Table of Contents

Preface	os suveinel 1
Chapter 1: Getting Started with Unity 4.x	7
Introduction	7
Installing Unity 4.x	8
Setting your preferences	9
Understanding and optimizing the User Interface	10
Saving assets created in Unity as Prefabs	13
Discovering Unity's content	15
Importing your own content	16
Importing Unity packages into your project	17
Importing custom packages into your project	19
Exporting custom packages from your project	21
Adding custom packages to Unity's quick list	22
Using the Project browser	24
Chapter 2: Using Cameras	27
Introduction	27
Creating a picture-in-picture effect	27
Switching between multiple cameras	32
Customizing the lens flare effect	35
Making textures from screen content	39
Zooming a telescopic camera	43
Making an inspect camera	46
Creating particle effects using Shuriken	48
Displaying a mini-map	52
Chapter 3: Creating Maps and Materials	59
Introduction	59
Creating a reflective material	60
Creating a self-illuminated material	64

Creating transparency texture maps Using cookie textures to simulate a cloudy outdoor Creating a color selection dialog Combining textures in real time through the GUI Highlighting materials at mouse over Animating textures by looping through array of materials (for example, simulated video) Disabling culling for a material 92 Chapter 4: Creating GUIs Introduction Displaying a digital clock Displaying an analogue clock Displaying a compass to show player direction Displaying a radar to indicate relative locations of objects Displaying images for corresponding floats and ranges Displaying a digital countdown timer Displaying a digital countdown timer Displaying a countdown timer graphically (5, 4, 3, 2, 1 - blast off) Displaying a countdown timer graphically as a pie-chart style clock Creating a message that fades away Displaying inventory texts for single object pickups Displaying inventory texts for single object picku	Creating specular texture maps	68
Creating a color selection dialog Combining textures in real time through the GUI Highlighting materials at mouse over Animating textures by looping through array of materials (for example, simulated video) Disabling culling for a material 92 Chapter 4: Creating GUIs Introduction 96 Displaying a digital clock 97 Displaying an analogue clock 98 Displaying a compass to show player direction 98 Displaying a radar to indicate relative locations of objects 106 Displaying images for corresponding integers 110 Displaying a digital countdown timer 111 Displaying a countdown timer graphically (5, 4, 3, 2, 1 – blast off) 117 Displaying a countdown timer graphically as a pie-chart style clock 120 Creating a message that fades away 123 Displaying inventory texts for single object pickups 124 Displaying inventory texts for single object pickups 128 Managing inventories with a general purpose PickUp class 130 Controlling the scrollbar with the mouse wheel 134 Implementing custom mouse cursor icons 136 Chapter 5: Controlling Animations 141 Introduction 142 Moving your character with Root Motion and Blend Trees 147 Mixing an imations with Layers and Masks 157 Overriding Root Motion via script 164 Adding rigid props to animated characters 175 Making an animated character throw an object 175 Applying ragdoll physics to a character 179 Rotating the character's torso to aim 188 Chapter 6: Playing and Manipulating Sounds 189 Introduction 189 Matching audio pitch to animation speed	Creating transparency texture maps	72
Combining textures in real time through the GUI Highlighting materials at mouse over Animating textures by looping through array of materials (for example, simulated video) Disabling culling for a material 92 Chapter 4: Creating GUIS Introduction 96 Displaying a digital clock 96 Displaying a compass to show player direction Displaying a radar to indicate relative locations of objects Displaying images for corresponding integers 110 Displaying images for corresponding floats and ranges 112 Displaying a digital countdown timer Displaying a countdown timer graphically (5, 4, 3, 2, 1 – blast off) Displaying a countdown timer graphically as a pie-chart style clock Creating a message that fades away Displaying inventory texts for single object pickups 124 Displaying inventory icons for single object pickups 128 Managing inventories with a general purpose PickUp class Controlling the scrollbar with the mouse wheel Introduction Configuring a character's Avatar and Idle animation 141 Configuring a character's Avatar and Idle animation 142 Moving your character with Root Motion and Blend Trees 147 Mixing animations with Layers and Masks 157 Overriding Root Motion via script 164 Adding rigid props to animated characters 175 Applying ragdoll physics to a character 176 Applying ragdoll physics to a character 177 Making an animated character throw an object 175 Applying ragdoll physics to a character 178 Rotating the character's torso to aim 188 Chapter 6: Playing and Manipulating Sounds Introduction 189 Matching audio pitch to animation speed	Using cookie textures to simulate a cloudy outdoor	76
