

Contents

List of contributors vii

- 1 The questions of animal rationality: Theory and evidence 1
Susan Hurley and Matthew Nudds

Part I **Types and levels of rationality**

- 2 Meanings of rationality 87
Alex Kacelnik
- 3 Minimal rationality 107
Fred I. Dretske
- 4 Styles of rationality 117
Ruth Garrett Millikan
- 5 Animal reasoning and proto-logic 127
José Luis Bermúdez
- 6 Making sense of animals 139
Susan Hurley

Part II **Rational versus associative processes**

- 7 Transitive inference in animals: Reasoning or conditioned associations? 175
Colin Allen
- 8 Rational or associative? Imitation in Japanese quail 187
David Papineau and Cecilia Heyes
- 9 The rationality of animal memory: Complex caching strategies of western scrub jays 197
Nicola Clayton, Nathan Emery, and Anthony Dickinson

Part III **Metacognition**

- 10 Descartes' two errors: Reason and reflection in the great apes 219
Josep Call
- 11 Do animals know what they know? 235
Sara J. Shettleworth and Jennifer E. Sutton
- 12 Rationality and metacognition in non-human animals 247
Joëlle Proust

- 13 Rationality, decentring, and the evidence for
pretence in non-human animals 275
Gregory Currie

Part IV **Social behaviour and cognition**

- 14 Folk logic and animal rationality 293
Kim Sterelny
- 15 Rationality in capuchin monkey's feeding behaviour? 313
Elsa Addessi and Elisabetta Visalberghi
- 16 Social cognition in the wild: Machiavellian dolphins? 329
Richard Connor and Janet Mann

Part V **Mind reading and behaviour reading**

- 17 Do chimpanzees know what others see—or only what
they are looking at? 371 74
Michael Tomasello and Josep Call
- 18 We don't need a microscope to explore the chimpanzee's mind 385
Daniel Povinelli and Jennifer Vonk
- 19 Belief attribution tasks with dolphins: What social
minds can reveal about animal rationality 413 28
Alain J.-P. C. Tschudin

Part VI **Behaviour and cognition in symbolic environments**

- 20 Intelligence and rational behaviour in the bottlenosed dolphin 439
Louis M. Herman
- 21 Intelligence and rationality in parrots 469
Irene M. Pepperberg
- 22 The impact of symbolic representations on chimpanzee cognition 489 24
Sarah T. Boysen
- 23 Language as a window on rationality 513
E. Sue Savage-Rumbaugh, Duane M. Rumbaugh, and William M. Fields

- arbitrary causation 221
- arbitrary cues, difficulty learning 224–225
- architecture, animal brain 145, 146
- Aristotle 2, 88, 117, 131, 414
- Ashby, W. Ross 259
- associations, reasoning or conditioned 181–183
- associative learning 36
- associative learning mechanisms 190
- associative learning theory 198
- associative mechanisms 14–15
- associative processes, rational versus 32–39, 173–216
- auditory discrimination 43
- auditory tasks, escape key from 41
- 'Austin' (chimpanzee), lexigram study phase II 77, 523–528
- autistic children 476, 479–480, 540
- awareness
 - of one's own behaviours by dolphins 456–457
 - of one's own body parts by dolphins 457–458
- B-rationality (evolutionary biology) 22, 23, 53, 93–96, 247, 315
 - foraging by flying or walking 97–99
 - optimal foraging theory 96–97
- backward error propagation 178
- Bayes' theorem 254
- bee dances 119
- begging and gesturing, chimpanzee experiments 60–61, 62, 376–379
- behaviour
 - and cognition in symbolic environments 437–552
 - dolphins' knowledge of how to improvise 450–451
 - dolphins' knowledge of integrating 449–450
 - indicative of pretending 277–279

