

CONTENTS

| | | |
|-----------|---|-----------|
| 1 | Introduction | 5 |
| 1.1 | Research Challenges | 5 |
| 1.2 | Research Contribution | 5 |
| 2 | Theoretical Background | 6 |
| 2.1 | Warehouse Optimization | 6 |
| 2.2 | The Job Shop Scheduling | 7 |
| 2.3 | Discussion | 8 |
| 3 | The Objectives of Dissertation | 9 |
| 4 | The Mathematical Model | 10 |
| 5 | The Collision Prediction Algorithm | 13 |
| 5.1 | Collision of 2 Objects in 2 Dimensions | 13 |
| 5.2 | Types of Fork-lift Truck Collisions | 14 |
| 5.3 | A Numerical Example of Truck Collision | 15 |
| 6 | The Evolutionary Framework | 16 |
| 6.1 | Grammar Driven Genetic Programming | 16 |
| 6.1.1 | Grammar Driven Initialization Method | 17 |
| 6.1.2 | Grammar Driven Crossover Operator | 17 |
| 6.1.3 | Grammar Driven Mutation Operator | 18 |
| 7 | The Warehouse Optimization Algorithm | 19 |
| 7.1 | The Terminals and Non-Terminals | 19 |
| 7.2 | The Design of Objective Function | 19 |
| 7.3 | The Run Controlling and the Termination | 20 |
| 7.4 | The Design of Context-Free Grammar | 20 |
| 7.5 | The Design of Optimization Operators | 21 |
| 8 | Benchmarking and Test Sets | 22 |
| 8.1 | Standardization, Normalization | 22 |
| 8.2 | The Test Set – Real Data | 23 |
| 8.3 | The Test Set – Synthetic Data | 24 |
| 9 | Measurement and Validation | 25 |
| 9.1 | The Results of Synthetic Data Set | 27 |
| 10 | Conclusion | 28 |
| | Bibliography | 29 |
| | Bibliography of Author | 31 |
