Acknowledgment	3
Extended Summary	13
Introduction	15
1. Basic Characteristics of the Area	17
1.1 Location and Accessibility	17
1.2 Population, Settlements and Health Status	19
1.3 Land Use and Land Cover	22
2. Selected Physical and Geographical Settings	27
2.1 Geomorphology	27
2.2 Climatic Characteristics	30
2.2.1 Climatic Zones and Measurements	30
2.2.2 Wind speed and direction	32
2.2.3 Precipitation	34
2.3.4 Climate Change	36
2.4 Hydrology of the Area	37
2.4.1 Surface Water Network Development	37
2.4.2 River Flow Regime	38
2.4.4 Lakes	49
3. Geological Settings	53
3.1 Previous studies	53
3.2 Stratigraphy	53
3.3 Lithology	55
3.4 Tectonics	61
3.4.1 Primary structures	61
3.4.2 Ductile structures	64
3.4.3 Brittle structures	64
3.5 Geochronology	66
3.6 Geological Evolution	68
4. Rock properties and economic perspectives	69
4.1 Engineering geology	69
4.1.1 Engineering classification of rocks	70
4.1.2 Engineering classification of soils	72
4.2 Economic geology	74
4.2.1 Construction materials	74
4.2.2 Decorative stones	76
4.3 Geothermal energy	76
4.4 Geotourism potential	79
5. Geological hazards	79
5.1 Endogenous geological hazards	81
5.1.1 Seismic hazards	81
5.1.2 Ground cracks (fissures)	84
5.1.3 Volcanic hazards	89
5.2 Exogenous geological hazards	100
5.2.1 Erosion hazards	100

5.2.2 Accumulation of sediment.....	103
5.2.3 Slope deformation hazards.....	103
5.3 Hydrological and hydrogeological hazards	108
5.3.1 Inundation.....	108
5.3.2 Fluoride	111
5.3.3 Unexpected discharge of thermal water	113
<i>References.....</i>	115
Annex 1 Geochemical data	119
Annex 2 Wet lands.....	127
Annex 3 Rock property data	129
Annex 4 Soil property data	139
Annex 5 Quarries.....	145
