

## DETERIORATION, DEPENDABILITY, DIAGNOSTICS 2014

### Contents

Contents .....	5
Preface.....	7
KEY NOTES .....	11
Development of vehicle hybrid powertrain systems.....	13
Methodology of vehicle to child pedestrian/cyclist Collision Tests .....	21
I. DETERIORATION .....	29
Analyzing of fatigue degradation of damask steel.....	31
Degradation surface of machine shaft due to machining technology .....	39
Tribo-fatigue diagnostics of mechanical systems .....	49
II. DEPENDABILITY .....	59
Safety evaluation of parallel, standby, and NMR systems .....	61
Identification risks and aggregate evaluation of risks project by means of simulation .....	69
The screening of phthalic acid esters in the harder plastics coats of steering wheel .....	75
Application computational and simulation methods for modernization military mobile technics.....	79
Possibilities how to solve an unmanned ground mobile vehicle .....	89
Model used for spare parts stock management when maintaining vehicles .....	97
To the analysis of deterministic phenomena of internal dynamics of kinematic pairs – cogwheels of planetary systems .....	107
Assessment of the mission risk based on parametric risk assessment .....	115
Analysis of the security screening process at Wrocław airport .....	123
Aircraft ground handling process modelling .....	131
Effect of freezing temperature on the flow behaviour of the engine oils .....	141
Effect of residual elements on quality of pure zinc .....	147
Active safety system for railway vehicles.....	163
Functional safety utilization in road vehicles design .....	171
Application of magnetorheological technology in military equipments.....	179
Mechanical characteristics of heat-resistant anticorrosion systems.....	187
Ishikawa cause-and-effect diagram as a risk analysis in intermodal transport.....	195

III. DIAGNOSTICS ..... 203

- Simplified analysis of the grinding spindle forced vibrations ..... 205
- Dynamic load of aircraft gas turbine engine and its vibration signature ..... 213
- Exoskeletons..... 219
- Testing a selected passive safety element ..... 227
- Analysis of zinc slag in the production of zinc oxide ..... 237
- Factors influencing the center of gravity height of a vehicle..... 243
- Tree diagnostics: safe or unacceptable risk?..... 251
- The usage of modern instrumental methods in diagnostics of quality of operated engine oils..... 255
- The influence of the operating conditions of AMV ROSOMAK on fuel consumption ..... 263
- Modularity of technical systems ..... 271

List of authors ..... 279
