

Detailed Contents

Preface	xv
About the Author	xvii
PART 1: EMOTION THEORIES FROM ANTIQUITY TO MODERNITY	1
1 The Passions of the Soul: Early Emotion Theories	2
Ancient Greece and the Early Roman Empire	2
The Classical Period	3
The Hellenistic Period	5
The Roman Period	6
Greek Ideas Still Reflected in Modern Thinking	6
The Renaissance and Post-Renaissance Period	7
(R)evolutionary Ideas of the 19th Century	11
Establishment of Psychology as a Discipline and Emotions as a Topic for Psychological Inquiry	15
Summary	18
Thinking Critically About "Early Emotion Theories"	18
2 Brain and Thought Processes as Antecedents to Emotion: Emotion Theories of the 20th Century	20
Brain Processes as the Basis for Emotions	20
Cannon's Emotion Theory	20
The Papez Circuit	21
The Limbic System Theory	24
Theory Development	24
Theory Application	27
Critique of the Limbic System Theory and Recent Developments	28
Neuroanatomical Issues	28
Neurofunctional Issues	28
Conceptual Issues	31
Thoughts as the Basis for Emotions	32
Historical Background	32
Thoughts Disambiguate Unspecific Bodily Arousal	32

Thoughts Create Bodily Arousal	35
Defying Thought	38
Merging Brain and Thought	39
Summary	40
Thinking Critically About “Emotion Theories of the 20th Century”	41

3 What Is an Emotion? Modern Thoughts and Concepts 42

The Categorical Approach—Emotions as Discrete Entities	42
Historical Background	42
An Example—Ekman’s Basic Emotions	43
Support for the Categorical Approach	47
Limitations of the Categorical Approach	48
The Dimensional Approach—Emotions as Instances in a Multidimensional Space	50
Historical Background	50
An Example—Circumplex Model and Core Affect	53
Support for the Dimensional Approach	55
Limitations of the Dimensional Approach	57
The Appraisal Approach—Emotions as a Result of Appraisal Processes	58
Historical Background	58
An Example—Component Process Model of Appraisal	59
Support for the Appraisal Approach	62
Limitations of the Appraisal Approach	65
Summary and Outlook	68
Thinking Critically About “What Is an Emotion?”	69

PART 2: FOUNDATIONS FOR EMOTION RESEARCH 71

4 Biological Foundations 73

Nervous System	74
Cell Types and Their Function	74
Neurons	74
Glia	77
Central Nervous System	78
Spinal Cord	79
Brain	79
Peripheral Nervous System	83
Autonomic Nervous System	83
Genetic and Epigenetic Regulation of Brain Structure and Function	85
A Biological Basis for Emotions	87
Important Brain Structures	87
Amygdala	87
Insula	89

Anterior Cingulate	90
Medial Prefrontal Cortex	93
Stimulus and Task-Dependent Emotional Processing	93
Important Chemical Messengers	94
Oxytocin	95
Monoamines	96
Opioids	99
Summary	99
Thinking Critically About "Biological Foundations of Emotions"	100

5 Methodological Foundations I: Eliciting Emotions **102**

Laboratory Constraints on Emotion Elicitation	102
Popular Methods of Emotion Elicitation	105
Unconditioned and Conditioned Stimuli	105
On the Nature of Unconditioned Stimuli	105
On the Nature of Conditioned Stimuli	107
Typical Unconditioned and Conditioned Stimuli Used in Human Research	110
Autobiographical Memories	116
Behavioral Responses as Emotion Stimuli	118
Electrical Brain Stimulation	120
Emotion Elicitation in the Context of Current Emotion Theories	122
Summary	122
Thinking Critically About "Eliciting Emotions"	123

6 Methodological Foundations II: Exploring Emotions **125**

Behavioral Correlates of Emotions	125
Implicit Explorations of Behavior	126
Gross Behaviors	126
Nonverbal Expression	127
Psychological Tasks	129
Explicit Explorations of Behavior	131
Pros and Cons of Implicit and Explicit Exploration Techniques	133
Peripheral Correlates of Emotions	134
Heart Rate	134
Electrodermal Activity	137
Brain Correlates of Emotions	138
Lesion Studies	138
Techniques to Influence Brain Function	141
Techniques to Assess Electrical Brain Activity	142
Techniques to Assess Brain Metabolism	145
Summary	149
Thinking Critically About "Exploring Emotions"	150

PART 3: EMOTIONS

151

7

Joy and Positive Emotions

152

How Many Positive Emotions Are There?	154
What Triggers Joy?	155
Feeling Joy—Behavioral Tendencies, Mental Processes, and Bodily Correlates	157
Behavioral Tendencies	158
Mental Processes	160
Bodily Correlates	163
Peripheral Correlates	163
Central Nervous System Correlates	164
Mechanisms	169
Why Do We Feel Joy?	172
Can Feeling Good Be Bad?	174
Summary	176
Thinking Critically About “Joy”	177

8

Sadness

178

What Triggers Sadness?	178
Feeling Sad—Behavioral Tendencies, Mental Processes, and Bodily Correlates	179
Behavioral Tendencies	180
Mental Processes	183
Bodily Correlates	184
Peripheral Correlates	185
Central Nervous System Correlates	185
Mechanisms	192
Why Do We Feel Sad?	195
When Sadness Becomes a Problem	197
Depression	197
Treatment Approaches for Depression	198
Summary	201
Thinking Critically About “Sadness”	202

