

CONTENTS

1	ANALYZING ECONOMIC PROBLEMS	1
1.1	Why Study Microeconomics?	3
1.2	Three Key Analytical Tools	4
	Constrained Optimization	5
	■ Learning-By-Doing Exercise 1.1	6
	Equilibrium Analysis	9
	Comparative Statics	11
	■ Learning-By-Doing Exercise 1.2	13
1.3	Positive and Normative Analysis	14
	Chapter Summary	17
	Problems	17
2	DEMAND AND SUPPLY ANALYSIS	21
2.1	Demand, Supply, and Market Equilibrium	23
	Demand Curves	24
	■ Learning-By-Doing Exercise 2.1	25
	Supply Curves	25
	■ Learning-By-Doing Exercise 2.2	26
	Market Equilibrium	27
	Shifts in Supply and Demand	27
	■ Learning-By-Doing Exercise 2.3	28
	■ Learning-By-Doing Exercise 2.4	30
2.2	Price Elasticity of Demand	34
	■ Learning-By-Doing Exercise 2.5	37
	Elasticities Along Specific Demand Curves	37
	Price Elasticity of Demand and Total Revenue	39
	Determinants of the Price Elasticity of Demand	39
	Market-Level versus Brand-Level Price Elasticities of Demand	40
2.3	Other Elasticities	42
	Income Elasticity of Demand	42
	Cross-Price Elasticity of Demand	43
	Price Elasticity of Supply	44
2.4	Elasticity in the Long Run versus the Short Run	45
	Greater Elasticity in the Long Run than in the Short Run	45
	Greater Elasticity in the Short Run than in the Long Run	46
2.5	Back-of-the-Envelope Calculations	47
	Fitting Linear Demand Curves Using Quantity, Price, and Elasticity Information	48

Identifying Supply and Demand Curves on the Back of an Envelope	49
Identifying the Price Elasticity of Demand from Shifts in Supply	51
Chapter Summary	54
Problems	55
Appendix: Price Elasticity of Demand Along a Constant Elasticity Demand Curve	58

3 CONSUMER PREFERENCES AND THE CONCEPT OF UTILITY 59

3.1 Representations of Preferences	61
Assumptions About Consumer Preferences	61
Ordinal and Cardinal Ranking	63
3.2 Utility Functions	63
Preferences with a Single Good: The Concept of Marginal Utility	64
Preferences with Multiple Goods: Marginal Utility, Indifference Curves, and the Marginal Rate of Substitution	67
■ Learning-By-Doing Exercise 3.1	68
■ Learning-By-Doing Exercise 3.2	69
■ Learning-By-Doing Exercise 3.3	74
■ Learning-By-Doing Exercise 3.4	75
3.3 Special Preferences	76
Perfect Substitutes	76
Perfect Complements	77
The Cobb–Douglas Utility Function	78
Quasilinear Utility Functions	78
Chapter Summary	80
Problems	81

4 CONSUMER CHOICE 83

4.1 The Budget Constraint	85
How does a Change in Income Affect the Budget Line?	86
How does a Change in Price Affect the Budget Line?	87
■ Learning-By-Doing Exercise 4.1	88
4.2 Optimal Choice	89
Using the Tangency Condition to Understand When a Basket Is Not Optimal	91
■ Learning-By-Doing Exercise 4.2	92
Finding an Optimal Consumption Basket	92
Two Ways of Thinking about Optimality	92
Corner Points	94
■ Learning-By-Doing Exercise 4.3	95
4.3 Consumer Choice with Composite Goods	96
Application: Coupons and Cash Subsidies	97
Application: Joining a Club	100
Application: Borrowing and Lending	101
Application: Quantity Discounts	103
4.4 Revealed Preference	105
Are Observed Choices Consistent with Utility Maximization?	106

