

Table of contents

Linear regression analysis	5
<i>Introduction</i>	<i>5</i>
<i>Types of regression model</i>	<i>7</i>
<i>Applied regression analysis.....</i>	<i>8</i>
<i>Choosing the correct function form.....</i>	<i>11</i>
Ordinary Least Squares (OLS).....	25
<i>Estimation of regression coefficients.....</i>	<i>25</i>
<i>Properties of OLS method</i>	<i>26</i>
<i>Estimation of the constant model.....</i>	<i>26</i>
<i>Estimating model with a single explanatory variable</i>	<i>27</i>
<i>Estimating coefficients of a regression model with two regressors</i>	<i>30</i>
<i>Estimating coefficients of a linear model with high number of regression coefficients.....</i>	<i>31</i>
<i>Linear regression model in matrix notation.....</i>	<i>32</i>
Quality of regression model fit.....	34
<i>Measuring quality of regression equation.....</i>	<i>34</i>
<i>Decomposition of variability in regression</i>	<i>35</i>
<i>Coefficient of determination (R^2).....</i>	<i>36</i>
<i>Adjusted coefficient of determination R^2_{adj}.....</i>	<i>39</i>
<i>Models with logarithmic function form of the dependent variable</i>	<i>41</i>
<i>Information criteria</i>	<i>41</i>
Correlation analysis	43
<i>Introduction</i>	<i>43</i>
<i>Pair-wise correlation coefficient</i>	<i>46</i>
<i>Multiple coefficient of correlation.....</i>	<i>48</i>
<i>Partial coefficient of correlation</i>	<i>50</i>
Testing statistical hypotheses in regression	53
<i>Introduction</i>	<i>53</i>
<i>Errors in testing statistical hypotheses.....</i>	<i>55</i>
<i>t - test</i>	<i>56</i>
<i>F - test.....</i>	<i>60</i>
<i>Confidence intervals</i>	<i>62</i>

<i>Test of error sum of squares (ESS) reduction</i>	65
<i>Ramsey's RESET test</i>	67
Classical regression model assumptions	70
<i>Introduction</i>	70
<i>Classical assumption I</i>	73
<i>Classical assumption II</i>	79
<i>Classical assumption III</i>	80
<i>Classical assumption IV</i>	80
<i>Classical assumption V</i>	85
<i>Classical assumption VI</i>	88
<i>Classical assumption VII</i>	92
<i>Gauss-Markov theorem</i>	92
Introduction to time series analysis	97
<i>White noise</i>	98
<i>Types of time series</i>	99
<i>Specific problems of time series analysis</i>	100
<i>Stationarity and non-stationarity of time series</i>	102
<i>Transformations of time series</i>	102
<i>Selected methods of time series analysis</i>	106
<i>Delphi method</i>	106
<i>Method of historical analogy</i>	106
<i>Graphical and psychological analysis</i>	107
<i>Quantitative methods of time series analysis</i>	107
<i>Time series decomposition</i>	108
<i>Adaptation methods</i>	112
<i>Linear filters</i>	112
<i>Exponential smoothing</i>	117
<i>Special methods</i>	120
<i>Simple models of seasonality</i>	122
<i>Seasonal adjustment of time series</i>	129
<i>Random component</i>	130
Literature	133
