

# Content

<b>INTRODUCTION</b> .....	6
<b>1 CURRENT STATE OF VOICE PROCESSING RESEARCH</b> .....	7
1.1 THE MAIN RESEARCH FIELDS OF HUMAN VOICE AND SPEECH.....	7
1.1.1 <i>Speech synthesis</i> .....	7
1.1.2 <i>Voice and speech analysis</i> .....	7
1.2 THE BASIC VARIANTS OF VOICE IDENTIFICATION.....	8
1.2.1 <i>"Text-Dependent" and "Text-Prompted" identification</i> .....	8
1.2.2 <i>"Text-Independent" identification</i> .....	8
1.3 VOICE IDENTIFICATION.....	9
1.3.1 <i>Voice recording and coding</i> .....	9
1.3.2 <i>Features extraction</i> .....	9
1.3.3 <i>Features processing</i> .....	10
<b>2 AIMS OF THE DISSERTATION</b> .....	11
<b>3 PROGRESS OF RESEARCH IN THE CONTEXT OF THE THESIS</b> .....	12
3.1 MOTIVATION AND INITIAL CONSIDERATIONS.....	12
3.2 METHODS USED IN VOICE PROCESSING EXPERIMENTS.....	12
3.2.1 <i>Recording and preparation of voice samples</i> .....	13
3.2.2 <i>Cepstral analysis</i> .....	13
3.2.3 <i>Autocorrelation method</i> .....	15
3.2.4 <i>Relation of short-term energy to the zero-crossing rate</i> .....	16
3.2.5 <i>Verification of the voice segment type determination</i> .....	17
<b>4 RESULTS OF THE DISSERTATION</b> .....	19
4.1 HARMONIC SPECTRUM.....	19
4.2 DESIGN OF THE EXTRACTION PROCESS.....	19
4.2.1 <i>Segmentation</i> .....	19
4.2.2 <i>Determination of the segment type</i> .....	19
4.2.3 <i>Spectrum</i> .....	20
4.2.4 <i>Cepstrum calculation and fundamental frequency determination</i> .....	21
4.2.5 <i>Harmonic spectrum vector</i> .....	21
4.3 RESULTS OF PROPOSED METHOD TESTING.....	22
<b>5 BENEFITS OF THE DISSERTATION</b> .....	25
<b>CONCLUSION</b> .....	27
<b>REFERENCES</b> .....	28
<b>LIST OF PAPERS PUBLISHED BY AUTHOR</b> .....	30
