

# CONTENT

<b>INTRODUCTION</b> .....	<b>4</b>
<b>1. INSPECTION OF THE SEEDER SETTING AND QUALITY OF WORK</b>	
<b>(SALAJKA)</b> .....	<b>5</b>
1.1 Checking the setting of the seed rate.....	5
1.2 Checking the stability of the seed rate .....	5
1.3 Overall unevenness of sowing.....	6
1.4 Laboratory assignment .....	6
1.5 Laboratory tests of the seed apparatus of precision seeder .....	10
1.5.1 Testing the accuracy of sowing.....	10
1.5.2 The inspection of the precision seeder's quality of work .....	12
<b>2 TESTING OF SPRAYERS (ČERVINKA)</b> .....	<b>14</b>
2.1 Sprayer Test (experimental training lesson).....	14
2.2 Methodology and measurements.....	20
<b>3 MOWERS (KUBÍN, SALAJKA)</b> .....	<b>24</b>
3.1 Cutter bar mowers .....	25
3.2 Rotary mowers .....	28
3.3 Design of the knife edge trajectory .....	29
3.4 Constructing a diagram of the cut .....	31
3.5 Assignment "Kinematics of the cutter bar and diagram of cutting" .....	32
<b>4 FLUID FLOW IN AGRICULTURAL OPERATIONS (ŠTENCL)</b> .....	<b>34</b>
4.1 Properties of liquids, Newtonian and non-Newtonian liquids .....	34
4.2 Handling systems for Newtonian Liquids (Continuity equation, Reynolds number, Bernoulli equation, Ventouri tube).....	35
4.2.1 Continuity equation; basic balance equation .....	35
4.2.2 Reynolds number .....	36
4.2.3 Bernoulli equation.....	36
4.2.4 Ventouri tube .....	37
4.3 Liquid transport in a pipeline .....	38
4.4 Pump selection and pump characteristic diagram .....	39
4.5 Transport of liquids in a pipeline – calculation.....	43