- *Learning-By-Doing Exercise* 4.4 107
- *Learning-By-Doing Exercise* 4.5 109

Chapter Summary 110

Problems 111

Appendix 1: The Mathematics of Consumer Choice 114

Appendix 2: The Time Value of Money 115

Future Value and Present Value 115

Net Present Value 118

Present Value, Future Value, and the Optimal Consumption Choice

Problem 118

5 THE THEORY OF DEMAND 121

5.1 Optimal Choice and Demand 122

The Effects of a Change in Price 123

The Effects of a Change in Income 126

■ *Learning-By-Doing Exercise* 5.1 129

The Effects of a Change in Price or Income: An Algebraic Approach 130

■ *Learning-By-Doing Exercise* 5.2 130

5.2 Change in the Price of a Good: Substitution Effect and Income Effect 131

The Substitution Effect 132

The Income Effect 132

Income and Substitution Effects When Goods are not Normal 134

■ *Learning-By-Doing Exercise* 5.3 136

■ *Learning-By-Doing Exercise* 5.4 138

5.3 Change in the Price of a Good: The Concept of Consumer Surplus 139

Understanding Consumer Surplus from the Demand Curve 140

■ *Learning-By-Doing Exercise* 5.5 141

Understanding Consumer Surplus from the Optimal Choice Diagram:

Compensating Variation and Equivalent Variation 141

■ *Learning-By-Doing Exercise* 5.6 144

■ *Learning-By-Doing Exercise* 5.7 146

5.4 Market Demand 147

Market Demand with Network Externalities 149

5.5 The Choice of Labor and Leisure 152

As Wages Rise, Leisure First Decreases, Then Increases 152

The Backward-Bending Supply of Labor 153

5.6 Consumer Price Indices 156

Chapter Summary 159

Problems 160

6 INPUTS AND PRODUCTION FUNCTIONS 163

6.1 Introduction to Inputs and Production Functions 164

6.2 Production Functions with a Single Input 167

Total Product Functions 167

Marginal and Average Product 168

Relationship between Marginal and Average Product 169

- 6.3 Production Functions with More Than One Input 172
 - Total Product and Marginal Product with Two Inputs 172
 - Isoquants 174
 - Economic and Uneconomic Regions of Production 176
 - Learning-By-Doing Exercise 6.1 177
 - Marginal Rate of Technical Substitution 178
 - Learning-By-Doing Exercise 6.2 180
- 6.4 Substitutability Among Inputs 180
 - Describing a Firm's Input Substitution Opportunities Graphically 180
 - Elasticity of Substitution 181
 - Learning-By-Doing Exercise 6.3 182
 - Special Production Functions 184
- 6.5 Returns to Scale 188
 - Definitions 189
 - Learning-By-Doing Exercise 6.4 190
 - Returns To Scale Versus Diminishing Marginal Returns 190
- 6.6 Technological Progress 191
 - Learning-By-Doing Exercise 6.5 193
- Chapter Summary 195
- Problems 196
- Appendix: The Elasticity of Substitution for a Cobb–Douglas Production Function 199

7 COSTS AND COST MINIMIZATION 201

- 7.1 Cost Concepts for Decision Making 202
 - Opportunity Cost 203
 - Economic Versus Accounting Costs 204
 - Learning-By-Doing Exercise 7.1 207
- 7.2 The Cost-Minimization Problem 208
 - Long Run Versus Short Run 208
 - The Long-Run Cost-Minimization Problem 209
 - Isocost Lines 209
 - Graphical Characterization of the Solution to the Long-Run Cost-Minimization Problem 210
 - Learning-By-Doing Exercise 7.2 212
 - Corner Point Solutions 212
- 7.3 Comparative Statics Analysis of the Cost-Minimization Problem 213
 - Comparative Statics Analysis of Changes in Input Prices 214
 - Comparative Statics Analysis of Changes in Output 217
 - Summarizing the Comparative Statics Analysis: The Input Demand Curves 218
 - The Price Elasticity of Demand for Inputs 219
 - Learning-By-Doing Exercise 7.3 220
- 7.4 Short-Run Cost Minimization 222
 - Characterizing Costs in the Short Run 222

Cost Minimization in the Short Run	224
Comparative Statics: Short-Run Input Demand Versus Long-Run Input Demand	225
■ Learning-By-Doing Exercise 7.4	225
More Than One Variable Input in The Short Run	226
■ Learning-By-Doing Exercise 7.5	227
Chapter Summary	228
Problems	229
Appendix: Advanced Topics in Cost Minimization	232
Solving the Cost-Minimization Problem Using the Mathematics of Constrained Optimization	233
Duality: "Backing Out" The Production Function from the Input Demand Functions	234

