Preface to the Second Edition	v
Preface to the First Edition	vii
1 Introduction	1
1.1 What Is the STL?	1
1.2 History	3
1.3 STL Components	3
1.4 Generic Algorithms	4
1.4.1 C++ Templates	7
1.5 Iterators	10
1.6 Standard Exceptions	13
1.7 Complexity	14
1.7.1 Analyzing Complexity	22
1.8 Thread Safety	23
1.9 Namespaces	25
1.10 Overview of This Book	25
2 Iterators	29
2.1 Introduction	29
2.2 Pointers as Iterators	29
2.3 Iterator Classes	34
2.3.1 Input Iterators	39
2.3.2 Output Iterators	40
2.3.3 Forward Iterators	41
2.3.4 Bidirectional Iterators	41
2.3.5 Random Access Iterators	42
2.4 Using Iterators	42
2.4.1 Stream Iterators	43
2.4.2 Forward Iterators	46

2.4.3 Bidirectional Iterators	49
2.4.4 Random Access Iterators	52
2.5 Iterator Functions	55
2.6 Iterator Tags	56
2.7 Iterator Traits	57
3 The STL Algorithms	63
3.1 Introduction	63
3.2 Operators	64
3.3 Function Objects	66
3.4 The STL Algorithms	69
3.4.1 Algorithm Categories	70
4 Sequence Algorithms	73
4.1 Introduction	73
4.2 Preliminaries	73
4.2.1 Pairs	77
4.3 Nonmutating Sequence Algorithms	79
4.3.1 Counting	80
4.3.2 Finding	83
4.3.3 Finding Members	83
4.3.4 Finding Adjacent Values	85
4.3.5 ForEach	86
4.3.6 Mismatching Values	90
4.3.7 Sequence Equality	92
4.3.8 Searching	94
4.4 Mutating Sequence Algorithms	97
4.4.1 Copy	97
4.4.2 Swapping	99
4.4.3 Filling	101
4.4.4 Generate	102
4.4.5 Replace	104
4.4.6 Transform	106
4.4.7 Remove	108
4.4.8 Unique	110
4.4.9 Reverse	112
4.4.10 Rotate	113
4.4.11 Random Shuffle	115
4.4.12 Partitioning	116

5 Sorting and Related Algorithms	12
5.1 Introduction	12
5.2 Preliminaries	12
5.3 Sorting	12
5.3.1 N th Element	12
5.4 Searching Algorithms	12
5.4.1 Binary Search	13
5.4.2 Lower Bound	13
5.4.3 Upper Bound	13
5.4.4 Equal Range	13
5.4.5 Merge	13
5.5 Set Algorithms	14
5.5.1 Includes	14
5.5.2 Set Union	14
5.5.3 Set Intersection	14
5.5.4 Set Difference	14
5.5.5 Set Symmetric Difference	15
5.6 Heap Algorithms	15
5.7 Miscellaneous Algorithms	15
5.7.1 Maximum and Minimum	15
5.7.2 Lexicographical Comparison	16
5.7.3 Permutations	16
6 Generalized Numeric Algorithms	16
6.1 Introduction	16
6.2 Accumulation	16
6.3 Inner Product	16
6.4 Partial Sum	16
6.5 Adjacent Difference	17
6.6 Numeric Arrays	17
6.6.1 Subscripting	17
6.6.2 Methods and Functions	17
7 Sequence Containers	18
7.1 Introduction	18
7.2 Container Operations	18
7.3 Vectors	18
7.3.1 Bit Vectors	19

7.4	Lists	199
7.4.1	List Implementation	201
7.4.2	List Examples	202
7.4.3	List Operations	203
7.5	Deque	230
7.5.1	Deque Implementation	231
7.6	Choosing a Sequence Container	233
7.7	Strings	236
7.7.1	Character Traits	246
8	Associative Containers	249
8.1	Introduction	249
8.2	Associative Container Operations	250
8.3	Sets	255
8.4	Multisets	263
8.5	Maps	263
8.5.1	Multimaps	267
8.6	Associative Container Implementation	267
8.6.1	Trees	268
8.6.2	Hash Tables	277
8.7	Hash Table Implementations	280
8.8	Container Selection	284
9	Adaptors	285
9.1	Introduction	285
9.2	Container Adaptors	286
9.3	The Stack	286
9.4	Queues	293
9.5	Priority Queues	295
9.6	Iterator Adaptors	298
9.6.1	Reverse Iterators	299
9.6.2	Insert Iterators	300
9.7	Function Adaptors	303
9.7.1	Not1	303
9.7.2	Not2	304
9.7.3	Pointers to Functions and Methods	306
9.7.4	ptr_fun	306
10	Memory Management	313
10.1	Introduction	313
10.2	Allocators	313

10.3	Uninitialized Memory Operations	320
10.3.1	Raw Storage Iterators	320
10.3.2	Other Uninitialized Memory Operations	322
10.4	Temporary Buffers	324
10.5	auto_ptr	324
11	Putting the STL to Work	329
11.1	Introduction	329
11.2	A Banking Problem	329
11.3	Symbol Tables	342
11.3.1	A Cross-Reference Generator	342
11.3.2	Hierarchical Symbol Tables	347
12	The Story Continues	371
12.1	Introduction	371
12.2	The Future	372
12.3	Summary	373
Appendix A	STL Header Files	375
Appendix B	The STL Reference	377
References		585
Index		589
