

# CONTENTS

ABSTRACT .....	3
SOUHRN .....	5
CONTENTS .....	7
ACKNOWLEDGEMENT.....	8
1. INTRODUCTION .....	9
1.1. Magnetic hyperthermia in cancer treatment.....	9
1.2. Mechanisms of heat generation by magnetic nanoparticles.....	10
1.3. Mediator delivery and retention .....	12
AIM AND OBJECTIVES OF WORK.....	15
2. EXPERIMENTAL PART.....	16
2.1. Materials synthesis .....	16
2.2. Characterization of iron oxide nanoparticles and composites.....	18
3. RESULTS AND DISCUSSION .....	21
3.1. Preparation of magnetic iron oxide nanoparticles for magnetic hyperthermia .....	21
3.2. Maghemite based silicone composite for arterial embolization hyperthermia .....	37
CONCLUSIONS .....	47
FUTURE PROSPECTS .....	47
AUTHOR'S CURRICULUM VITAE .....	48
ABBREVIATIONS AND SYMBOLS .....	52
LIST OF FIGURES .....	54
LIST OF TABLES .....	56
REFERENCES .....	57