Highlighting materials at mouse over Animating textures by looping through array of materials (for example, simulated video) Disabling culling for a material 92 Chapter 4: Creating GUIs Displaying a digital clock Displaying an analogue clock Displaying a compass to show player direction Displaying a radar to indicate relative locations of objects Displaying images for corresponding integers Displaying images for corresponding floats and ranges Displaying a digital countdown timer Displaying a countdown timer graphically (5, 4, 3, 2, 1 - blast off) Displaying a countdown timer graphically as a pie-chart style clock Creating a message that fades away Displaying inventory texts for single object pickups Displaying inventory icons for single object pickups Displaying inventories with a general purpose PickUp class Controlling the scrollbar with the mouse wheel Introduction Configuring a character's Avatar and Idle animation Hoving your character with Root Motion and Blend Trees Mixing animations with Layers and Masks Overriding Root Motion via script Adding rigid props to animated character Making an animated character throw an object Applying ragdoll physics to a character Rotating the character's torso to aim Chapter 6: Playing and Manipulating Sounds Introduction Matching audio pitch to animation speed	Creating a color selection dialog	81
Animating textures by looping through array of materials (for example, simulated video) Disabling culling for a material 92 Chapter 4: Creating GUIs 95 Introduction 96 Displaying a digital clock 97 Displaying an analogue clock 98 Displaying a compass to show player direction 99 Displaying images for corresponding integers 100 Displaying images for corresponding integers 110 Displaying images for corresponding floats and ranges 111 Displaying a digital countdown timer 112 Displaying a countdown timer graphically (5, 4, 3, 2, 1 - blast off) Displaying a countdown timer graphically as a pie-chart style clock 120 Creating a message that fades away 123 Displaying inventory texts for single object pickups 124 Displaying inventory icons for single object pickups 124 Displaying inventories with a general purpose PickUp class 130 Controlling the scrollbar with the mouse wheel 134 Implementing custom mouse cursor icons 136 Chapter 5: Controlling Animations 141 Introduction 142 Moving your character's Avatar and Idle animation 143 Moving your character with Root Motion and Blend Trees 147 Mixing animations with Layers and Masks 157 Overriding Root Motion via script 164 Adding rigid props to animated characters 175 Applying ragdoll physics to a character 176 Rotating the character's torso to aim 183 Chapter 6: Playing and Manipulating Sounds Introduction 189 Introduction 189 Introduction 189 Introduction 189 Introduction 189	Combining textures in real time through the GUI	84
(for example, simulated video) Disabling culling for a material 92 Chapter 4: Creating GUIs Introduction 96 Displaying a digital clock 98 Displaying an analogue clock 98 Displaying a compass to show player direction 102 Displaying a radar to indicate relative locations of objects 106 Displaying images for corresponding integers 110 Displaying images for corresponding floats and ranges 112 Displaying a countdown timer 116 Displaying a countdown timer graphically (5, 4, 3, 2, 1 – blast off) 117 Displaying a countdown timer graphically as a pie-chart style clock Creating a message that fades away 123 Displaying inventory texts for single object pickups 124 Displaying inventory icons for single object pickups 128 Managing inventories with a general purpose PickUp class 130 Controlling the scrollbar with the mouse wheel 134 Implementing custom mouse cursor icons 136 Chapter 5: Controlling Animations 141 Introduction 142 Moving your character's Avatar and Idle animation 144 Moving your character with Root Motion and Blend Trees 147 Mixing animations with Layers and Masks 157 Overriding Root Motion via script 164 Adding rigid props to animated characters 175 Making an animated character throw an object 175 Applying ragdoll physics to a character 179 Rotating the character's torso to aim 188 Chapter 6: Playing and Manipulating Sounds 189 Introduction 189 Introduction 189 Matching audio pitch to animation speed	Highlighting materials at mouse over	87
