

CONTENS

1	THEORETICAL BACKGROUND RESEARCH	7
1.1	CHARACTERISTICS AND GENERAL REQUIREMENTS IN THE COMPLEX OF COMBAT SPORTS AND GENERAL REQUIREMENTS IN THE COMPLEXITY OF COMBAT SPORTS	7
1.2	JUDO	8
1.2.1	History of judo in the world and in Slovakia	8
1.2.2	Characteristics of judo as a sports branch	9
1.2.3	Judo philosophy and etiquette	10
1.2.4	Judo rules	12
1.3	KARATE – DO	18
1.3.1	The characteristics and historical development of Karate-do	18
1.3.2	Ethics and etiquette in karate	19
1.3.3	Origin, characteristics and rules of sport karate	22
1.4	JUDO SPORTS TRAINING IN TERMS OF LOAD	26
1.4.1	Judo sports training	26
1.4.2	Judo sports performance capacity	27
1.4.3	Structure of judo sports performance	28
1.4.4	Energy coverage in judo	30
1.4.5	Possibilities of diagnostics utilization in the judo sports training	33
1.5	KARATE-DO SPORTS TRAINING IN TERMS OF LOAD	35
1.5.1	Structure of Karate-do sports performance	35
1.5.2	Training and competition load in <i>Karate-do</i>	40
1.5.3	Physiological characteristics of load in sports <i>karate-do</i> from the point of view of bioenergy coverage	41
1.5.4	The influence of rate and efficiency of regeneration on performance level in karate	42
1.6	LACTATE	43

1.7 REGENERATION	45
1.7.1 Hyperoxia and its impact on regeneration during anaerobic intermittent load	46
2 OBJECTIVES, HYPOTHESIS AND RESEARCH METHODS	48
2.1 Research project I – Load diagnostics in sports <i>karate-do</i> , a comparison of response parameters of the organism to the load in <i>kata</i> and <i>kumite</i>	48
2.2 Research project II – Load diagnostics in judo, a comparison of response parameters of the organism to the load in stand-up fighting and ground fighting position	50
2.3 Research project III - the use of hyperoxia to accelerate recovery in sports karate-do.....	52
2.4 Research project IV - the use of hyperoxia to accelerate recovery in sports judo....	57
3 RESEARCH PROJECTS RESULTS.....	59
3.1 Results of research project I – comparison of response parameters of the organism to load in <i>kata</i> and <i>kumite</i>	59
3.2 Results of research project II – comparison of response parameters of the organism to load in stand-up fighting and ground fighting positions	64
3.3 Results of the research project III - the use of hyperoxia to accelerate recovery in sports karate-do	71
3.4 Results of the research project IV - the use of hyperoxia to accelerate recovery in sports judo	79
CONCLUSIONS OF RESEARCH	83
