Part I Special Matrices in Decision Making

1 Preliminaries	3
1.1 Triangular Norms and Conorms	3
1.2 Properties of Triangular Norms and Triangular Conorms	6
1.3 Representations of Triangular Norms and Triangular Conorms.....	8
1.4 Negations and De Morgan Triples	12
1.5 Fuzzy Sets	13
1.6 Operations with Fuzzy Sets	16
1.7 Extension Principle	17
1.8 Binary and Valued Relations	18
1.9 Fuzzy Relations	20
1.10 Fuzzy Quantities and Fuzzy Numbers	21
1.11 Matrices with Fuzzy Elements	23
1.12 Abelian Linearly Ordered Groups	24
References	28
2 Pairwise Comparison Matrices in Decision Making	29
2.1 Introduction	29
2.2 Problem Definition	31
2.3 Multiplicative Pairwise Comparison Matrices	32
2.4 Methods for Deriving Priorities from Multiplicative Pairwise Comparison Matrices.....	36
2.4.1 Eigenvector Method (EVM)	38
2.4.2 Additive Normalization Method (ANM)	39
2.4.3 Least Squares Method (LSM)	40
2.4.4 Logarithmic Least Squares Method (LLSM)/Geometric Mean Method (GMM).....	42
2.4.5 Fuzzy Programming Method (FPM) and Other Methods for Deriving Priorities	46

2.5	Additive Pairwise Comparison Matrices	47
2.6	Methods for Deriving Priorities from Additive Pairwise Comparison Matrices	49
2.7	Fuzzy Pairwise Comparison Matrices	53
2.8	Methods for Deriving Priorities from Fuzzy Pairwise Comparison Matrices	57
2.9	Fuzzy Pairwise Comparison Matrices with Missing Elements	61
2.9.1	Problem of Missing Elements in FPC Matrices Based on Optimization.....	63
2.9.2	Particular Cases of FPC Matrices with Missing Elements Based on Optimization.....	64
2.9.3	Case $L = \{(1, 2), (2, 3), \dots, (n - 1, n)\}$	65
2.9.4	Case $L = \{(1, 2), (1, 3), \dots, (1, n)\}$	68
2.9.5	Problem of Missing Elements in FPC Matrices: Other Methods	71
2.10	Unified Framework for Pairwise Comparison Matrices over ALO Groups.....	74
2.10.1	Unified Framework	74
2.10.2	Continuous Alo-Groups over a Real Interval	74
2.10.3	Pairwise Comparison Matrices over a Divisible Alo-Group	79
2.10.4	Consistency Index in Alo-Groups	81
2.11	Conclusions	86
	References	86
3	Preference Matrices with Fuzzy Elements in Decision Making.....	91
3.1	Introduction	91
3.2	PC Matrices with Elements Being Fuzzy Sets of Alo-Group over a Real Interval	93
3.3	Methods for Deriving Priorities from PCFN Matrices.....	99
3.3.1	PCFN Matrix on Additive Alo-Group	102
3.3.2	PCFN Matrix on Multiplicative Alo-Group	104
3.3.3	PCFN Matrix on Fuzzy Additive Alo-Group	106
3.3.4	PCFN Matrix on Fuzzy Multiplicative Alo-Group	108
3.4	Illustrative Numerical Examples	112
3.5	Conclusion	114
	References	114

Part II Special Matrices in Max-Min Algebra

4	Optimization Problems Under Max-Min Separable Equation and Inequality Constraints	119
4.1	Introduction	119
4.2	Systems of One-Sided Max-Separable Equations and Inequalities: Unified Approach.....	123

4.3	Optimization Problems with Feasible Set $M(b)$	125
4.4	Duality Theory	127
4.5	Optimization Problems on Attainable Sets of Equation Systems ...	136
4.6	Two-Sided max-Separable Equation and Inequality Systems: Some Special Cases	149
4.7	Conclusions	160
	References	160
5	Interval Eigenproblem in Max-Min Algebra	163
5.1	Introduction	163
5.1.1	Max-Min Eigenvectors in Applications	165
5.1.2	Basics on the Eigenspace Structure of a Max-Min Matrix	165
5.2	Interval Eigenvectors Classification	167
5.2.1	Non-decreasing Interval Eigenvectors	168
5.2.2	General Interval Eigenvectors	173
5.3	Relations Between Types of Interval Eigenvectors	175
5.3.1	Examples and Counterexamples	176
5.4	Conclusions	180
	References	180
6	Eigenproblem in Max-Drast and Max-Łukasiewicz Algebra	183
6.1	Introduction	183
6.2	Eigenvectors in Max-T Algebra	184
6.3	Eigenvectors in Max-Drast Algebra	186
6.3.1	Non-decreasing Eigenvectors	190
6.3.2	General Eigenvectors in Max-Drast Algebra	194
6.3.3	Examples	194
6.4	Eigenvectors in Max-Łukasiewicz Algebra	200
6.4.1	Non-decreasing Eigenvectors	209
6.4.2	General Eigenvectors in Max-Łukasiewicz Algebra	212
6.4.3	Examples	212
6.5	Conclusions	219
	References	220