Chapter 4: Creating GUIs Introduction Displaying a digital clock Displaying a nanalogue clock Displaying a compass to show player direction Displaying a radar to indicate relative locations of objects Displaying images for corresponding integers Displaying images for corresponding floats and ranges Displaying a digital countdown timer Displaying a countdown timer graphically (5, 4, 3, 2, 1 – blast off) Displaying a countdown timer graphically as a pie-chart style clock Creating a message that fades away Displaying inventory texts for single object pickups Displaying inventory texts for single object pickups Displaying inventory icons for single object pickups Displaying inventories with a general purpose PickUp class Controlling the scrollbar with the mouse wheel Introduction Configuring a character's Avatar and Idle animation Introduction Configuring a character with Root Motion and Blend Trees Mixing animations with Layers and Masks Overriding Root Motion via script Adding rigid props to animated characters Making an animated character throw an object Applying ragdoll physics to a character Rotating the character's torso to aim Chapter 6: Playing and Manipulating Sounds Introduction Introduction Chapter 6: Playing and Manipulating Sounds Introduction Rase Matching audio pitch to animation speed	Animating textures by looping through array of materials	
Chapter 4: Creating GUIs95Introduction96Displaying a digital clock96Displaying an analogue clock98Displaying a compass to show player direction102Displaying a radar to indicate relative locations of objects106Displaying images for corresponding integers110Displaying a digital countdown timer116Displaying a countdown timer graphically (5, 4, 3, 2, 1 - blast off)117Displaying a countdown timer graphically as a pie-chart style clock120Creating a message that fades away123Displaying inventory texts for single object pickups124Displaying inventory icons for single object pickups128Managing inventories with a general purpose PickUp class130Controlling the scrollbar with the mouse wheel134Implementing custom mouse cursor icons136Chapter 5: Controlling Animations141Introduction144Configuring a character's Avatar and Idle animation142Moving your character with Root Motion and Blend Trees147Mixing animations with Layers and Masks157Overriding Root Motion via script164Adding rigid props to animated characters171Making an animated character throw an object175Applying ragdoll physics to a character175Rotating the character's torso to aim188Introduction189Introduction189Matching audio pitch to animation speed189	(for example, simulated video)	90
Introduction 96 Displaying a digital clock 96 Displaying an analogue clock 98 Displaying a compass to show player direction 102 Displaying a radar to indicate relative locations of objects 106 Displaying images for corresponding integers 110 Displaying images for corresponding floats and ranges 1112 Displaying a digital countdown timer 116 Displaying a countdown timer graphically (5, 4, 3, 2, 1 - blast off) 117 Displaying a countdown timer graphically as a pie-chart style clock 120 Creating a message that fades away 123 Displaying inventory texts for single object pickups 124 Displaying inventory icons for single object pickups 124 Displaying inventories with a general purpose PickUp class 130 Controlling the scrollbar with the mouse wheel 134 Implementing custom mouse cursor icons 136 Chapter 5: Controlling Animations 141 Introduction 141 Configuring a character's Avatar and Idle animation 142 Moving your character with Root Motion and Blend Trees 147 Mixing animations with Layers and Masks 157 Overriding Root Motion via script 164 Adding rigid props to animated characters 171 Making an animated character throw an object 175 Applying ragdoll physics to a character 179 Rotating the character's torso to aim 183 Chapter 6: Playing and Manipulating Sounds 189 Introduction 189 Matching audio pitch to animation speed 189	Disabling culling for a material	92
