

# CONTENTS

## I. Modeling of Electric Devices

DI BARBA Paolo, WIAK Sławomir, CHERECHES Robert 1-1 / 13  
Non-linear Inverse Problems and Optimal Design of MEMS

DULAR Patrick, KRÄHENBÜHL Laurent, GEUZAINÉ Christophe 1-3 / 15  
Progressive Inductor Modeling Via a Finite Element Subproblem Method

## II. Problems of Electric Machines and Drives

KAMINSKI Marcin 11-1 / 17  
Adaptation of the Luenberger Observer Parameters Using On-Line Trained Neural Network

DERUGO Piotr, SZABAT Krzysztof 11-3 / 19  
Adaptive Neuro-Fuzzy PID Controller for Drive System with Friction and Backlash

MIKOLAJEWICZ Jacek 11-5 / 21  
An Analysis of a Portable Insulin Pump's Drive System

LIU Sijun, CLÉNET Stéphane, COOREVITS Thierry, MIPO Jean 11-7 / 23  
Analysis of Rotor Eccentricity on the Behaviour of a Claw-Pole Generator

EYSKAWIŃSKI Wiesław, IDZIAK Paweł, BARANSKI Mariusz, SZELAĞ Wojciech 11-9 / 25  
Analysis of a Power Parameters of the Squirrel Cage Motor and LSPMSM with U-Shaped Magnets Rotor

BARANSKI Mariusz, JEDRYCZKA Cezary 11-11 / 27  
Analysis of the Line Start Permanent Magnet Synchronous Motor Performance Under Different Values of the Supply Voltage

GWOZDZIEWICZ Maciej, ZAWILAK Jan 11-13 / 29  
Braking Torque in Single Phase Line Start Permanent Magnet Synchronous Motors

BURLIKOWSKI Wojciech, KOWALIK Zygmunt 11-15 / 31  
Development of a Topology-Based Current-Flux Characteristic Approximation in a Hamiltonian Model of a Reluctance Machine

SAKHNO Ludmila, SAKHNO O., DUBITSKY Simon 11-17 / 33  
Field-Circuit Modelling of an Advanced Welding Transformer with Two Parallel Rectifiers

BERNAT Jakub, STEPIEN Sławomir, STRANZ Artur 11-19 / 35  
Finite Time Linear Quadratic Based Optimal Control of BLDC Motor Minimizing Control Error and Considering Accurate Finite Element Model

KREISCHER Christian, YE Zhi Jun 11-21 / 37  
Influence of Power Transformer Saturation on the Dimensioning of Turbo Generators

WOLKIEWICZ Marcin, TARCHALA Grzegorz, KOWALSKI Czesław T. 11-23 / 39  
Influence of Stator Winding Faults on Vector-Controlled Induction Motor Drive

KNYPIŃSKI Łukasz, NOWAK Lech, JEDRYCZKA Cezary 11-25 / 41  
Optimization of the Rotor Geometry of the Line-Start Permanent Magnet Synchronous Motor by the Use of Particle Swarm Algorithm

WOERNER Linus, FISCHER André 11-27 / 43  
Predicting Iron Saturation in Primary Teeth of Linear Induction Motors Suitable for Genetic Algorithms

STEINS Hendrik, GOŁĘBIEWSKI Marek 11-29 / 45  
Reduction of the Torsional Vibrations in Turbogenerators by Means of the Sliding Clutch

URBANSKI Konrad Sensorless Speed Control of PMSM Drive for Low Speed Range Using Back EMF Estimation	II-31 / 47
FABIANSKI Bogdan, ZAWIRSKI Krzysztof Simple, Nonlinear Model of 12/8 Poles Switched Reluctance Motor	II-33 / 49

