Series Foreword ix

Preface xi

1 Introduction 1

I Institutions

2 The Nature of Banking and the Rationale for Regulation 13

2.1 What Is a Bank? 13

2.1.1 Balance Sheet and Income Statement 13

2.1.2 Banking Specialization 18

2.1.3 Bank Heterogeneity 20

2.1.4 Deposits and Debt Position of Banks 22

2.1.5 Why Have Banks Failed Recently? 25

2.2 Why Regulate Banks? 29

2.2.1 Changing the Focus 29

2.2.2 Addressing Potential Concerns about the
Representation Hypothesis 32

2.2.3 Further Evidence in Favor of the Representation
Hypothesis 35

3 The Institutions of Banking Regulation 47

3.1 The Basle Accords 48

3.1.1 General Dispositions 49

3.1.2 Capital 49

3.1.3	Risk-Weighted Assets and Solvency Requirements	52
3.1.4	Interest Rate and Other Market Risks	56
3.1.5	Activity Restrictions	59
3.1.6	Deposit Insurance	59
3.2	U.S. Regulation	61
3.3	Some Other Supervisory Issues	63
3.3.1	Liquidity and Early Warning Systems	63
3.3.2	Handling Bank Failures	66
3.3.3	Conglomerates and Double Gearing	71
3.4	The Regulation of Nonbanks	79
3.4.1	Pension Funds	79
3.4.2	Insurance Companies	81
3.4.3	Securities Markets Institutions	85
3.5	Is Banking Regulation Different from Corporate Governance?	87
4	The Example of the U.S. Savings and Loan Associations	93
4.1	S&L Fragility with Respect to Interest Rate Risk	93
4.2	The Initial Regulatory Response	94
4.3	The Dual Adjustment Process	97
4.4	Regulatory Cleanup by the FSLIC and the Congress	98
II Theoretical Perspective		
5	Existing Banking Theory	103
5.1	Reduction in Transaction Costs	104
5.2	Delegated Monitoring	105
5.2.1	Information Provision as a Natural Monopoly	105
5.2.2	The Diamond Model	107
5.2.3	The Diamond Model and Banking Regulation	109
5.3	Liquidity Provision	109
5.4	Competition in the Banking Industry	112
5.5	Regulatory Models	114
5.6	The Need for a Complementary Approach	117
6	Outline of the Argument	119

III Normative Analysis

- 7 A Simple Model 133
 - 7.1 The Model 133
 - 7.2 No Renegotiation: Excessive Interference and Passivity 138

- 8 The Investors' Incentive Scheme 141
 - 8.1 A Role for Shareholders and Debtholders 141
 - 8.2 Exact Implementation 148
 - 8.2.1 Composite Claims 148
 - 8.2.2 Implementation by Debt and Equity with Net Worth Adjustments 149
 - 8.2.3 Implementation through Adjusted Voluntary Recapitalization 151

- 9 Relative Solvency Ratios, Securitization, and Market Value Accounting 155
 - 9.1 Relative Solvency Ratios 155
 - 9.1.1 Controllable and Exogenous Risks 155
 - 9.1.2 Relative Performance Evaluation Does Not Imply a Relative Ratio 158
 - 9.1.3 Addressing Some Potential Concerns 161
 - 9.2 Securitization 163
 - 9.3 Historical Cost or Market Value Accounting? 167

- 10 Manipulating Performance Measures and Gains Trading 171
 - 10.1 Portfolio Management, Liquidity, and Securitization 171
 - 10.2 Gains Trading 174

IV Picking a Regulatory Framework

- 11 Analysis of the Basle Accords 179
 - 11.1 The Basle Voluntary Recapitalization Scheme 179
 - 11.1.1 Risk Weighting 180
 - 11.1.2 Constant Capital Requirement 180
 - 11.1.3 Macroeconomic Shocks 185

11.1.4	Expropriation of Equity Interests	185
11.1.5	Mechanical Intervention by the Regulator	186
11.1.6	Overall Evaluation	187
11.2	Recapitalization or Securitization?	187
11.3	Reallocation of the Bank Portfolio between Risky and Safe Assets	189
12	The Political Economy of Public Regulation	193
12.1	Optimal Discretionary Regulation	193
12.2	Limitations of Discretionary Regulation	194
12.3	Drawbacks of Nondiscretionary Regulation	199
13	Private Regulation	201
13.1	Private Deposit Insurance	201
13.2	Independent Rating Agencies	205
13.3	Private External Control in Case of Low Solvency	206
13.3.1	The Proposals	207
13.3.2	Analysis	208
13.4	Calibrating Capital Requirements: Mixed Public-Private Regulation	210
V Conclusion		
14	Lessons for Banking Regulation	217
Appendixes		
A	Perfect Renegotiation and Managerial Rent Extraction	227
B	Manipulation of the Performance Measure: An Example	233
C	Portfolio Reallocation between Risky and Safe Assets	239
	References	243
