

Table of Contents

Summary	2
Souhrn	3
Table of Contents	5
1. Introduction: The COMPASS Experiment	6
1.1 Brief History	6
1.2 COMPASS aim	7
1.3 Information Technologies in COMPASS	8
2. COMPASS Data Acquisition System	9
2.1 Requirements and conditions	9
2.2 DAQ Architecture	9
2.3 Data Migration to CDR	10
2.4 Data organization	11
2.5 COOOL	11
2.6 Data Processing	11
3. Object Oriented Computing	13
3.1 Basics	13
3.2 Object Oriented computing in the COMPASS Experiment	15
4. Migration to C++ – Efficiency Problems	15
4.1 Sources of C++ inefficiency	16
4.2 What is not source of inefficiency	17
5. Template metaprogramming in C++ as an optimization tool in physics computation	18
5.1 Basics	18
5.2 Computational completeness	19
5.3 Loop unwinding	19
6. Generic programming – the implementation	21
6.1 What is generics	21
6.2 Main goals of the generics	22
Implementation of generics	22