- behaviour (*cont.*)
 personal-level explanations 29
 social cognition and 291–367
- behaviour reading, mind reading and 57–68, 369–436
- behavioural flexibility 441
- behavioural rationality 10, 20
 instrumental rationality as 7–10
 versus process rationality 5–6
- behavioural synchrony 453–454
- behaviourism 181
- belief attribution tasks, with dolphins 413–436
- belief–desire psychology 127n
- beliefs
 classification 204
 false 413, 416
- Bermúdez, José Luis 27, 127–137
- ‘best reply’ 17–18
- ‘Betty’ (crow), PP-rationality 23, 101–102
- biases, heuristics and 8
- biological predispositions 226–227
- biological rationality 50
- birds
 application of rationality to 22
 avoidance of poisonous-looking butterflies 112–113
 experimental tests 96–102
 metacognitive skills 262
 PP-rationality of ‘Betty’ the crow 23, 101–102
see also crows; hummingbirds; parrots; starlings
- blink reflex 107
- ‘Bobby’ (chimpanzee), scale model experiment 503–506
- bonobos, exposure to language 79, 519
- booster interpretations 59, 371
- bottlenose dolphins
 alliance formation behaviours 55
 brain size 440, 441
 encephalization quotient (EQ) 440
 foraging 348–349
 intelligence and rational behaviour in 439–467
 life history and reproduction 332–333
 Shark Bay study 331
 sociosexual behaviour 351–352
- bounded rationality 44, 248, 249–251
- Boysen, Sally, minimal rationality example 108
- Boysen, Sarah 74–76, 157, 489–511
- brain size, comparison of cetacean 354–355t
- cache beliefs, structure and content of 204–209
- cache memories, flexibility of 207–209
- cache recovery 201–204
- caching experiment
 experimental design of first social context 210
 experimental design of the interleaved trials 212
- caching strategies, rationality of 209–213
- Call, Josep 40–42, 43, 59–62, 219–234, 371–384
- candy arrays
 and numeral arrays experiments 74–75, 157–158, 159
 and rock arrays 492, 493f
 summary of work on numeral arrays and 490–494
- Capuchin monkeys 478
 feeding habits studies 53–54
 influence of nutrients on food choices 320
 PP- or B-rational feeding behaviour 320–322
 rationality in feeding behaviour 313–328
 social influences on feeding behaviour in 316–320
 social influences on the response to novel foods 316–320
- Carroll, Lewis 103–104
- categorizations 475, 476, 477
- causal connections 230
- causal reasoning 40–41, 133, 134
- causal tasks 40
- causation
 non-linguistic animals’ understanding of 135
 relations between conditionals and 134
- Cebus apella* *see* Capuchin monkeys
- cetaceans, comparison of brain size 354–355t
- cheaters, detecting 141, 161
- chimpanzees
 begging and gesturing experiments 60–61, 62, 376–379
 candy arrays and numeral arrays experiments 74–75, 157, 159, 490–494
 competing for food experiments 60, 374–376, 395
 criticisms with rebuttals of Povinelli and colleagues’ seeing-not seeing studies 405–411
 Experiments cited by Hurley on context-specific reasons for action 30–31
 experiment using food to show communication between Sherman and Austin 524–525
 experimental findings related to their understanding of seeing 381t
 experimenters not looking at the chimpanzees directly criticism 408
 gaze following 59–60, 372–374, 380
 Heyes’ experiment for reasoning about mental experience of <seeing> in others 397–398
 impact of symbolic representations on cognition 489–511
 impoverished rearing history criticism 410–411
 individual differences in use of scale models 507–509
 as intentional agents 149
 knowing what others see studies 371–384
 lacking mental capacity to track and complete cues criticism 408–409
 male subgroups 338
 not understanding eyes as portals of visual attention criticism 407–408
 Povinelli studies set in a co-operative context criticism 409–410
 pretraining procedures criticism 407
 reasoning about mental states 385, 386

