

# CONTENTS

<i>Preface</i> .....	v
<b>TUTORIALS</b> .....	1
M. HINZE <i>Mathematical aspects of proper orthogonal decomposition (POD)</i> .....	3
V. MEHRMANN <i>Model reduction: analysis, numerical solution and real world applications</i> ....	4
<b>PLENARY LECTURES</b> .....	5
L. CHAMOIN, P. LADEVÈZE, P.-E. ALLIER <i>Verification and effectivity of PGD model reduction</i> .....	7
R. CODINA <i>Reduced-order subscales for POD models in fluid mechanics</i> .....	9
R. W. FREUND <i>Krylov subspace-based model order reduction of RCL circuit equations</i> .....	10
J.-F. GERBEAU <i>Approximated Lax pair for nonlinear evolution equations</i> .....	11
S. GUGERCIN <i>Structure-preserving interpolatory model reduction for linear and nonlinear dynamical systems</i> .....	12
U. MAAS <i>Hierarchical concepts for model reduction for reacting flows based on low-dimensional manifolds</i> .....	13
J. M. NORDBOTTEN <i>Understanding discretization error, solver error, and model error for deformable porous media</i> .....	14
K. R. RAJAGOPAL <i>Modeling the flow of traffic</i> .....	15
<b>PRESENTATION OF THE PROJECT MORE</b> .....	17
J. HRON <i>Mixed formulations, numerical solutions and computations for viscous-plastic flows using implicit material relations</i> .....	19
A. JANEČKA <i>Euler-Bernoulli type beam theory for elastic material with nonlinear response in the small strain range</i> .....	20
J. MÁLEK <i>Implicitly constituted materials: from modelling towards PDE-analysis</i> .....	21

K. R. RAJAGOPAL	
<i>The mechanics and mathematics of bodies described by implicit constitutive equations</i> . . . . .	24
M. ŘEHOŘ	
<i>Modeling and simulation of float glass process</i> . . . . .	25
G. TIERRA	
<i>Simulations of flows of fluids characterized by a non-monotone implicit constitutive relation</i> . . . . .	26
M. VOHRALÍK	
<i>A posteriori error estimates and adaptivity for Stokes flow with implicit constitutive laws</i> . . . . .	27
<b>POSTERS</b> . . . . .	29
P. K. GOYAL	
<i>Interpolatory model reduction for bilinear descriptor systems</i> . . . . .	31
C. HIMPE	
<i>Optimization-based combined reduction for nonlinear systems</i> . . . . .	32
M. ISOZ	
<i>Gravity-driven rivulet flow on a slowly varying substrate</i> . . . . .	33
V. JANOVSKÝ	
<i>Numerical analysis of a lumped parameter friction model</i> . . . . .	34
M. LANZENDÖRFER	
<i>Some open problems in piezoviscous lubrication</i> . . . . .	35
Y. LU	
<i>Model order reduction via a balanced truncation-interpolation approach for gas networks</i> . . . . .	36
P. MINAKOWSKI	
<i>A novel Eulerian approach to crystal plasticity</i> . . . . .	37
M. MOLDENHAUER	
<i>Optimal hip implant positioning</i> . . . . .	38
V. ORAVA	
<i>Multi-phase modeling of non-isothermal reactive flow in fluidized bed reactors</i> .	39
J. PAPEŽ	
<i>Algebraic error in Cascadic Conjugate Gradient Method</i> . . . . .	41
I. PULTAROVÁ	
<i>Spectral properties of stochastic Galerkin matrices</i> . . . . .	42
E. ROHAN	
<i>Modelling tissue perfusion — hierarchical models and identification</i> . . . . .	43

H. ŠVIHLOVÁ	
<i>Determination of pressure data from velocity data with a view towards its application in cardiovascular mechanics</i> .....	44
J. ŽABENSKÝ	
<i>Completion of the existence theory for unsteady flows with a pressure- and shear-dependent viscosity</i> .....	46
<b>CONFERENCE PROGRAM</b> .....	47
