Preface.....	VII
Bachmann, W. (Kronach); Lotz, N.; Sieger, C. (Munich): Insulin/Sulphonylurea Combinations – A New Beginning?	1
<i>Clinico-Experimental Studies</i>	
Klujko, J.; Schmidt, F. H.; Kühnle, H. F.; Reiter, J. (Mannheim): Investigation of the Mechanism of Action of Glibenclamide and Insulin Administered in Combination in Type-II Diabetic Patients with Secondary Failure to Oral Treatment	13
Hasche, H. (Rotenburg/Wümme): Combination Therapy with Different Doses of Glibenclamide. A Double-Blind Study on 36 Patients with Secondary Failure	25
Schwarz, O. (Mannheim); Rosak, C.; Althoff, P. H.; Schöffling, K. (Frankfurt/M.); Schmidt, F. H. (Mannheim): Combined Treatment of Type-II Diabetic Patients with Insulin and Glibenclamide after Secondary Failure to Tablets. A Double-Blind, Placebo-Controlled Crossover Study	33
Stahl, T. (Freudenberg): Combination of Regular Insulin with Glibenclamide in Secondary Failure	44
Henrichs, H. R. (Quakenbrück): Sulphonylurea/Insulin Combination in Diabetes Mellitus Following Secondary Failure to Tablets. Results of a Double-Blind Crossover Study of Glibenclamide.....	51
Willms, B.; Boustani, A. (Bad Lauterberg): Comparison of Pre-Prandial Administration of Regular Insulin with Administration of NPH Insulin at Bed Time and of Conventional Insulin Therapy in Combination Therapy with Insulin/Sulphonylurea in Type-II Diabetes	68
Bottermann, P. (Munich): Insulin Treatment in Type-II Diabetes in Presence of Secondary Failure to Sulphonylurea Therapy. A Contribution to the Discussion	78
Bergis, K. H. (Bad Mergentheim): Insulin by Night – Sulphonylurea by Day: A Practical Compromise for the Stabilization on Insulin in Type-II Diabetics with Secondary Sulphonylurea Failure	85

Long-Term Clinical Trials

Knick, B.; Röckel, A.; Panitz, N.; Groth, U. (Wiesbaden): Comparative Study of SU/Insulin (with Special Consideration of a Group of Kidney-Failure Patients) versus Combined Metformin/Insulin Therapy in Type-II Diabetes	94
Sachse, G. (Wiesbaden); Mäser, E.; Federlin, K. (Gießen): Long-Term Results of Combined Insulin/Sulphonylurea Therapy: Results, Critical Assessment, Clinical Consequences	103
Bachmann, W. (Kronach); Lotz, N.; Mehnert, H. (Munich); Rosak, C.; Schöffling, K. (Frankfurt/M.): Controlled Multicenter Double-Blind Clinical Study of the Efficacy of Combined Treatment	109
Stürmer, W. (Würzburg); Schrezenmeir, J. (Mainz); Kasper, H. (Würzburg): Long-Term Results of Combined Sulphonylurea/Insulin Therapy in Patients with a Positive Glibenclamide Test under Clamp Conditions	121
Lotz, N. (Munich); Bachmann, W. (Kronach); Mehnert, H. (Munich): Combination of Sulphonylurea and Insulin in the Long-Term Treatment of 'Secondary Failure' in Type-II Diabetes	131
Petzold, R.; Klein, E. (Bad Oeynhausen): Insulin/Sulphonylurea Therapy in 'Secondary Failure' - Clinical Observations	146
Klein, W. (Berlin): Combined Sulphonylurea/Insulin Treatment in Secondary Failure	151
Bachmann, W. (Kronach); Lotz, N.; Mehnert, H. (Munich): Concluding Remarks	154