- reasoning about who can and cannot <see>
 - them experiments 392–393
- responding to human experimenters criticism 405–406
- scale model comprehension experiments by 75–76, 502–509
- self-knowledge 61, 379–380
- shifting alliance relationships 338
- testing psychological experience of <seeing> in others 389–390
- tests implicating presence of *Sb* 404–405
- 'turning up the microscope' on social cognition research 400–401
- understanding human pointing and gazing 451–453
- use of sign language 516–517
- what they really understand about seeing 380–383
- choice trials 237f
- classic control theory 259
- classical behavioural rationality 7–8
- classical conditioning 190
- classical reasoning processes 12
- Clayton, Nicola 36–39, 197–216
- coefficients of association 335
- cognition 118
 - animal 183–184
 - in apes 58
 - social behaviour and 50–57
 - see also metacognition; rational cognition; social cognition
- cognitive evolution 231, 298
- cognitive flexibility 253–256
- cognitive representations 251
- cognitive variation 275–277
- Comparative Cognition Project, chimpanzee study 489–511
- competing for food, by chimpanzees 60, 374–376
- Conant, Roger 259
- conceptual abilities 4–5, 29, 147, 151–152
 - reasons for action without 139–146
- conceptual reasoning abilities 141
- conditional operators 133
- conditional reasoning 28, 129, 133
- Connor, Richard 54–57, 329–367
- consciousness, rationality and 4
- consciousness of reasons 143
- contact swimming, by female dolphins 351
- context-bound reasons, for action 160–163
- contradictions, recognizing 120
- contrariety 28, 132
- control systems 153, 249–250, 269, 270
- cooking 300
- correspondence problem 189
- 'create' trials, dolphins 450–451, 460
- crows, PP-rationality in New Caledonian crows 23, 101–102
- cultural teleological context 155
- cumulative niche construction 300
- Currie, Gregory 47–49, 275–290
- Darwin, Charles 414
- dead facts 26, 120, 122
- decentring 3, 47–48, 276, 287
- deception 49, 280–281, 287
- decision theory 16, 17
- decision-making 136
- declarative domains 69–70, 442, 443–451, 459–460
- declarative memory 204, 206
- decoupled representations 298
- delayed matching-to-sample metamemory tests, rhesus monkeys 241–242
- demonstrator reward, sensitivity to 189–191
- Dennett, Daniel 29
- Descartes, René 187, 220, 413–414, 429
- Descent of Man, The* (Darwin) 414
- desires, content of 200–204
- Dickinson, Anthony 36–39, 197–216
- Dickinson, Tony 304, 309
- discriminability, signal 255
- dogs, responses to human pointing or gazing 452
- dolphins
 - affiliative interactions 56–57
 - aggressive behaviour 345, 351, 352
 - alliance formation behaviours 55
 - alliance levels 336–338
 - auditory psychophysical task 239
 - awareness of one's own behaviours 456–457
 - awareness of one's own body parts 457–458
 - belief attribution tasks 413–436
 - brain size 57, 352–353, 440, 441
 - consortships 333
 - contact swimming 351
 - cueing by experimenters 425
 - echolocation abilities 356, 440, 453
 - experiment 1 66–67, 421
 - false belief/true belief test phase 421
 - lack of visual access 424–425
 - learning explanation 424
 - results 423–424
 - training phase 421
 - experiment 2 67, 421–423
 - false belief/true belief/dud belief test phase 422–423
 - results 423–424
 - training phase 422
 - experiment procedures 420
 - features of dolphin society 329–335
 - feeding habits of females 346–347
 - female associations and social learning 56
 - female relationships in Shark Bay 346–349
 - fetching multiple objects at once 446–447
 - hider–communicator false-belief paradigm pilot study 66
 - intelligence and rational behaviour 68, 439–467
 - interpretations of experiments 424–427
 - knowing how to improvise behaviours 450–451
 - knowing how to integrate behaviours 449–450
 - knowledge of when they are uncertain 228
 - machiavellian intelligence in 356–359
 - male alliances in Shark Bay 335–346

- dolphins (*cont.*)
- male multilevel alliances and social complexity 55–56
 - materials for experiments 420
 - mimicry of sounds and motor behaviours
 - of others 70, 454–456
 - natal philopatry 335
 - neocortex ratios 417–418
 - non-verbal false belief studies 65, 418–419
 - petting 349–350
 - pilot study procedure
 - displacement control 431
 - ignore-communicator control 431
 - pretest controls 418, 419, 421, 424, 430–431, 432t
 - training phase 430
 - post-test cue controls 431, 432t
 - responses to human pointing 452–453
 - role of emotions in social relationships 352
 - self-knowledge 456–458
 - shifting alliance relationships 338
 - shifting relations among provisioned males
 - and their allies 344–345
 - shifting relations among second-order alliances 345–346
 - social cognition in the wild 329–367
 - social intelligence 451–456
 - social mind evidence in 418–419
 - social mind hypothesis 425–427
 - sociosexual behaviour 351–352
 - subjects for experiments 1 and 2 420
 - as subjects for studies of cognition 68
 - synchrony 70, 350–351, 453–454
 - testing understanding of complex instructions 443–444
 - understanding concept of ‘create’ 450–451, 460
 - using escape key from auditory tasks 41
- domain
- of the self 442, 461–462
 - of self-knowledge 70–71
- domain-general reasoning 12, 13, 16, 20
- ‘Domino’ (dolphin), experiment observations 426
- Donald, Merlin, on behaviour of apes 121–122
- dot stimulus arrays 500
- doxastic actions 45, 257
- Dretske, Fred 23–25, 107–115
- Dunbar, Robin 277
- E-rationality (Economic) 7, 18, 21, 22, 90–93, 96, 99–101, 247
- echolocation, of dolphins 356, 440, 453
- ecological rationality 8–9, 103
- ecological validity complaint 409
- economic theory 90
- ‘Elele’ (dolphin) 68, 70–71, 449, 450, 451, 458, 460, 462
- Emery, Nathan 36–39, 197–216
- emotional and intellectual growth theory 539
- ends
- and means 6n, 148
 - rationality of 6–7
- enrichment 48, 278, 279, 281, 282, 286, 287
- Environmental Complexity Hypothesis 249
- environments
- adaptation of animals to their 293
 - transparent and translucent 296
- episodic memory 204, 206
- in adult humans 235
 - in non-human animals 236
- epistemic actions 45, 257, 271, 298–299
- evaluative processes, and symbolic representations 490–494
- evil eye hypothesis 375
- evolution, of reasoning and reflection 231–232
- expected utility theory (EUT) 7
- experimental economics 90
- externalism 145
- eye-covering behaviour, in primates 48–49, 281–282
- false beliefs 413, 416
- false killer whales 329–330
- false-belief tasks, dolphins 65, 161, 413, 428, 431, 432t
- feed-forward model of action 251f
- feedback laws 250
- feeding, in Capuchin monkey groups 323
- Fields, William 76–80, 513–552
- fission–fusion society 334, 451
- fitness 22, 51, 305, 306
- fitness maximization 93
- five-element learning task 175, 177, 178, 179, 180, 182, 183
- flexibility 149
- costs and benefits of 252–253
 - costs and benefits of cognitive 253–256
- flexible control, via cognition 252
- flexible generality 29, 147
- flying or walking foraging, B-rationality of 97–99
- folk logic 50, 52
- and animal rationality 293–311
- food
- influence of nutrients on choices of 320
 - salivation inducement 147
 - shaken food inside a cup making noise
 - study 221–222
 - as social instrument for humans 314
 - solid food under a board occupying space
 - study 222–224
- food aversion learning 322
- foraging, starlings 50, 96, 294–295
- foraging lifestyle of humans, transition to agricultural life styles 301

