

CONTENT

Předmluva / Foreword.....	1
List of authors.....	3
Babulicová, M.: The possibilities of production ability enhancing of winter wheat by the utilization of waste sludge	4
Bujnovský, R., Koco, Š., Panák, M.: Evaluation of the risk of phosphorus losses to surface water.....	5
Dryšlová, T., Křen, J., Procházková, B., Smutný, V.: Grain yield of spring barley (<i>Hordeum vulgare</i> L.) grown in long-term continuous culture.....	10
Florián, M., Smatanová, M.: Long term field experiments in ÚKZÚZ (CISTA) with focus on the effects of organic fertilizers	13
Friedlová, M., Šimon, T.: Trends in soil organic carbon content under long-term field experiments in Prague.....	14
Füleky, G.: Nitrate movement in the long-term fertilization experiment at Gödöllő.....	15
Hakl, J., Kunzová, E., Konečná, J.: Impact of long-term fertilization on alfalfa forage yield over last decade.....	21
Hoffmann, S., Simon, Sz., Tran D.V., Dam S. M., Lepossa A.: Soil fertility in a long-term field trial as affected by 50 years organic and mineral fertilization.....	22
Honermeier, B., Schwarz, C.: CO ₂ respiration and physical parameters of the soil after 15 years of reduced soil tillage.....	23
Honermeier, B., Sadeghi, A.: Effect of different organic and mineral fertilization on CO ₂ respiration, C/N contents and microbial biomass of the soil after 60 years in the long-term field experiment Gießen.....	24
Káš, M.: The International Organic Nitrogen Long-Term Fertilization Experiment (IOSDV) in Lukavec after 30 years.....	25
Kidanu, S.: Soil fertility initiatives in Ethiopia: recent experience.....	26
Kismányoky, T., Dunai, A.: Effect of the cropping years on the yield of winter wheat in long-term field experiments (IOSDV 1984-2013).....	27
Kohoutek, A., Odstrčilová, V., Nerušil, P., Němcová, P.: The impact of precipitation on yield of <i>Dactylis glomerata</i> , <i>Dactylis polygama</i> , <i>Festuca arundinacea</i> and genus hybrids in 1986 – 2013	32
Kohut, M., Brzezina, J.: Long-term changes of selected agrometeorological parameters in the Czech Republic.....	35
Körschens, M., Kubát, J.: Soil organic matter – climate change – carbon sequestration ? The importance of long-term field experiments.....	43
Kunzová, E., Hlisnikovský, L., Menšík, L.: Effect of long-term fertilizer application on the yield of winter wheat	51
Kusá H., Růžek P., Mühlbachová G., Vavera R.: Development of nutrient supply in different layers of soil and winter wheat uptake during long-term use of different soil tillage practices	56