8 COST CURVES 235

8.1 Long-Run Cost Curves	236
Long-Run Total Cost Curve	236
■ Learning-By-Doing Exercise 8.1	237
How Does the Long-Run Total Cost Curve Shift When Input Prices Change?	238
Long-Run Average and Marginal Cost Curves	240
■ Learning-By-Doing Exercise 8.2	243
8.2 Short-Run Cost Curves	249
Short-Run Total Cost Curve	249
■ Learning-By-Doing Exercise 8.3	249
Relationship Between the Long-Run and the Short-Run Total Cost Curves	250
Short-Run Average and Marginal Cost Curves	251
Relationships Between the Long-Run and the Short-Run Average and Marginal Cost Curves	252
When Are Long-Run and Short-Run Average and Marginal Costs Equal and When Are They Not?	253
■ Learning-By-Doing Exercise 8.4	254
8.3 Special Topics in Cost	255
Economies of Scope	255
Economies of Experience: The Experience Curve	257
8.4 Estimating Cost Functions	259
Constant Elasticity Cost Function	260
Translog Cost Function	260
Chapter Summary	261
Problems	262
Appendix: Shephard's Lemma and Duality	264
What Is Shephard's Lemma?	264
Duality	265
Proof of Shephard's Lemma	266

9 PERFECTLY COMPETITIVE MARKETS 267

-
- 9.1 What Is Perfect Competition? 269
 - 9.2 Profit Maximization by a Price-Taking Firm 270
 - Economic Profit Versus Accounting Profit 272
 - The Profit-Maximizing Output Choice for a Price-Taking Firm 274
 - 9.3 How the Market Price Is Determined: Short-Run Equilibrium 276
 - The Price-Taking Firm's Short-Run Cost Structure 278
 - Short-Run Supply Curve for a Price-Taking Firm When All Fixed Costs Are Sunk 278
 - *Learning-By-Doing Exercise 9.1* 280
 - Short-Run Supply Curve for a Price-Taking Firm When Some Fixed Costs Are Sunk and Some Are Nonsunk 281
 - Short-Run Market Supply Curve 282
 - *Learning-By-Doing Exercise 9.2* 283
 - Short-Run Perfectly Competitive Equilibrium 286
 - *Learning-By-Doing Exercise 9.3* 287
 - Comparative Statics Analysis of the Short-Run Equilibrium 287
 - 9.4 How the Market Price Is Determined: Long-Run Equilibrium 290
 - Long-Run Output and Plant-Size Adjustments by Established Firms 290
 - The Firm's Long-Run Supply Curve 291
 - Free Entry and Long-Run Perfectly Competitive Equilibrium 292
 - *Learning-By-Doing Exercise 9.4* 293
 - Long-Run Market Supply Curve 293
 - Constant-Cost, Increasing-Cost, and Decreasing-Cost Industries 295
 - What Does Perfect Competition Teach Us? 303
 - 9.5 Economic Rent and Producer Surplus 303
 - Economic Rent 303
 - Producer Surplus 307
 - *Learning-By-Doing Exercise 9.5* 310
 - Economic Profit, Producer Surplus, Economic Rent 312
 - Chapter Summary 312
 - Problems 313
 - Appendix: Profit Maximization Implies Cost Minimization 317
-

10 COMPETITIVE MARKETS: APPLICATIONS 319

-
- 10.1 The Invisible Hand, Excise Taxes, and Subsidies 320
 - The Invisible Hand 321
 - Excise Taxes 322
 - *Learning-By-Doing Exercise 10.1* 325
 - Incidence of a Tax 326
 - Subsidies 329
 - *Learning-By-Doing Exercise 10.2* 331
 - 10.2 Price Ceilings and Floors 332
 - Price Ceilings 332
 - *Learning-By-Doing Exercise 10.3* 338
 - *Learning-By-Doing Exercise 10.4* 342

- 10.3 Production Quotas 344
 - *Learning-By-Doing Exercise 10.5* 347
- 10.4 Price Supports in the Agricultural Sector 348
 - Acreage Limitation Programs 348
 - Government Purchase Programs 350
- 10.5 Import Quotas and Tariffs 352
 - Quotas 352
 - Tariffs 354
 - *Learning-By-Doing Exercise 10.6* 357
- Chapter Summary 358
- Problems 359

