

Content

INTRODUCTION.....	6
1 CURRENT STATE OF TERRAIN CONSTRUCTION.....	7
2 AIMS OF THE DISSERTATION.....	9
3 PROGRESS OF RESEARCH IN THE CONTEXT OF THE THESIS.....	10
3.1 DATA, SOFTWARE, HARDWARE.....	10
3.2 METHODS.....	11
3.2.1 <i>Data corrections and filtering</i>	11
3.2.2 <i>Spatial interpolation and adaptive approach</i>	12
3.2.3 <i>Geostatistics</i>	13
3.2.4 <i>3D scripting of chosen point inputs</i>	14
3.2.5 <i>Digital building model implementation</i>	15
3.2.6 <i>Raster driven vegetation</i>	16
3.2.7 <i>Raster driven weather model</i>	17
3.2.8 <i>Parametrical and procedural modelling</i>	18
4 RESULTS OF THE DISSERTATION.....	21
5 BENEFITS OF THE DISSERTATION.....	23
CONCLUSION.....	24
ABBREVIATIONS.....	25
REFERENCES.....	26
LIST OF PAPERS PUBLISHED BY AUTHOR.....	29
