Invited Lectures:

<i>H. Měšťánková, M. Kolář, G. Grabner, J. Jirkovský</i> : Photoactivity evolution of titanium dioxide nanoparticles in course of aging of their colloidal solutions.....	1
<i>K. Lafdi</i> : Carbon based polymeric nanocomposites (processing and properties)	2
<i>D. Rafaja, V. Klemm, C. Wüstefeld, M. Motylenko, M. Dopita, D. Šimek, G. Schreiber</i> : Capability of X-ray diffraction and transmission electron microscopy for the microstructure analysis of nanomaterials	3
<i>M. H. Rummeli, F. Schäffel, T. de los Arcos, C. Kramberger, C. Schünemann, A. Bachmatiuk</i> : Advantages of gas phase prepared nanoparticles in understanding carbon nanotube growth ...	4
<i>I. Šafařík, M. Šafaříková</i> : Magnetic nanoparticles and biotechnology	5

Oral Presentations:

Topic 1 - Nanocatalysts and photocatalysts

<i>L. Matějová, T. Cajthaml, Z. Matěj, Z. Strýhal, O. Benada, O. Šolcová</i> : Design of well-defined TiO_2 for photocatalysis	6
<i>O. Šolcová, L. Matějová, P. Hudec, P. Schneider</i> : The correct determination of texture properties in microporous-mesoporous solids	7
<i>V. Matějka, P. Kovář, L. Neuwirthová, J. Příkryl, P. Čapková</i> : Titanium dioxide growing on the kaolinite particle surface and its practical utilization in the building industry.....	8
<i>P. Topka, P. Klusoň, O. Šolcová</i> : Self-supporting pellets from (Al-)SBA-15 molecular sieve ...	9

Topic 2 - Polymeric, ceramic and metallic nanocomposites

<i>Z. Rožek, P. Louda</i> : Anti-wear coatings on cutting tools for wood machining	10
<i>V. Rudoy, O. Dementieva, M. Kartseva, V. Ogarev</i> : Surface metal/polymer 2D nanocomposites: fabrication and application in catalysis.....	11
<i>V. Zima, J. Svoboda, K. Melánová, L. Beneš</i> : Metal organophosphonates and their intercalation compounds as inorganic-organic hybrid materials and nanomaterials	12

D. Holzmann, D. Holzinger, G. Knör, T. Schmidt: Inorganic nanoparticles for the protection of transparent polymer composites against UV-Light-Exposure	13
Z. Klika, M. Dudová: Protonization of methylene blue and its intercalation into montmorillonite.....	14
H. Kubišová, D. Měřínská: The PP/clay nanocomposites: using of commercial fillers	15
D. Plachá, G. Simha Martynková: Preparation of organovermiculites and testing of naphthalene sorption	16
D. Měřínská: Polymer/Clay nanocomposite – a brief description and a practical using.....	17
<u>Topic 3 - Nanostructured materials for magnetooptics, electronics and photonics</u>	
K. Watanabe: Electromagnetic scattering from imperfectly periodic structures	18
J. Vlček, P. Otipka, M. Lesňák, A. Talik: Fitting of iron nano-film properties in planar optical structure	19
M. Lesňák, A. Talik, J. Pištora: Surface plasmon resonance arrangement	20
<u>Topic 4 - Modeling of nanomaterials and structure analysis</u>	
S. Rusz, M. Klos, K. Malanik, J. Kedron: Mathematical simulation of severe plastic deformation	21
K. Hashemnia, R. Vatankhah, M. Farid: Bending buckling analysis of carbon nanotubes and graphene sheets by molecular structural mechanics approach.....	23
P. Otipka, J. Vlček, M. Lesňák, A. Talik: Refractive index designing of liquids using SPR.....	24
P. Čapková: Molecular modeling in nanomaterials design	25
<u>Topic 5 - Particles and nanopowders</u>	
L.M. Hlaváč, I.M. Hlaváčová, J. Vašek, P. Jandačka, V. Mádr: Material grinding by water jets – feasibility and limits.....	26
A. Slíva, J. Zegzulka, R. Brázda, R. Dvorský, J. Luňáček: Particle characterization of nanoparticle materials in Water Jet Mill device	27

J. Zegzulka, R. Brázda: Identification of 3D inner conception of a particle material rising of its internal friction using the LBM-Nano-Machine for 3D	28
J. Bujdák, N. Iyi: Fluorescent resonant energy transfer in hybrid systems based on rhodamines and synthetic saponite	29
R. Dvorský, A. Slíva, J. Luňáček: Preparation of Nanoparticle Materials in New Device WJM (Water Jet Mill)	30
H. Sugimoto, S. Sato, H. Yao, Y. Negishi, T. Tsukuda, K. Kimura: Electrophoretic size determination of gold clusters from Au magic numbered clusters to Au nanoparticles.....	31
H. Wang, B. Suo, Y. Lu, L. Huang, Y. Lu: Preparation and characterization of micro- and nano-fibrils from natural fibers I. jute	33
B. Suo, H. Wang, Y. Lu, Y. Lu, L. Huang: Preparation and characterization of micro- and nano-fibrils from natural fibers II. flax.....	34
H. Wang, B. Suo, Y. Lu, L. Huang, Y. Lu: Preparation and characterization of micro- and nano-fibrils from natural fibers III. hemp	35
J. Seidlerová, P. Majorová, A. Slíva: Delamination of vermiculite particles using ultrasonic treatment.....	36
 <u>Topic 7 - Biotechnology for nanomaterials fabrication, health safety and environmental risk of nanomaterials</u>	
A. Fučíková, J. Valenta, V. Březina, I. Pelant: Nanocrystalline silicon and its interaction with bio-environment.....	37
F. Hassen Khoshnaw: Electrochemical migration of electronic components at sea environments – theoretical study.....	38
E. Pollert, O. Kaman, M. Veverka, P. Veverka, V. Herynek, P. Jendelová: New nanohybride materials for magnetic fluid hyperthermia	39
O. Černohorský, K. Žďánský, J. Zavadil, P. Kacerovský, A. Fojtík: Study of Pd/InP interfaces for hydrogen detection	40