### III. Non-linear Electric Circuits and Systems

MAYER Daniel, HRUSAK Josef, STORK Milan A Nonlinear Stabilization of Linear Oscillators with Energy Error Based PI-Controllers	III-1 / 51
DOBRUCKY Branislav, FRIVALDSKY Michal, KOSCELNIK Juraj Analysis and Multiphysimulation of LCTLN Non-linear Inverter Circuitry	III-3 / 53
SCHMUELLING Benedikt, CIMEN Sarp Gueney, DEMTROEDER Jana Comparative Study of the Transmission Characteristic of Unequal Compensated Inductive Power Supply Systems for Electric Vehicles	III-5 / 55
LIPNICKI Piotr, ZIELINSKI Dariusz, JARZYNA Wojciech Grid Synchronization of Voltage Frequency Converters in the Presence of Thyristor Commutation Distortions	III-7 / 57

### IV. Coupled and Special Problems

PANTELYAT Michael G., DOLEŽEL Ivo, SMALCERZ Albert 3D Multiphysics Numerical Analysis and Design of Electromagnetic Devices with Soft Magnetic Materials	IV-1 / 59
GOŁĘBIOWSKI Lesław, KULIG Stefan, MAZUR Damian A Converter System for Grid-Connected 6-Phase Asymmetric Wind Turbine Generator	IV-3 / 61
JEDRYCZKA Cezary Adjustable Permanent Magnet Magnetorheological Clutch for Reducing Surges During Start Up of Asynchronous Motors	IV-5 / 63
ZAGIRNYAK Mykhaylo, MALIAKOVA Mariia, KALINOV Andrii Analysis of Electric Circuits with Semiconductor Converters, Using Small Parameter Method in Frequency Domain	IV-7 / 65
KOWOL Paweł, PILCH Zbigniew Analysis of the Magnetorheological Clutch Working at Full Slip State	IV-9 / 67
ŠROUBOVÁ Lenka, KROPÍK Petr, HAMAR Roman Connection of Cylindrical Pipes by Induction Shrink Fits	IV-11 / 69
ČESKÝ Josef, POLCAR Petr Electrical Machine with Ferrofluid Filled Gap	IV-13 / 71
SOBCZYK Tadeusz J., WARZECHA Adam Estimation of Coefficients of Multivariable Power Series Approximating Magnetic Nonlinearity of AC Machines	IV-15 / 73
KLUCZNIK Jacek, LUBOSNY Zbigniew, DOBRZYNSKI Krzysztof, CZAPP Stanislaw Evaluation of Single Pole Auto-Reclosing Effectiveness with Nonlinear Secondary Arc Model	IV-17 / 75
RUF Andreas, STEENTJES Simon, FRANCK David, HAMEYER Kay Influence of Non-linear Frequency-Dependent Material Properties on the Operation of Rotating Electrical Machines	IV-19 / 77
WARZECHA Adam, MAZGAJ Witold Magnetization Measurements in Circle-Shaped Samples of Typical Dynamo Steel Sheets	IV-21 / 79

ZIGLER Martin Mathematical Model of Electromagnetic Levitation System	IV-23 / 81
KOUDELA Lukáš, KOTLAN Václav Modeling of Induction Heating for Shrink Fit	IV-25 / 83
PÁNEK David, KŮS Pavel, KOTLAN Vaclav, HAMAR Roman, DOLEŽEL Ivo Optimization of Pre-Heating System for Edge Welding	IV-27 / 85
SWISZCZ Piotr Simplified Model of the Submerged Arc Furnace in the Frequency Domain	IV-29 / 87
KLUSZCZYŃSKI Krzysztof, DOMIN Jarosław Two-Module Electromagnetic Launcher With Pneumatic Assist Part I Modeling And Determination of Position-Dependent Parameters	IV-31 / 89

#### **V. Problems of Electric Machines, Drives and their Control**

KAMINSKI Marcin, ORLOWSKA-KOWALSKA Teresa Adaptive Neurocontroller of Two-Mass Drive System Based on MLP Network With Modified Adaptive Interaction Learning Algorithm	V-1 / 91
RITONJA Jožef Adaptive and Robust Controls for a Semiconductor's Excitation Systems	V-3 / 93
DROZDZ Krzysztof, JANISZEWSKI Dariusz, SZABAT Krzysztof Online Identification of the Mechanical Parameters of Two-Mass System Using Fuzzy Kalman Filter	V-5 / 95
BROCK Stefan Positioning in Electric Drive Using Sliding Mode Control without a Reaching Phase	V-7 / 97