Displaying a digital clock Displaying an analogue clock Displaying a compass to show player direction Displaying a radar to indicate relative locations of objects Displaying images for corresponding integers Displaying images for corresponding floats and ranges Displaying a digital countdown timer Displaying a countdown timer graphically (5, 4, 3, 2, 1 - blast off) Displaying a countdown timer graphically as a pie-chart style clock Creating a message that fades away Displaying inventory texts for single object pickups Displaying inventory icons for single object pickups Displaying inventory icons for single object pickups Displaying inventories with a general purpose PickUp class Controlling the scrollbar with the mouse wheel Inplementing custom mouse cursor icons Chapter 5: Controlling Animations Introduction Configuring a character's Avatar and Idle animation Adoing your character with Root Motion and Blend Trees Mixing animations with Layers and Masks Overriding Root Motion via script Adding rigid props to animated characters Adding rigid props to animated characters Applying ragdoll physics to a character Applying ragdoll physics to a character Rotating the character's torso to aim Chapter 6: Playing and Manipulating Sounds Introduction Intro	Chapter 4: Creating GUIs	95
Displaying an analogue clock Displaying a compass to show player direction Displaying a radar to indicate relative locations of objects Displaying images for corresponding integers Displaying images for corresponding floats and ranges Displaying a digital countdown timer Displaying a countdown timer graphically (5, 4, 3, 2, 1 - blast off) Displaying a countdown timer graphically as a pie-chart style clock Creating a message that fades away Displaying inventory texts for single object pickups Displaying inventory icons for single object pickups Displaying inventory icons for single object pickups Displaying inventories with a general purpose PickUp class Controlling the scrollbar with the mouse wheel Inplementing custom mouse cursor icons Displaying a character's Avatar and Idle animation Chapter 5: Controlling Animations Introduction Configuring a character's Avatar and Idle animation Adoing your character with Root Motion and Blend Trees Mixing animations with Layers and Masks Overriding Root Motion via script Adding rigid props to animated characters Adding rigid props to animated characters Applying ragdoll physics to a character Applying ragdoll physics to a character Rotating the character's torso to aim Chapter 6: Playing and Manipulating Sounds Introduction Introdu	Introduction	96
Displaying a compass to show player direction Displaying a radar to indicate relative locations of objects Displaying images for corresponding integers 110 Displaying images for corresponding floats and ranges 112 Displaying a digital countdown timer Displaying a countdown timer graphically (5, 4, 3, 2, 1 - blast off) 117 Displaying a countdown timer graphically as a pie-chart style clock 120 Creating a message that fades away Displaying inventory texts for single object pickups Displaying inventory texts for single object pickups 124 Displaying inventories with a general purpose PickUp class Controlling the scrollbar with the mouse wheel Implementing custom mouse cursor icons 136 Chapter 5: Controlling Animations 141 Introduction 142 Configuring a character's Avatar and Idle animation Moving your character with Root Motion and Blend Trees Mixing animations with Layers and Masks 157 Overriding Root Motion via script Adding rigid props to animated characters 171 Making an animated character throw an object Adding rigid props to animated character 175 Applying ragdoll physics to a character 176 Rotating the character's torso to aim 187 Chapter 6: Playing and Manipulating Sounds Introduction 189 Introduction 189 Matching audio pitch to animation speed	Displaying a digital clock	96
