pavel Rajmic Method of Forward Segmented Wavelet Transform	235
Hana Skalská Software for ROC and AUC Analysis	245
Jaromír Tonner The Principle of Overcompleteness in VARMA Models	253
František Vávra, Pavel Nový, Martina Neumanová, Kateřina Vokáčová Estimations Based on Cross-Entropy	257
Vítězslav Veselý Searching sparse solutions from overcomplete models: selected applications	263
Robert Vích, Martin Vondra Voice Conversion	281
