|--------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------|----|
| 1      | Introduction                                                                                                                                                       | 7  |
| 2      | Strategic and conceptual solutions                                                                                                                                 | 8  |
| 2.1    | Determination of values of real potentials of forest functions                                                                                                     | 12 |
| 2.2    | Determination of values of real effects of forest functions                                                                                                        | 13 |
| 2.3    | Using the objectification and quantification of forest functions                                                                                                   | 14 |
| 3      | General methodical procedures                                                                                                                                      | 15 |
| 3.1    | Methodical steps                                                                                                                                                   | 15 |
| 3.1.1  | Verification of the condition of the defined unit of a forest ecosystem (FEU) – input evaluation:                                                                  | 15 |
| 3.1.2  | Determination of the real potential of functions ( $RP_n$ )                                                                                                        | 15 |
| 3.1.3  | Determination of the real (actual) effect of functions ( $RE_n$ )                                                                                                  | 18 |
| 3.1.4  | Calculation of real effects of particular functions in FEU                                                                                                         | 21 |
| 4      | Exposition No. 1                                                                                                                                                   | 24 |
| 4.1    | Evaluation of differences in functional effects of mature broadleaved stands in the stage before regeneration or during its course and of young forest plantations | 24 |
| 4.1.1  | Part of a stand 367 A13.                                                                                                                                           | 24 |
| 4.1.2  | Stand part 369 A1                                                                                                                                                  | 26 |
| 4.1.3  | Stand part 369 A3                                                                                                                                                  | 28 |
| 4.1.4  | Stand part 369 A6                                                                                                                                                  | 30 |
| 4.1.5  | Stand part 369 C2                                                                                                                                                  | 32 |
| 4.1.6  | Stand part 369 C13                                                                                                                                                 | 34 |
| 4.1.7  | Stand part 373 C1d                                                                                                                                                 | 36 |
| 4.1.8  | Stand part 373 D0                                                                                                                                                  | 38 |
| 4.1.9  | Stand part 373 D1b                                                                                                                                                 | 40 |
| 4.1.10 | Stand part 373 D3                                                                                                                                                  | 42 |
| 4.1.11 | Stand part 373 D12                                                                                                                                                 | 44 |
| 4.2    | Summary                                                                                                                                                            | 46 |
| 5      | Exposition No. 2                                                                                                                                                   | 48 |
| 5.1    | Classification of actual functional effects of maturing, pre-mature and mature stands                                                                              | 48 |
| 5.1.1  | Stand part 365 A8                                                                                                                                                  | 48 |
| 5.1.2  | Stand part 370 E15/8                                                                                                                                               | 50 |
| 5.2    | Summary                                                                                                                                                            | 51 |
| 6      | Exposition No. 3                                                                                                                                                   | 52 |
| 6.1    | Evaluation of the difference of actual functional effects of young coniferous and mixed stands and stands exceeding the rotation period                            | 52 |
| 6.1.1  | Stand part 362 C1d                                                                                                                                                 | 52 |