Displaying a radar to indicate relative locations of objects Displaying images for corresponding integers 110 Displaying images for corresponding floats and ranges 112 Displaying a digital countdown timer Displaying a countdown timer graphically (5, 4, 3, 2, 1 - blast off) Displaying a countdown timer graphically as a pie-chart style clock Creating a message that fades away Displaying inventory texts for single object pickups Displaying inventory icons for single object pickups Managing inventories with a general purpose PickUp class Controlling the scrollbar with the mouse wheel Implementing custom mouse cursor icons Chapter 5: Controlling Animations 141 Introduction Configuring a character's Avatar and Idle animation Moving your character with Root Motion and Blend Trees Moving your character with Root Motion and Blend Trees 147 Mixing animations with Layers and Masks 157 Overriding Root Motion via script Adding rigid props to animated characters 171 Making an animated character throw an object Applying ragdoll physics to a character Rotating the character's torso to aim Chapter 6: Playing and Manipulating Sounds Introduction Matching audio pitch to animation speed	Displaying an analogue clock	98
Displaying a radar to indicate relative locations of objects Displaying images for corresponding integers 110 Displaying images for corresponding floats and ranges 112 Displaying a digital countdown timer Displaying a countdown timer graphically (5, 4, 3, 2, 1 - blast off) Displaying a countdown timer graphically as a pie-chart style clock Creating a message that fades away Displaying inventory texts for single object pickups Displaying inventory icons for single object pickups Managing inventories with a general purpose PickUp class Controlling the scrollbar with the mouse wheel Implementing custom mouse cursor icons Chapter 5: Controlling Animations 141 Introduction Configuring a character's Avatar and Idle animation Moving your character with Root Motion and Blend Trees Moving your character with Root Motion and Blend Trees 147 Mixing animations with Layers and Masks 157 Overriding Root Motion via script Adding rigid props to animated characters 171 Making an animated character throw an object Applying ragdoll physics to a character Rotating the character's torso to aim Chapter 6: Playing and Manipulating Sounds Introduction Matching audio pitch to animation speed	Displaying a compass to show player direction	102
Displaying images for corresponding integers Displaying images for corresponding floats and ranges Displaying a digital countdown timer Displaying a countdown timer graphically (5, 4, 3, 2, 1 - blast off) Displaying a countdown timer graphically as a pie-chart style clock Creating a message that fades away Displaying inventory texts for single object pickups Displaying inventory icons for single object pickups Managing inventories with a general purpose PickUp class Controlling the scrollbar with the mouse wheel Introduction Chapter 5: Controlling Animations Introduction Configuring a character's Avatar and Idle animation Moving your character with Root Motion and Blend Trees Mixing animations with Layers and Masks Overriding Root Motion via script Adding rigid props to animated characters Making an animated character throw an object Applying ragdoll physics to a character Rotating the character's torso to aim Chapter 6: Playing and Manipulating Sounds Introduction Introdu		106
Displaying images for corresponding floats and ranges Displaying a digital countdown timer Displaying a countdown timer graphically (5, 4, 3, 2, 1 - blast off) Displaying a countdown timer graphically as a pie-chart style clock Creating a message that fades away Displaying inventory texts for single object pickups Displaying inventory icons for single object pickups Managing inventories with a general purpose PickUp class Controlling the scrollbar with the mouse wheel Implementing custom mouse cursor icons Chapter 5: Controlling Animations Introduction Configuring a character's Avatar and Idle animation Adving your character with Root Motion and Blend Trees Mixing animations with Layers and Masks Overriding Root Motion via script Adding rigid props to animated characters Making an animated character throw an object Applying ragdoll physics to a character Rotating the character's torso to aim Chapter 6: Playing and Manipulating Sounds Introduction		110
Displaying a digital countdown timer Displaying a countdown timer graphically (5, 4, 3, 2, 1 - blast off) Displaying a countdown timer graphically as a pie-chart style clock 120 Creating a message that fades away Displaying inventory texts for single object pickups Displaying inventory icons for single object pickups Managing inventories with a general purpose PickUp class Controlling the scrollbar with the mouse wheel Introduction Configuring a character's Avatar and Idle animation Moving your character with Root Motion and Blend Trees Mixing animations with Layers and Masks Overriding Root Motion via script Adding rigid props to animated characters Making an animated character throw an object Applying ragdoll physics to a character Rotating the character's torso to aim Chapter 6: Playing and Manipulating Sounds Introduction		112