Lipavský J., Madaras M., Kubát J.: Long-term field experiments in the Czech Republic.....	57
Madaras, M., Lipavský, J.: Fraction-factorial long-term fertilization experiments of Crop Research Institute.....	61
Merbach, W., Fankem, F., Deubel, A.: In vitro mobilization of calcium, iron and aluminium phosphate by rhizosphere bacteria of African oil palm	62
Molárová, J., Pačuta, V.: Yields and crude protein content in grain of winter barley depending year, variety and fertilization treatment	63
Murawska, B., Maciejewska-Kondratowicz, K., Spychaj-Fabisiak, E., Szulc, W., Róžański, Sz., Knapowski, T: The impact of long-term application of inorganic nitrogen fertilizers and manure to changes of selected properties of organic matter in sandy soil.....	67
Murawska, B., Spychaj-Fabisiak, E., Róžański, Sz., Rutkowska, B., Piekut, A.: Evaluation of the total mercury content and the relationship between its content and fertility indicators of loamy sand soil after long-term use of nitrogen and potassium fertilizers	71
Mühlbachová G., Růžek P., Vavera R., Kusá, H.: Development of organic matter and microbial activities in the twenty-year field experiment with different tillage technologies.....	72
Mühlbachová G., Káš M.: Soil nutrient availability and balance in the soil in long-term field experiment iodsv with organic and mineral fertilization.	73
Nikitina, L.: Influence of long term fertilizers usage in rotation of different intensive regimes on potassium regime of soddy podzolic loamy soils	74
Odstrčilová, V., Kohoutek, A., Němcová, P., Nerušil, P.: Persistence and production ability of <i>Dactylis glomerata</i> L., <i>Dactylis polygama</i> Horvat, <i>Festuca arundinacea</i> L. and genus hybrids in 1986-2013	75
Pepó, P.: New results of long-term experiments on chernozem soil in Eastern Hungary	79
Pikuła, D., Rutkowska, A.: Long-term effect of manure application on selected light soil quality indicators.....	83
Pilcová, B., Královec, J.: Grassland productivity at Závěšín in long-term experiment	87
Prchalová, R.: Percolation of nutrients in lysimeters experiment located in the vulnerable area	88
Procházková, B., Procházka, J., Dryšlová, T., Hledík, P., Houšť, M.: The effect of different soil tillage on the yields of spring barley.....	89
Romanenkov, V.A., Belichenko, M.V.: Database of field experiments with fertilizers as a tool for monitoring climate change effect on long-term yield dynamics.....	93
Rožnovský, J., Střeščík, J., Štěpánek, P., Zahradníček, P.: Long-term air temperature and precipitation changes in the territory of the Czech Republic.....	94
Rusakova, I.V.: Changes in the indices of biological properties and organic matter of sod-podzolic sandy loam soil with long-term use of straw.....	99
Rusek, P., Karsznia, M., Sienkiewicz-Cholewa, U., Igras, J., Mikos-Szymańska, M.: The effect of new nitrogen-phosphorus fertilizer USP on yield and quality of winter wheat in long-term field experiment	100
Rutkowska, A., Pikuła, D.: Productive and environmental effects of soil potassium mining in long-term field experiment	104

Řeháček, D., Khel, T., Vopravil, J.: Simple method of soil organic matter balance for farmers in the Czech Republic	108
Semenov, V.M., Kogut, B.M.: The determination of soil organic matter functional pools by the data of the long-term experiments	109
Smatanová, M.: The influence of digestate on the plant's production and soil properties.....	113
Spiegel, H., Schlatter, N., Lehtinen, T., Baumgarten, A., Zavattaro, L., Grignani, C., Ten Berge, H.: Impacts of agricultural management on crop productivity, soil quality and climate change mitigation: results of the EU FP 7 CATCH-C project	114
Stepień, W., Szulc, W., Rutkowska, B., Łabętowicz, J., Sosulski, T.: Effect of crop rotation on the physical and chemical properties of soil in a long-term fertilization experiment.....	115
Strnad, L., Míša, P.: Effects of management systems on the weed seedbank and field weed emergence after 40 years of continuous cropping practice.....	116
Svoboda, P., Kurešová, G., Neumannová, A., Kunzová, E., Haberle, J.: The distribution of mineral nitrogen and water in top and subsoil under wheat and oilseed rape in the long-term experiments.....	120
Szulc, W., Rutkowska, B., Hoch, M., Sychaj Fabisiak, E., Murawska, B.: Exchangeable silicon content of soil in a long-term fertilization experiment	124
Šimon, T.: Effect of fertilization on the quantity and quality of soil organic matter under long-term field experiments in Prague	125
Škarpa, P., Ryant, P.: The effect of graduate potassium fertilization on selected forms of soil potassium	126
Tóth, Z., Dunai, A.: Soil organic carbon content – effect of tillage and fertilization in long-term field trials	132
Ust'ak, S., Muñoz, J., Ust'aková, M., Vach, M., Kurganová, I., Chochlová, O.: Carbon losses from soil as carbon dioxide and changes in the content of soil organic matter related to different soil tillage methods at long-term field trials	137
Ust'ak, S., Vach, M., Stražil, Z., Muñoz, J., Mikulka, J., Káš, M., Mühlbachová, G.: Effect of different soil management practices on the soil microbiological activity and biogenic emissions of greenhouse gases.....	143
Vach, M., Stražil, Z., Javůrek, M.: The effect of different tillage systems on cereals grain yields in long-term field experiments.....	150
Weigell, A., Van Antwerpen, R.: BT1 (South Africa) – the oldest sugarcane trial in the world – what story does it tell ?	154
Zoubková, L., Roubíková, I., Filuzstková, E., Trögl, J., Banýr, P.: Characteristics of soil microbial communities on selected localities of the Mostecká pánev basin (Czech Republic): comparison of anthropogenic substrates and unaffected soils	160
