1	Introduction	5
2	Stochastic differential equations	6
2.1	Definition and basic properties	6
2.2	The Itô formula	7
2.3	Numerical solution of SDEs	8
2.4	Statistical estimates of the stochastic solutions	9
3	Applications to RL circuit	10
3.1	RL circuit with deterministic parameters	10
3.2	RL circuit with stochastic parameters	10
4	Applications to RLC(G) circuits	14
4.1	Deterministic model	14
4.2	RLC circuit with stochastic source	15
4.3	RLC circuit with stochastic resistance	15
4.4	Examples	16
5	Simulations of higher order circuits	19
5.1	Uniform transmission line modelling	19
5.1.1	Deterministic model	19
5.1.2	Model with stochastic excitation	20
5.1.3	Model with stochastic resistances	21
5.1.4	Numerical method applied for TL model	22
5.1.5	Examples of TL model responses	22
5.2	Multiconductor transmission line modelling	24
5.2.1	Deterministic model	24
5.2.2	Model with stochastic excitations	25
5.2.3	Numerical method applied for MTL	26
6	Conclusion	29