Displaying a countdown timer graphically (5, 4, 3, 2, 1 – blast off) Displaying a countdown timer graphically as a pie-chart style clock Creating a message that fades away Displaying inventory texts for single object pickups Displaying inventory icons for single object pickups Managing inventories with a general purpose PickUp class Controlling the scrollbar with the mouse wheel Implementing custom mouse cursor icons Chapter 5: Controlling Animations Introduction Configuring a character's Avatar and Idle animation Moving your character with Root Motion and Blend Trees Mixing animations with Layers and Masks Overriding Root Motion via script Adding rigid props to animated characters Applying ragdoll physics to a character Rotating the character's torso to aim Chapter 6: Playing and Manipulating Sounds Introduction Introduction		116
Creating a message that fades away Displaying inventory texts for single object pickups Displaying inventory icons for single object pickups Managing inventories with a general purpose PickUp class Controlling the scrollbar with the mouse wheel Implementing custom mouse cursor icons Chapter 5: Controlling Animations Introduction Configuring a character's Avatar and Idle animation Moving your character with Root Motion and Blend Trees Mixing animations with Layers and Masks Overriding Root Motion via script Adding rigid props to animated characters Making an animated character throw an object Applying ragdoll physics to a character Rotating the character's torso to aim Chapter 6: Playing and Manipulating Sounds Introduction Introductio		117
Creating a message that fades away Displaying inventory texts for single object pickups 124 Displaying inventory icons for single object pickups Managing inventories with a general purpose PickUp class Controlling the scrollbar with the mouse wheel 134 Implementing custom mouse cursor icons 136 Chapter 5: Controlling Animations 141 Introduction 142 Moving your character's Avatar and Idle animation 142 Moving your character with Root Motion and Blend Trees 147 Mixing animations with Layers and Masks 157 Overriding Root Motion via script 164 Adding rigid props to animated characters 171 Making an animated character throw an object 175 Applying ragdoll physics to a character Rotating the character's torso to aim 183 Chapter 6: Playing and Manipulating Sounds Introduction 189 Introduction 189 Matching audio pitch to animation speed	Displaying a countdown timer graphically as a pie-chart style clock	120
Displaying inventory texts for single object pickups Displaying inventory icons for single object pickups Managing inventories with a general purpose PickUp class Controlling the scrollbar with the mouse wheel Implementing custom mouse cursor icons Chapter 5: Controlling Animations Introduction Configuring a character's Avatar and Idle animation Moving your character with Root Motion and Blend Trees Mixing animations with Layers and Masks Overriding Root Motion via script Adding rigid props to animated characters Making an animated character throw an object Applying ragdoll physics to a character Rotating the character's torso to aim Chapter 6: Playing and Manipulating Sounds Introduction Matching audio pitch to animation speed		123
Displaying inventory icons for single object pickups Managing inventories with a general purpose PickUp class Controlling the scrollbar with the mouse wheel Implementing custom mouse cursor icons Chapter 5: Controlling Animations Introduction Configuring a character's Avatar and Idle animation Moving your character with Root Motion and Blend Trees Mixing animations with Layers and Masks Overriding Root Motion via script Adding rigid props to animated characters Making an animated character throw an object Applying ragdoll physics to a character Rotating the character's torso to aim Chapter 6: Playing and Manipulating Sounds Introduction Matching audio pitch to animation speed		124