#### **VI. Doctoral Session**

LUKASZEWICZ Piotr Analysis of Local Forces Distribution in High Speed Permanent Magnet Motor	VI-1 / 99
PETRUN Martin, STEENTJES Simon, HAMEYER Kay, DOLINAR Drago Effects of Saturation and Hysteresis on Magnetization Dynamics: Influence of Different Material Models	VI-3 / 101
KUTHANOVÁ Jana, MIZEROVÁ Kateřina, KARBAN Pavel, KŮS Pavel, MACH František Induction Heating of Low-Temperature Metal	VI-5 / 103
SCHMUELLING Stefan, KULIG Stefan The Principle of Damages to Magnetic Slot Wedges by Direct Forces in High Voltage Induction Machines	VI-7 / 105

#### **VII. Modeling and Computational Electromagnetics**

WOJCIECHOWSKI Rafal, JEDRYCZKA Cezary Analysis of Stray Losses in the Tape Wound Concentrated Windings of Permanent Magnet Synchronous Motor	VII-1 / 107
PEUSSA Tommi, BELAHCEN Anouar Coupled Wave-Equation and Eddy-Current Model for Modeling and Measuring Propagating Stress-Wave	VII-3 / 109
MAYER Daniel, ULRYCH Bohuš Influence of Electromagnetic Shielding on Forces Among Conductors of Three-Phase Line	VII-5 / 111

MAZGAJ Witold, WARZECHA Adam Influence of Simplifications of a Rotational Magnetization Model on Calculation Accuracy	VII-7 / 113
PUTRI Aryanti K., APPUNN R., HAMEYER Kay Modeling of Nonlinear Losses in an Integrated Contactless Power Supply for Magnetically Levitated Elevator Systems Using Discrete Circuit Elements	VII-9 / 115
RIEMER Björn, HAMEYER Kay Multi-Harmonic Approach to Determine Load Dependent Local Flux Variations in Power Transformer Cores	VII-11 / 117
ZAGIRNYAK Mykhaylo, MOSYUNDZ Daria, RODKIN Dmytro Nonlinear Model Parameters Identification by Power Method	VII-13 / 119
WILK Andrzej Representation of Magnetic Hysteresis in Single-Phase Transformer for Circuit Simulations	VII-15 / 121
ZAGIRNYAK Mykhaylo, PRUS Viacheslav, MILJAVEC Damijan Determination of Parameters and Description of Electromagnetic and Power Processes in Electric Circuits with Steel in Saturation Mode	VII-17 / 123
STENZEL Tomasz, HETMAŃCZYK Janusz, GRZESIK Bogusław Selected Aspects of Modeling of Linear Actuator Based on PM BLDC Motor	VII-19 / 125
TOMCZUK Bronisław, KOTERAS Dariusz, WAINDOK Andrzej The Influence of the Leg Cutting on the Core Losses in the Amorphous Modular Transformers	VII-21 / 127
NAJGEBAUER Mariusz, SOKALSKI Krzysztof, SZCZYGŁOWSKI Jan The Modified Scaling Procedure in Coercivity Modelling	VII-23 / 129
JAGIELA Mariusz, GWOZDZ Janusz, GARBIEC Tomasz Time-Periodic Steady-State Finite Element Model of Inverter-Driven Rotating Machine	VII-25 / 131
DOMIN Jarosław, KLUSZCZYŃSKI Krzysztof Two-Module Electromagnetic Launcher With Pneumatic Assist Part II Results of Computer Simulation, Laboratory Verification And Conclusions	VII-27 / 133
BONTINCK Zeger, DE GERSEM Herbert, SCHÖPS Sebastian Uncertainty Quantification of the Eccentricity of Permanent Magnetic Synchronous Machines	VII-29 / 135

### VIII. Special Problems

DE GERSEM Herbert, SCHEERLINCK Bart, SERGEANT Peter Comparison of Homogenised Finite-Element Models for Eddy-Current Losses in Steel Laminations	VIII-1 / 137
HENNERON Thomas, CLÉNET Stéphane Model Order Reduction of Single Transformer Based on Typical Engineer Test-Oriented POD (TETO-POD) Methods	VIII-3 / 139

