

CONTENTS

General Information	4
Oral Sessions	5
Section A. General Properties of Radiation from Relativistic Particles	5
Section B. Transition Radiation	11
Section C. Parametric X- Radiation	15
Section D. Diffraction Radiation, Smith-Purcell Effect	23
Section E. Coherent Bremsstrahlung and Channeling Radiation	32
Section F. Crystal-Assisted Processes	38
Section G. Applications of Monochromatic X- and γ- Beams Produced at Electron Accelerators	49
Poster Sessions	55