Controlling the scrollbar with the mouse wheel Implementing custom mouse cursor icons Chapter 5: Controlling Animations Introduction Configuring a character's Avatar and Idle animation Moving your character with Root Motion and Blend Trees Mixing animations with Layers and Masks Overriding Root Motion via script Adding rigid props to animated characters Making an animated character throw an object Applying ragdoll physics to a character Rotating the character's torso to aim Chapter 6: Playing and Manipulating Sounds Introduction Matching audio pitch to animation speed 134 142 143 144 145 146 147 148 157 164 164 164 164 175 175 175 175 175 179 180 180 181 183 189 189	Displaying inventory icons for single object pickups	128
Implementing custom mouse cursor icons Chapter 5: Controlling Animations Introduction Configuring a character's Avatar and Idle animation Moving your character with Root Motion and Blend Trees Mixing animations with Layers and Masks Overriding Root Motion via script Adding rigid props to animated characters Making an animated character throw an object Applying ragdoll physics to a character Rotating the character's torso to aim Chapter 6: Playing and Manipulating Sounds Introduction Matching audio pitch to animation speed 136 141 142 143 144 145 147 148 147 148 157 164 164 164 175 175 175 176 179 179 179 180 180 189 189	Managing inventories with a general purpose PickUp class	130
Chapter 5: Controlling Animations141Introduction141Configuring a character's Avatar and Idle animation142Moving your character with Root Motion and Blend Trees147Mixing animations with Layers and Masks157Overriding Root Motion via script164Adding rigid props to animated characters171Making an animated character throw an object175Applying ragdoll physics to a character179Rotating the character's torso to aim183Chapter 6: Playing and Manipulating Sounds189Introduction189Matching audio pitch to animation speed189	Controlling the scrollbar with the mouse wheel	134
Introduction 141 Configuring a character's Avatar and Idle animation 142 Moving your character with Root Motion and Blend Trees 147 Mixing animations with Layers and Masks 157 Overriding Root Motion via script 164 Adding rigid props to animated characters 171 Making an animated character throw an object 175 Applying ragdoll physics to a character 179 Rotating the character's torso to aim 183 Chapter 6: Playing and Manipulating Sounds 189 Introduction 189 Matching audio pitch to animation speed 189	Implementing custom mouse cursor icons	136
Introduction 141 Configuring a character's Avatar and Idle animation 142 Moving your character with Root Motion and Blend Trees 147 Mixing animations with Layers and Masks 157 Overriding Root Motion via script 164 Adding rigid props to animated characters 171 Making an animated character throw an object 175 Applying ragdoll physics to a character 179 Rotating the character's torso to aim 183 Chapter 6: Playing and Manipulating Sounds 189 Introduction 189 Matching audio pitch to animation speed 189	Chapter 5: Controlling Animations	141
Moving your character with Root Motion and Blend Trees Mixing animations with Layers and Masks Overriding Root Motion via script Adding rigid props to animated characters Making an animated character throw an object Applying ragdoll physics to a character Rotating the character's torso to aim Chapter 6: Playing and Manipulating Sounds Introduction Matching audio pitch to animation speed 147 157 164 175 175 175 179 Rotating the character's torso to aim 183 Chapter 6: Playing and Manipulating Sounds 189 Matching audio pitch to animation speed		
Moving your character with Root Motion and Blend Trees Mixing animations with Layers and Masks Overriding Root Motion via script Adding rigid props to animated characters Making an animated character throw an object Applying ragdoll physics to a character Rotating the character's torso to aim Chapter 6: Playing and Manipulating Sounds Introduction Matching audio pitch to animation speed 147 157 164 175 175 175 179 Rotating the character's torso to aim 183 Chapter 6: Playing and Manipulating Sounds 189 Matching audio pitch to animation speed	Configuring a character's Avatar and Idle animation	142
Mixing animations with Layers and Masks Overriding Root Motion via script Adding rigid props to animated characters Instruction Making an animated character throw an object Applying ragdoll physics to a character Rotating the character's torso to aim Introduction Introduction Matching audio pitch to animation speed 157 164 175 171 175 175 179 179 183 183 183 189 189		147
