

CONTENTS

PREFACE

1 THE ECONOMIC WORLD AND RESEARCH.....3

1.1 Theory behind the Research4

1.2 Economic Relationships8

1.3 Exercises: Economic Relationships.....10

2 DATA IN RESEARCH.....15

2.1 Data Type15

2.2 Population and Sample19

2.4 Exercises: Data Type20

3 REGRESSION ANALYSIS24

3.1 Introduction to Regression Analysis24

3.2 Terminology (1).....28

3.3 Simple Linear Regression Model29

3.3.1 SLR model theory29

3.3.2 Ordinary Least Squares Method and Its Principle31

3.4 Terminology (2).....36

3.5 Multiple Linear Regression Model.....37

3.6 Interpretation of the Estimated Parameters39

3.7 Software for Regression Analysis - GRETL42

3.8 Exercises: Simple Linear Regression Model.....50

3.9 Exercises: Multiple Linear Regression Model60

4 STATISTICAL VERIFICATION.....70

4.1 Goodness of fit70

4.2 Statistical Significance of Parameters75

4.2.1 Statistical Hypothesis Testing Procedure75

4.2.2 Procedure for the T-test77

4.3 Exercises: Statistical Verification.....80

5 UTILIZATION OF THE MODEL96

5.1 Theory and Solved Examples.....96

5.2 Exercises: Simulations.....102

6 LIST OF FORMULAS AND TABLE OF CRITICAL VALUES FOR T-TEST105

7 SOLUTION OF EXERCISES108

7.1 Exercises: Economic Relationships – Solution108

7.2 Exercises: Data Type – Solution112

7.3 Exercises: Simple Linear Regression Model – Solution114

7.4 Exercises: Multiple Linear Regression Model – Solution122

7.5 Exercises: Statistical Verification – Solution129

7.6 Exercises: Simulations – Solution138