### IX. Modeling in Electromagnetics

WIAK Sławomir, DRZYMALA Paweł, WELFLE Henryk 3D Field Modeling of Construction Elements in Large Power Transformers	IX-1 / 141
TANG Zuqi, LE MÉNACH Yvonnick, CREUSÉ Emmanuel, NICAISE Erge, PIRIOU Francis, NEMITZ Nicolas A Posteriori Residual Error Estimators with Hybrid Boundary Conditions for Quasi-static Electromagnetic Problems	IX-3 / 143

WITCZAK Pawel, KUBIAK Witold  
Influence of Rotor Eccentricity on Vibration of Permanent Magnet Motor with Concentrated Windings IX-5 / 145

SCHMUELLING Stefan, HABEL Stefan, SCHMUELLING Christoph  
Investigation on Forces and Torques in a Brushless Excitation System IX-7 / 147

## X. Electric Circuits, Systems and their Control

GWOZDZ Michal  
A Precision Power Electronics Controlled Current Source X-1 / 149

KCIUK Marek, CHWASTEK Krzysztof, SZCZYGLOWSKI Jan, KLUSZCZYŃSKI Krzysztof  
A Study on Hysteresis Behaviour of SMA Linear Actuators Based on Takacs' Concept X-3 / 151

SZROMBA Andrzej  
Conductance-Controlled Global-Compensation-Type Shunt Active Power Filter X-5 / 153

SAJKOWSKI Maciej, KRYKOWSKI Krzysztof  
Control System Design Using Rapid Prototyping Methods on an Examples of Voice Controlled Mobile Robot and 6DOF Parallel Manipulator X-7 / 155

PORADA Ryszard, GULCZYŃSKI Adam  
Control of Power Electronics Voltage Source with Application of Discreet Regulators X-9 / 157

GOŁĘBIEWSKI Marek  
Control of the 6-phase Asymmetric Inset-Type SMPMSM Generator X-11 / 159

ZASKALICKY Pavel  
Harmonic Analysis of a Two-Phase Half-Bridge Connected Inverter with PWM Output Voltage Control X-13 / 161

CZAPP Stanislaw, DOBRZYNSKI Krzysztof, KLUCZNIK Jacek, LUBOSNY Zbigniew  
Induced Sheath Voltages in 110 kV Power Cables - Case Study X-15 / 163

MIELCZAREK Norbert  
Influence of Initial Conditions on Control of Buck Converter X-17 / 165

ČERNELIČ Jernej, ŠTUMBERGER Gorazd, DOLINAR Drago  
Low-Cost Control for Small Wind Turbines Connected to the Grid X-19 / 167

WALCZAK Janusz, JAKUBOWSKA Agnieszka,  
Resonance in Parallel Fractional - Order Reactance Circuit X-21 / 169

PAJCHROWSKI Tomasz, JANISZEWSKI Dariusz  
Speed Control of Two-Mass Elastic System by On-Line Trained Neural Network Based on Kalman Filter Estimation X-23 / 171

HABEL Stefan, KREISCHER Christian  
Stress Optimized Short-Circuit Switching Based on Generator Feedback X-25 / 173

DĘBOWSKI Krzysztof  
The Optimal Current in the Non-Ideal Three-Phase System with Unsteady Parameters X-27 / 175

PIWOWAR Anna  
Time-Frequency Responses of Generalized First Order Parametric Section X-29 / 177

PIETROWSKI Wojciech  
Wavelet Analysis of Current of an Induction Machine With Time-Varied Short Circuit X-31 / 179

## XI. Special Problems

- SLUSAREK Barbara, SZCZYGLOWSKI Jan, CHWASTEK Krzysztof, JANKOWSKI Bartosz      XI-1 / 181  
Optimization of Magnetic Properties of a Soft Magnetic Composite Core
- BELAHCEN Anouar, RASILO Paavo, NGUYEN Thu-trang, CLÉNET Stéphane      XI-3 / 183  
Uncertainty Propagation of Iron Loss Computation From Measurements to Electrical Machines
