

The impact of Voluntary Counselling and Testing

A global review of the benefits and challenges

Contents

BACKGROUND	7
<i>Box 1: The goals of VCT.....</i>	<i>7</i>
<i>Box 2: The challenges of comparing VCT interventions.....</i>	<i>8</i>
1. PREVENTION OF HIV TRANSMISSION	11
1.1 HIV INCIDENCE/SEROCONVERSION	11
1.2 STI RATES.....	12
1.3 REPORTED SEXUAL BEHAVIOUR	13
<i>Box 3: Difficulties with analysis and interpretation of data on sexual behaviour.....</i>	<i>13</i>
1.4 STUDIES DEMONSTRATING COUNSELLING CAN REDUCE RISK BEHAVIOUR	14
<i>Box 4: Studies from sub-Saharan Africa</i>	<i>15</i>
Table 1: VCT outcome studies reporting sexual behaviour from Sub-Saharan Africa.....	16
<i>Box 5: Studies among heterosexuals from industrialized countries</i>	<i>17</i>
Table 2: VCT outcome studies reporting sexual behaviour from industrialized countries	18
1.5 PREGNANCY	18
1.6 VOLUNTARY PARTNER NOTIFICATION AND PARTNER TESTING	19
<i>Box 6: Sharing HIV test result with sexual partner</i>	<i>19</i>
Table 3: Partner testing at MTCT sites	22
1.7 COUPLE COUNSELLING	22
1.8 PREMARITAL VCT	24
<i>Box 7: Barriers to changing sexual behaviour following VCT</i>	<i>24</i>
2. PREVENTION OF HIV TRANSMISSION IN SPECIAL POPULATIONS FOLLOWING VCT.....	26
2.1 MEN WHO HAVE SEX WITH MEN (MSM)	26
<i>Box 8: Studies among men who have sex with men</i>	<i>26</i>
Table 4: VCT outcome studies reporting sexual behaviour from studies of men who have sex with men.....	27
2.2 SEX WORKERS	27
<i>Box 9: Studies among sex workers.....</i>	<i>28</i>
2.3 STI CLINIC ATTENDERS	29
2.4 INJECTING DRUG USERS (IDUs).....	29
<i>Box 10: Studies among injecting drug users.....</i>	<i>29</i>
Table 5: VCT outcome studies reported injecting practices among injecting drug users	30
Table 6: VCT outcome studies reported sexual behaviour among injecting drug users	31
2.5 PRISON POPULATIONS.....	31
2.6 TRUCK DRIVERS	31
2.7 BLOOD DONORS	32
2.8 YOUNG PEOPLE	32
<i>Box 11: Young people.....</i>	<i>32</i>

3. CARE: IMPROVING ACCESS TO MEDICAL, EMOTIONAL AND SOCIAL SUPPORT	35
<i>Box 12: Care needs following VCT.....</i>	<i>36</i>
3.1 ACCESS TO MEDICAL CARE	36
3.2 ACCESS TO ONGOING EMOTIONAL/PSYCHOLOGICAL CARE	37
3.3 PSYCHOLOGICAL COPING AND ADJUSTMENT (FOR THE INDIVIDUAL AS WELL AS FOR THE FAMILY AND COMMUNITY)	39
<i>Box 13: VCT and coping</i>	<i>39</i>
3.4 SHARING OF HIV TEST RESULT WITH FAMILY AND FRIENDS	40
3.5 POST-TEST CLUBS/SUPPORT GROUPS	42
3.6 ACCESS TO SOCIAL SUPPORT	42
3.7 LEGAL AND FUTURE PLANNING.....	44
3.8 ACCESS TO INTERVENTIONS TO PREVENT MOTHER-TO-CHILD TRANSMISSION OF HIV, SPECIALIST ANTENATAL CARE AND FAMILY PLANNING SERVICES	45
3.9 ACCESS TO HIV TRANSMISSION PREVENTION SERVICES.....	45
4. SOCIETAL	46
5. COST	47
5.1 DEVELOPING COUNTRIES.....	47
5.2 INDUSTRIALIZED COUNTRIES	47
5.3 COST EFFECTIVENESS ASSOCIATED WITH MTCT INTERVENTIONS	48
Table 7: Costs and cost-effectiveness of ARV treatments for MTCT interventions	49
6. NEGATIVE OUTCOMES FOLLOWING VCT.....	50
<i>Box 14: Negative outcomes following VCT</i>	<i>50</i>
6.1 ABANDONMENT AND ABUSE	51
6.2 MARITAL BREAK-UP	52
6.3 DISCRIMINATION	52
6.4 PSYCHOLOGICAL DISTRESS, STRESS AND DEPRESSION	53
7. OPERATIONAL	55
7.1 UPTAKE, RETURN RATES AND ACCEPTABILITY	55
Table 8: Uptake of VCT at MTCT sites	55
Table 9: Uptake of VCT at MTCT operational sites	57
Table 10: Couple counselling uptake	58
7.2 HIV TESTING METHODS: SIMPLE-RAPID (S/R) TESTING/SAME-DAY TESTING.....	59
<i>Box 15: Barriers to the uptake of VCT.....</i>	<i>60</i>
8. CLIENT SATISFACTION WITH THE SERVICE	62
9. COUNSELLING WITHOUT TESTING AND OTHER BEHAVIOURAL INTERVENTIONS....	63
10. TESTING WITHOUT COUNSELLING/MINIMAL COUNSELLING	64
11. CONCLUSION.....	65
APPENDIX	67
Studies from developing countries.....	67
Studies from industrialized countries.....	71
Studies among MSM	71
Studies among IDUs.....	73