- formal rationality, substantive and 16–17
- forward models 250
- functional emotional model 539
- functional similarity 235, 238
- game playing, parrots 482–483
- game theory 18
- gaze following, chimpanzee 59–60, 372–374

- gazelle at a watering hole, non-linguistic reasoning
 - example 27–28
- generality 149
- generalization 2–3
- Gigerenzer, Gerd, intelligent action 297
- goals, achieving 3
- Godfrey-Smith, Peter 50, 294
- great apes
 - reasoning and reflection in 40, 219–234
 - see also apes
- great tits (*Parus major*), decision of a female to
 - enter a male territory 470–471
- grey parrots (*Psittacus erithacus*)
 - cognitive capacities 471
 - see also parrots
- grey squirrel, attempts to reach bird feeder 119
- Hamilton, William 94
- Herman, Louis 68–71, 439–467
- heuristics 7, 297–298
 - and biases 8
 - use of 12–13
- Heyes, Cecilia 33–36, 64, 187–195
 - experiment for reasoning about mental
 - experience of <seeing> in others 397–398
- holism 29, 142
 - relationship between normativity and 153
 - versus inferential promiscuity 146–151
- hostility 297
- human cognition, evolution 299–302
- human conceptual abilities 152
- human decision-makers 8
- human pointing and gazing, understanding
 - 451–453
- human rationality 470
- humans
 - capacity to disengage from immediate
 - environment 277
 - episodic memory in adult 235
 - interpreting behaviour of animals
 - and 164–166
- hummingbirds 22–23, 99–100
- Hurley, Susan 29–31, 139–171
- illusions, parsimonious 394–396
- imitation 275, 278, 280, 281, 283
 - by dolphins 454–456
 - in Japanese quail 34–35, 188–189
- imitative behaviour 108n
- inclusive fitness 94, 95
- individual rationality, social and 17–18
- inference 303
- inferential reasoning, by exclusion 221
- information transfer, hazards of 303–310
- inner states 24
- instrumental conditioning 133–134
- instrumental rationality 6
 - as behavioural rationality 7–10
 - displayed by 'Sheba' the chimp 157
 - as process rationality 10–16
- intellectual flexibility, evolution of 462
- intelligence
 - evolution of 52
 - rationality and 2
 - and rationality in parrots 469–488
- intelligent action 297
- intentional, and mechanistic psychology
 - 198–200
- intentional actions 10, 148
- intentional agency 142, 146, 147, 148, 149
- intentional explanations 24, 32, 36, 38, 45
- intentional reflexivity 265
- intentions 167
- interference effects, in candies and numeral array
 - tests 74–75, 498
- internal models 251
- interpretivism, combining realism and 145
- intragroup alliances
 - theories 358
- inverse models 250
- irrational animals 220
- irrational behaviour 480–483
- Japanese quail
 - imitation in 34–35, 188–189
 - rational versus associative explanations of
 - the 191–192
- Kacelnik, Alex 20–23, 87–106, 107, 247
- 'Kanzi' (bonobo), lexigram study phase III 49,
 - 78–79, 528–533
- knowledge 227
- Koriat, Asher, accessibility model 264
- label acquisition 472–480
 - parallels with initial learning by children
 - 474–475
- lactation 92, 93
- 'Lana' (chimpanzee), lexigram training phase I 77,
 - 520–523
- language
 - emotional roots of 539–541
 - learning through 307
 - as a window on rationality 513–552
- language acquisition in non-humans 541–549
 - additional skills 547–548
 - blind controls and testing anomalies 545
 - data drawn from daily notes 546–547
 - rearing variables 548–549