11 MONOPOLY AND MONOPSONY 363

- 11.1 Profit Maximization by a Monopolist 364
 - The Profit-Maximization Condition 365
 - A Closer Look at Marginal Revenue: Marginal Units and Inframarginal Units 368
 - Average Revenue and Marginal Revenue 369
 - *Learning-By-Doing Exercise 11.1* 371
 - The Profit-Maximization Condition Shown Graphically 371
 - *Learning-By-Doing Exercise 11.2* 372
 - A Monopolist Does Not Have a Supply Curve 373
- 11.2 The Importance of Price Elasticity of Demand 373
 - Price Elasticity of Demand and the Profit-Maximizing Price 373
 - Marginal Revenue and Price Elasticity of Demand 374
 - Marginal Cost and Price Elasticity of Demand: The Inverse Elasticity Pricing Rule 375
 - *Learning-By-Doing Exercise 11.3* 376
 - The Monopolist Always Produces on the Elastic Region of the Market Demand Curve 377
 - The IEPR Applies Not Only to Monopolists 378
 - Quantifying Market Power: The Lerner Index 379
- 11.3 Comparative Market Statics for Monopolists 380
 - Shifts in Market Demand 381
 - *Learning-By-Doing Exercise 11.4* 382
 - Shifts in Marginal Cost 383
- 11.4 Monopoly with Multiple Plants and Markets 385
 - Output Choice with Two Plants 385
 - Output Choice with Two Markets 386
 - *Learning-By-Doing Exercise 11.5* 387
 - Profit Maximization by a Cartel 387
- 11.5 The Welfare Economics of Monopoly 389
 - The Monopoly Equilibrium Differs from the Perfectly Competitive Equilibrium 390
 - Monopoly Deadweight Loss 390
 - Rent-Seeking Activities 392
- 11.6 Why Do Monopoly Markets Exist? 392
 - Natural Monopoly 392
 - Barriers to Entry 393

11.7	Monopsony	395
	The Monopsonist's Profit-Maximization Condition	395
	■ <i>Learning-By-Doing Exercise 11.6</i>	397
	An Inverse Elasticity Pricing Rule for Monopsony	397
	■ <i>Learning-By-Doing Exercise 11.7</i>	399
	Monopsony Deadweight Loss	399
	Chapter Summary	400
	Problems	401
12	CAPTURING SURPLUS	405
12.1	Capturing Surplus	407
12.2	First-Degree Price Discrimination: Making the Most from Each Consumer	409
	■ <i>Learning-By-Doing Exercise 12.1</i>	411
	■ <i>Learning-By-Doing Exercise 12.2</i>	412
12.3	Second-Degree Price Discrimination: Quantity Discounts	413
	Block Pricing	414
	■ <i>Learning-By-Doing Exercise 12.3</i>	416
	Subscription and Usage Charges	417
12.4	Third-Degree Price Discrimination: Different Prices for Different Market Segments	420
	Two Different Segments, Two Different Prices	420
	■ <i>Learning-By-Doing Exercise 12.4</i>	421
	Screening	422
	Third-Degree Price Discrimination with Capacity Constraints	423
	■ <i>Learning-By-Doing Exercise 12.5</i>	424
	Implementing the Scheme of Price Discrimination: Building "Fences"	424
12.5	Tying (Tie-in Sales)	429
	Bundling	430
	Mixed Bundling	431
12.6	Advertising	433
	■ <i>Learning-By-Doing Exercise 12.6</i>	436
	Chapter Summary	437
	Problems	437
13	MARKET STRUCTURE AND COMPETITION	441
13.1	Describing and Measuring Market Structure	442
13.2	Oligopoly with Homogeneous Products	445
	The Cournot Model of Oligopoly	445
	■ <i>Learning-By-Doing Exercise 13.1</i>	448
	■ <i>Learning-By-Doing Exercise 13.2</i>	452
	The Bertrand Model of Oligopoly	453
	Why Are the Cournot and Bertrand Equilibria Different?	454
	The Stackelberg Model of Oligopoly	455

