

# CONTENTS

VOL. 49 (2006)

<b>Foreword</b> .....	3
<b>Shirley Louise Donovan: Prof. Desmond T. Donovan</b> .....	5
<b>Alexander Arkhipkin and Vladimir Laptikhovsky: Allopatric speciation of the teuthid fauna on the shelf and slope of Northwest Africa</b> .....	15
<b>Klaus Bandel and Wolfgang Stinnesbeck: Naefia Wetzel 1930 from the Quiriquina Formation (Late Maastrichtian, Chile): relationship to modern <i>Spirula</i> and ancient Coleoidea (Cephalopoda)</b> ....	21
<b>Sigurd von Boletzky: From head to foot – and back again: Brachial crown development in the Coleoidea (Mollusca, Cephalopoda)</b> .....	33
<b>Janek von Byern, Livia Rudoll, Daniela Gruber and Waltraud Klepal: Comparison of adhesive organ of <i>Idiosepius</i> sp. and <i>Euprymna scolopes</i></b> .....	43
<b>Janek von Byern: Pharmacological and histochemical examination of the Vena cephalica of <i>Sepia officinalis</i> L. (Cephalopoda)</b> .....	49
<b>Larisa A. Doguzhaeva, Royal H. Mapes and Elena Dunca: A Late Carboniferous adolescent cephalopod from Texas (USA), with a short rostrum and a long body chamber</b> .....	55
<b>Larisa A. Doguzhaeva, Herbert Summesberger and Harry Mutvei: An unique Upper Triassic Coleoid from the Austrain Alps reveals pro-ostracum and mandibule ultrastructure</b> .....	69
<b>Larisa A. Doguzhaeva and Harry Mutvei: Ultrastructural and chemical comparison between gladii in living coleoids and Aptian coleoids from Central Russia</b> .....	83
<b>Larisa A. Doguzhaeva, Desmond T. Donovan and Harry Mutvei: Ultrastructure of <i>Belemnotheutis</i> from the Oxford Clay (Callovian) England, as a key for elucidating the origin of the pro-ostracum</b> .....	95
<b>Elena Dunca, Larisa A. Doguzhaeva, Bernd R. Schöne and Bas van de Schootbrugge: Growth patterns in rostra of the Middle Jurassic belemnite <i>Megateuthis giganteus</i>: controlled by the moon?</b> .....	107
<b>Dirk Fuchs: Did ancestral Decabrachia possess a pro-ostracum in their body plan?</b> .....	119
<b>Vicente Hernández García, Fernando Bordes Caballero and Eduardo Almonacid: Can the bathymetric distribution of cephalopods be studied with commercial fishing gears?</b> .....	129
<b>Martin Košťák and Frank Wiese: Remarks to geographic distribution and phylogeny of the Upper Cretaceous belemnite genus <i>Praeactinocamax</i> Naidin</b> .....	135
<b>Michael J. Kuba, Letizia Zullo, Ruth A. Byrne and Binyamin Hochner: Visual habituation in the common octopus (<i>Octopus vulgaris</i>)</b> .....	141
<b>Sylvia Nürnberger, Shuichi Shigeno and Janek von Byern: Distribution pattern of a minimalist – New records for <i>Idiosepius biserialis</i> (Idiosepiidae, Cephalopoda)</b> .....	145
<b>Mikhail Rogov and Vyacheslav Bizikov: New data on Middle Jurassic – Lower Cretaceous Belemnotheutidae from Russia. What can shell tell about the animal and its mode of life</b> .....	149
<b>Jitima Suwanmala, Janek von Byern and Jaruwat Nabhitabhata: Observation of <i>Idiosepius pygmaeus</i> (Cephalopoda, Idiosepiidae) at Bangrong River, Phuket Island, Thailand</b> .....	165
<b>Pavel Svoboda: Hercynian Cretaceous and “<i>plenus</i> event”</b> .....	169
<b>Robert Weis and Dominique Delsate: The earliest belemnites: New records from the Hettangian of Belgium and Luxembourg</b> .....	181
