

CONTENT

1 INTRODUCTION	5
2 ANALYSIS OF THE PROBLEM SITUATION	5
2.1 Pedicle screw Fixation device.....	6
3 THE AIM OF THE THESIS AND METHODOLOGY OF SOLUTION.....	6
4 RESEARCH ADVANCES IN LUMBAR SPINE.....	7
5 COMPUTATIONAL MODEL	8
5.1 Geometry model	8
5.1.1 Mesh generation.....	9
5.1.2 Model of the contact.....	9
5.2 Material model.....	9
5.3 Boundary conditions	10
5.4 Model load	10
6 RESULTS SUMMARY	11
6.1 Stability of the spine with fixation device	11
6.2 The fusion site analysis.....	11
6.2.1 The strain at the fusion site.....	11
6.2.2 The relative motion at the fusion site.....	13
6.2.3 The stress at the fusion site	14
6.3 Analysis of the screw – implant interface.....	15
6.3.1 Model M6 analysis.....	15
6.3.2 Model M7 analysis.....	15
6.3.3 Analysis of the screw.....	16
6.4 Analysis of the rod.....	17
6.4.1 Displacement analysis.....	17
6.4.2 Stress analysis.....	17
7 CONCLUSION	18