- 13.3 Dominant Firm Markets 457
 ■ *Learning-By-Doing Exercise* 13.3 459
- 13.4 Oligopoly with Horizontally Differentiated Products 460
 What Is Product Differentiation? 460
 Bertrand Price Competition with Horizontally Differentiated Products 462
 ■ *Learning-By-Doing Exercise* 13.4 465
- 13.5 Monopolistic Competition 467
 Short-Run and Long-Run Equilibrium in Monopolistically Competitive Markets 467
 Price Elasticity of Demand, Margins, and Number of Firms in the Market 468
 Do Prices Fall When More Firms Enter? 469
- Chapter Summary 470
 Problems 471
 Appendix: The Cournot Equilibrium and the Inverse Elasticity Pricing Rule 475

14 GAME THEORY AND STRATEGIC BEHAVIOR 477

- 14.1 The Concept of Nash Equilibrium 478
 A Simple Game 478
 The Nash Equilibrium 479
 The Prisoners' Dilemma 479
 Dominant and Dominated Strategies 480
 ■ *Learning-By-Doing Exercise* 14.1 483
 Games With More Than One Nash Equilibrium 484
 Mixed Strategies 485
 ■ *Learning-By-Doing Exercise* 14.2 486
 Summary: How to Find All the Nash Equilibria in a Simultaneous-Move Game with Two Players 487
- 14.2 The Repeated Prisoners' Dilemma 488
- 14.3 Sequential-Move Games and Strategic Moves 493
 Analyzing Sequential-Move Games 493
 ■ *Learning-By-Doing Exercise* 14.3 494
 The Strategic Value of Limiting One's Options 496
- Chapter Summary 498
 Problems 499

15 RISK AND INFORMATION 505

- 15.1 Describing Risky Outcome 506
 Lotteries and Probabilities 507
 Expected Value 508
 Variance 509
- 15.2 Evaluating Risky Outcomes 511
 Utility Functions and Risk Preferences 511
 ■ *Learning-By-Doing Exercise* 15.1 514
 Risk-Neutral and Risk-Loving Preferences 515
 ■ *Learning-By-Doing Exercise* 15.2 516

15.3	Bearing and Eliminating Risk	517
	Risk Premium	517
	■ <i>Learning-By-Doing Exercise</i> 15.3	519
	When Would a Risk-Averse Person Choose to Eliminate Risk? The Demand for Insurance	520
	■ <i>Learning-By-Doing Exercise</i> 15.4	521
	Asymmetric Information: Moral Hazard and Adverse Selection	522
15.4	Analyzing Risky Decisions	527
	Decision Tree Basics	528
	Decision Trees with a Sequence of Decisions	529
	■ <i>Learning-By-Doing Exercise</i> 15.5	531
	The Value of Information	533
15.5	Auctions	534
	Types of Auctions and Bidding Environments	535
	Auctions When Bidders Have Private Values	535
	■ <i>Learning-By-Doing Exercise</i> 15.6	537
	Auctions When Bidders Have Common Values: The Winner's Curse	540
	Chapter Summary	543
	Problems	543

16 GENERAL EQUILIBRIUM THEORY 547

16.1	General Equilibrium Analysis: Two Market	549
	■ <i>Learning-By-Doing Exercise</i> 16.1	552
16.2	General Equilibrium Analysis: Many Market	552
	The Origins of Supply and Demand in a Simple Economy	552
	The General Equilibrium in Our Simple Economy	558
	Walras' Law	560
	■ <i>Learning-By-Doing Exercise</i> 16.2	561
16.3	General Equilibrium Analysis: Comparative Statics	562
16.4	The Efficiency of Competitive Markets	565
	What Is Economic Efficiency?	566
	Exchange Efficiency	566
	■ <i>Learning-By-Doing Exercise</i> 16.3	570
	Input Efficiency	571
	Substitution Efficiency	573
	Pulling the Analysis Together: The Fundamental Theorems of Welfare Economics	575
16.5	Gains from Free Trade	578
	Free Trade Is Mutually Beneficial	578
	Comparative Advantage	581
	Chapter Summary	582
	Problems	583
	Appendix: Deriving the Demand and Supply Curves for General Equilibrium in Figure 16.10 and <i>Learning-By-Doing Exercise</i> 16.2	585