9

Fear

204

What Triggers Fear?	204
Feeling Fearful—Behavioral Tendencies, Mental Processes, and Bodily Correlates	205
Behavioral Tendencies	206
Mental Processes	209
Bodily Correlates	213
Peripheral Correlates	213
Central Nervous System Correlates	216
Mechanisms	220

Why Do We Feel Fear?	222
When Fear Becomes a Problem	222
Anxiety Disorders	222
Treatment Approaches for Phobias	223
Summary	227
Thinking Critically About "Fear"	228

PART 4: EMOTIONS AND OTHER MENTAL PROCESSES 231

10 Emotion Effects on Cognition 233

How Emotional Events Modulate Attention	234
Attentional Mechanisms	234
Emotions and Attention	237
Behavioral Insights	237
Insights From Brain Research	238
Mechanisms	240
How Emotional Events Modulate Memory	242
Memory Processes and Types	242
Emotions and Memory	243
Behavioral Insights	243
Insights From Brain Research	245
Mechanisms	247
How Emotional Events Modulate Higher-Order Cognitive Processes	251
Language and Categorization	251
Behavioral Observations	251
Mechanisms	252
Time Perception	254
Behavioral Observations	254
Mechanisms	255
Decision Making	257
Behavioral Observations	257
Mechanisms	258
Summary	261
Thinking Critically About "Emotion Effects on Cognition"	262

11 Emotion Regulation 263

Why Regulate? The Functions of Emotion Regulation	264
Emotion Regulation Strategies	265
Attentional Deployment	265
Cognitive Change	268
Response Modulation	270

Principles That Govern the Use and Usefulness of Emotion Regulation	272
Factors Associated With the Event	272
Factors Associated With the Individual	274
Brain Mechanisms That Support Emotion Regulation	276
Emotion Regulation and Mental Health	279
Why Do Depressed Individuals Regulate Differently?	279
Are Differences in Emotion Regulation Cause or Consequence of Depression?	280
Challenges and Future Directions of Emotion Regulation Research	281
Conceptual Challenges	281
Strategy Terminology	281
Strategy Categorization	281
What Is Emotion Regulation?	282
Methodological Challenges	283
What Strategy?	283
Emotion Regulation in Other Species	283
Summary	285
Thinking Critically About “Emotion Regulation”	286

PART 5: INTRA- AND INTER-INDIVIDUAL DIFFERENCES IN EMOTION 287

12 Emotions Across the Life Span 289

Early Infancy and Childhood	290
Attachment	290
Caring About Mother	290
Making Mother Care	292
Exploration	298
Emotion Regulation	300
Attentional Deployment	300
Response Modulation	301
Getting Help	302
Adolescence and Young Adulthood	303
Gaining Independence	303
Bonding—From Parents to Peers	303
More Exploration—A Risky Business	305
Finding Love	306
Mate Choice	306
Mate Attachment	309
Late Adulthood and Aging	311
Socioemotional Selectivity Theory	312
Caring About the “Here and Now”	313
The Positivity Effect	313
Functional Decline Affects Emotions	316
Summary	317
Thinking Critically About “Emotions Across the Life Span”	318

13 Emotions and Sex Differences **320**

What Is Sex? The Origins of Sexual Differentiation	321
Does Sex Matter for Emotions?	323
Theoretical Positions	323
Gendered Minds Position	323
Sex-Typed Minds Position	326
Merging Positions	328
Factors Relevant for Sex Differences in Emotion	328
Environment	328
Genes	330
Sex and the Brain	331
Sex Differences in Emotion	334
Emotion Elicitation—How Sex Shapes the Appraisal of Emotion Antecedents	334
Emotional Response—How Sex Shapes Emotions in Mind, Body, and Behavior	339
Mental Responses	339
Bodily Responses	342
Behavioral Responses	345
Emotion Regulation—How Sex Shapes an Individual's Attempts to Manage Emotions	348
Challenges for Research on Sex Differences in Emotion	349
Summary	353
Thinking Critically About “Emotions and Sex Differences”	354

14 Emotions and Culture **355**

What Is Culture?	355
Answers From Cultural and Evolutionary Anthropology	355
Issues With Accepting the Evolutionary Approach	356
A Holistic Definition of Culture	357
Does Culture Matter for Emotions?	359
Theoretical Positions	359
Some Environmental Conditions Relevant to Culture and Cultured Emotions	360
The Cultured Brain	367
Psychological Dimensions of Culture	369
Independence and Interdependence as Cultural Characteristics	369
Caveats of the Independence–Interdependence Dimension	371
Cultural Differences in Emotion	371
Emotion Elicitation—How Culture Shapes the Appraisal of Emotion Antecedents	372
Novelty	373
Goal Conduciveness	376
Causality and Other Appraisals	377
Emotional Response—How Culture Shapes Emotions in Mind, Body, and Behavior	377
Mental Responses	378

Bodily Responses	380
Behavioral Responses	380
Emotion Regulation—How Culture Shapes an Individual's Attempts to Manage Emotions	382
Summary	383
Thinking Critically About "Emotions and Culture"	384
References	385
Glossary	446
Author Index	461
Subject Index	493