Overriding Root Motion via script Adding rigid props to animated characters In Making an animated character throw an object Applying ragdoll physics to a character Rotating the character's torso to aim Introduction Introductio		157
Adding rigid props to animated characters Making an animated character throw an object Applying ragdoll physics to a character Rotating the character's torso to aim Chapter 6: Playing and Manipulating Sounds Introduction Matching audio pitch to animation speed 171 175 176 177 178 189 189		164
Making an animated character throw an object Applying ragdoll physics to a character Rotating the character's torso to aim 183 Chapter 6: Playing and Manipulating Sounds Introduction 189 Matching audio pitch to animation speed 189		171
Applying ragdoll physics to a character Rotating the character's torso to aim Chapter 6: Playing and Manipulating Sounds Introduction 189 Matching audio pitch to animation speed 189		175
Rotating the character's torso to aim Chapter 6: Playing and Manipulating Sounds Introduction Matching audio pitch to animation speed 189		179
Introduction 189 Matching audio pitch to animation speed 189		183
Introduction 189 Matching audio pitch to animation speed 189	Chapter 6: Playing and Manipulating Sounds	189
Matching audio pitch to animation speed 189		

Simulating a tunnel environment with Reverb Zones	198
Preventing the AudioClip from restarting if already playing	201
Waiting for audio to finish before auto-destructing an object	202
Making a dynamic soundtrack	204
Chapter 7: Working with External Resource Files and Devices	211
Introduction	211
Loading external resource files – by Unity Default Resources	212
Loading external resource files – by manually storing files	
in Unity's Resources folder	214
Loading external resource files - by downloading files	
from the Internet	217
Saving and loading player data – using static properties	219
Saving and loading player data – using PlayerPrefs	223
Saving screenshots from the game	225
Control characters in Unity with the Microsoft Kinect	
using the Zigfu samples	227
Animating your own characters with the Microsoft Kinect controller	230
Homemade mocap by storing movements from	
the Microsoft Kinect controller	232
Setting up a leaderboard using PHP/MySQL	236
Chapter 8: Working with External Text Files and XML Data	243
Introduction	243
Loading external text files using the TextAsset public variable	244
Loading external text files using C# file streams	245
Saving external text files with C# file streams	248
Loading and parsing external XML files	249
Creating XML text data manually using XMLWriter	252
Creating XML text data automatically through serialization	256
Creating XML text files – saving XML directly to text files	
with XMLDocument.Save()	261
Chapter 9: Managing Object States	
and Controlling Their Movements	265
Introduction	266
Controlling cube movement through player controls	266
Controlling object look-at behavior	270
Controlling object-to-object movements	
(seek, flee, follow at a distance)	272
Controlling object group movement through flocking	279
Firing objects by instantiation with forward velocity	285
Finding a random spawn point	290

Finding the nearest spawn point	292
Following waypoints in a sequence	
Managing object behavior with states	
Managing complex object behavior with the state pattern	302
Chapter 10: Improving Games with Extra Features	
and Optimization	309
Introduction	309
Pausing the game	310
Implementing slow motion	312
Implementing 3D stereography with polarized projection	316
Preventing your game from running on unknown servers	321
Identifying performance "bottlenecks" with code profiling	324
Reducing the number of objects by destroying objects	
at a "death" time	326
Reducing the number of enabled objects by disabling objects	
whenever possible	328
Improving efficiency with delegates and events	
(and avoiding SendMessage!)	332
Executing methods regularly but independent of	
frame rate with coroutines	335
Spreading long computations over several frames with coroutines	337
Caching, rather than component lookups and "reflection"	
over objects	339
Chapter 11: Taking Advantage of Unity Pro	345
Introduction	345
Dynamically focusing objects with Depth of Field	345
Creating a rearview mirror	348
Playing videos inside a scene	352
Simulating underwater ambience with audio filters	354
Loading and playing external movie files	357
Index	361
